DEPARTMENTAL SYSTEMS

THE LEADER IN ADVANCED
DIGITAL IMAGING EXPANDS
ITS LEGACY.

Experience the color-enabled
Canon imageRUNNER® C6800...
the ultimate networked digital
imaging system designed to
complement your high-volume
corporate departmental needs.

Today's business slows down for no one. To be successful in this environment, you need a solution that can provide fast turnaround times while streamlining communication costs to allow your work—and your organization—to stand above the rest.

Recognizing these requirements, Canon has created the imageRUNNER C6800—a revolutionary digital multifunction solution that offers the speed and versatility to keep pace with your business, and allows you to add color to your usual black-and-white documents when you need it.

Best of all, the imageRUNNER C6800 offers a complete suite of functionality, along with advanced finishing capabilities and innovative communication features—all with the same industry-leading levels of performance, quality, and reliability you can expect only from Canon.

THE EPITOME OF TRUE PRODUCTIVITY

The Canon imageRUNNER C6800 leverages its impressive heritage for your high-volume requirements and reveals a whole new world of color to your office.

User-friendly Control Panel

The color-enabled imageRUNNER C6800 is designed to boost productivity and enhance efficiency in every aspect of your work. Offering advanced digital copying, Mail Box features, available network printing, Super G3 Fax,* scanning, and sending functions, the system is designed to simplify even the most challenging tasks in one compact, user-friendly device.

At the core of the imageRUNNER C6800 is Canon's Color imagePlatform architecture. More than a platform, this foundation acts as a springboard that will save you precious time and resources, both with the power to handle multiple tasks simultaneously and the unique ability to distribute information across a dynamic digital landscape.

To meet increasingly shorter deadlines, the Canon imageRUNNER C6800 offers black-and-white output speeds of up to 68 pages per minute (ppm). Plus, with its ability to deliver color output at 16 ppm, the system can handle your occasional color requirements as well, thereby eliminating outsourcing expenses and the need to maintain costly, stand-alone color laser beam printers. Fast scanning speeds of up to 70 ppm (300 dpi) and 50 ppm (600 dpi) in both color and black and white keep you and your documents moving along while capturing every brilliant detail.

Extensive document-handling options, finishing capabilities, and support for a variety of paper media, sizes, and weights, allow you to create exciting and attention-grabbing documents.

Like all imageRUNNER systems, users and administrators are provided with every necessary tool for quick, intuitive programming of all features, whether standing at the device using its large, full-color touch-screen interface panel, or from the desktop through Canon-supplied device drivers and utilities.

*Available 2H 2004. Check with your local Canon-authorized Dealer for availability.

AN IMPRESSIVE PERFORMER THAT MAKES A GREAT TEAM PLAYER.

Reliable image quality, uncompromising innovation, cost-effective operation—all the benefits you'd expect from Canon—and more!

Set New Expectations for Office Productivity

The imageRUNNER C6800 is equipped with the processing power and memory capacity to help eliminate bottlenecks and improve network efficiency. With an innovative dual processor design, 768MB RAM, and a 40GB hard disk as standard equipment, the system can easily keep pace with your business.

Your business documents are a reflection of your organization. Make a positive impression every time with the imageRUNNER C6800. With support for 600 x 600 dpi scanning resolution and up to 2400 equivalent x 600 dpi printing resolution, the system ensures that every image is sharp, every gradation is smooth, and every character is crisp.

Designed to Go Distances that Others Wouldn't Dare

The imageRUNNER C6800 offers an innovative design with several enhancements that aid in device reliability and durability. A sturdy aluminum die-cast frame allows the device to stand up to the rigors of continuous long runs and high-output volumes.

High-yielding consumables and supplies significantly reduce operating costs and downtime. In its first implementation on a color-enabled device, Canon's Amorphous Silicon Drum (A-Si) delivers high reliability over millions of impressions for both black-and-white and color output. Canon's monocomponent black toner delivers outstanding image quality for high-volume, black-and-white applications. For color applications, the imageRUNNER C6800 leverages Canon's oil-free S-Toners, producing eye-catching color with just a touch of gloss—perfect for office applications.

Other productivity-enhancing design characteristics include standard automatic duplexing, Canon's Intermediate Transfer Belt technology, and a shorter, flatter paper path that allows you to print on heavy stocks and specialty media. What's more, the imageRUNNER C6800 will print your entire document at its rated speeds, as there's no downtime when switching between black-and-white and color prints.

AN EASY-TO-USE SOLUTION IS THE ONLY SOLUTION.

Memory-enabled digital copying and Mail Box functions allow for greater document storage, creation, and manipulation capabilities than most comparable systems.

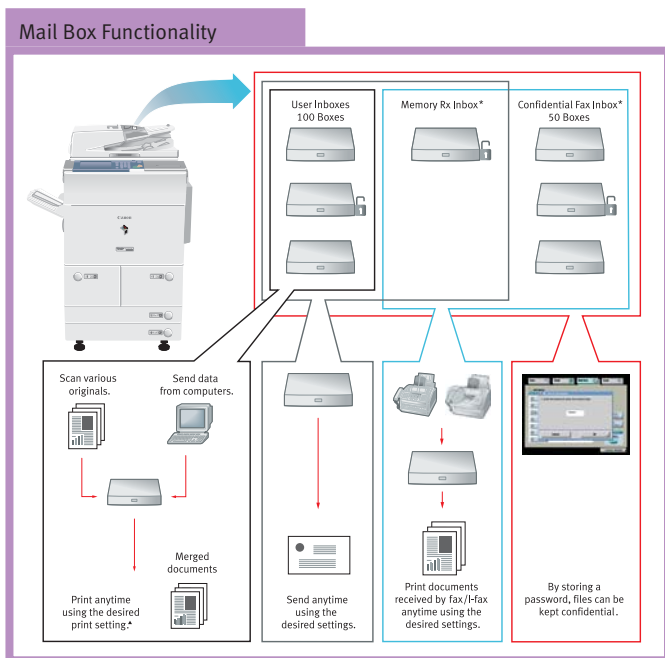

Digital Copying

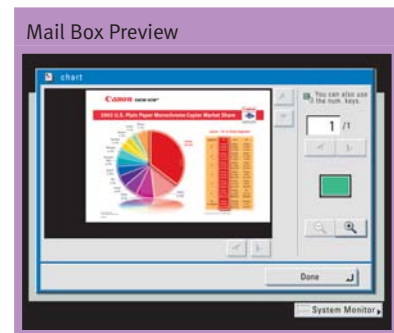

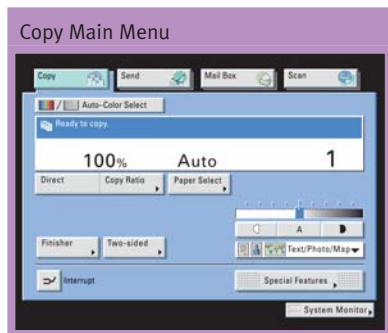

When there are short deadlines that must be met, the imageRUNNER C6800 is always up to the task. Canon has equipped this system with a number of digital copying features to enhance workflow, including Scan-Once-Print-Many, Copy Reservation, Job Done Notification, Job Build, Booklet Modes, Area Designation—and more!

Mail Box Features

The imageRUNNER C6800 supports value-added Mail Box functions that may serve as your centralized system for information-sharing, on-site document storage, and print-on-demand applications. The Mail Box function can be used to store hard-copy-based originals such as receipts and frequently used forms, as well as print data such as presentations, proposals, and spreadsheets. Once stored in the Mail Box, documents may be combined and printed as one job with the desired settings or sent to other destinations.

*May require optional equipment. Please contact your Canon Dealer for more information.
 ▲Some functions are not available when printing documents sent from a computer.

LEADING THE MOVEMENT TOWARDS INTEGRATED WORKFLOW SOLUTIONS.

Change the way your company communicates in color—effortlessly and inexpensively.

Color Universal Send™ Makes Seamless Workgroup Collaboration a Reality

Targeted to smaller departments and workgroups, Canon's Color Universal Send technology (optional) allows users to scan and distribute documents to multiple destinations. These may include group or individual e-mail and Internet fax (I-fax) addresses, network or host folders, and document management applications such as Canon's imageWARE.™ This all-in-one operation eliminates the expense and administrative burden associated with using conventional methods of printing, filing, and forwarding hard-copy documents.

Enterprise-wide Communication Made Easy with eCopy

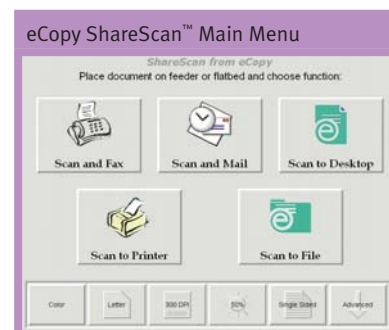

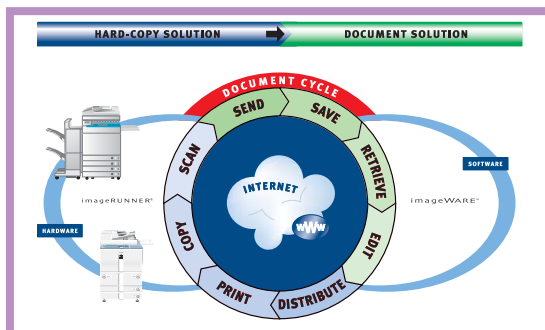

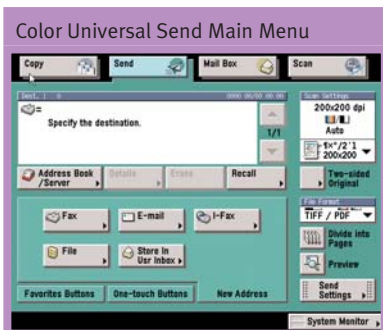

Convert your imageRUNNER C6800 into a sophisticated yet simple-to-use document distribution powerhouse. With the optional eCopy Suite of products, your organization can transform paper documents into information that's easily integrated into all your business applications. eCopy connects with your company's e-mail and other networked enterprise applications for secure and instantaneous distribution of information.

File Type Flexibility

When sending documents from the imageRUNNER C6800, whether it's through Color Universal Send or the eCopy Suite, you may select from several industry-standard formats to ensure that your documents can be easily viewed and printed by any recipient. Both options employ high-compression technology that allows even complex or detailed color pages to be efficiently handled over the network without affecting image/text legibility. The results are minimal network traffic and maximum impact on your audience.

Canon Fax Technology at Your Fingertips

Install the optional Super G3 Fax Board* and transform your imageRUNNER C6800 device into an advanced, yet easy-to-use fax machine. Thanks to Canon's superior image quality, you can be assured that both sent and received fax transmissions will be clear and legible. In addition, using the Canon-supplied Fax Driver, you can quickly and easily send documents as fax transmissions right from your desktop.

*Check with your local Canon-authorized Dealer for availability.

Limitless Opportunities for Your Real-world Needs

The imageRUNNER C6800 delivers the same productivity and reliability you'd expect from a Canon imageRUNNER device, plus the added impact of full-color capabilities to complement your work. Moreover, it opens up exciting opportunities to simplify your workflow, control your costs, and communicate efficiently—all to maintain your competitive edge.

Can I integrate my hard-copy and electronic documents?

The imageRUNNER C6800 offers a number of methods to handle both mediums quickly and easily. Leveraging the system's Mail Box features, the imageRUNNER C6800 can accept scanned hard-copy originals as well as electronic data, and easily merge them for output as one compound document.

Can I transform color documents into electronic data without slowing down my network?

Color files can consume large amounts of memory and may result in network bottlenecks. Canon's solution is the imageRUNNER C6800 special high-compression mode technology. This technology allows you to distribute information with minimal network traffic while providing maximum visual appearance.

Can I control and manage access to the device?

Every aspect of the imageRUNNER C6800 is designed to increase efficiency and reduce costs—especially when the system is implemented as a centerpiece of all your office communication functions. Additionally, the imageRUNNER C6800 hosts a number of available features that allow you to manage and monitor system use for precise and effective control of your costs.

Difference between conventional and UFR-based printers

How can I speed up my department's printing needs and reduce costs at the same time?

The imageRUNNER C6800 was designed specifically to speed up and simplify your high-volume departmental printing needs. With the ability to incorporate black-and-white and color documents through one powerful device, you will immediately realize gains in productivity and cost-savings by producing most of your work in-house as opposed to outsourcing. In addition, the system is packed with many innovative features and technology, such as Canon's Ultra Fast Rendering (UFR) technology (available with the optional Color Network Multi-PDL Printer Kit-C1) to accelerate network printing performance.

How can I make my business stand out?

With the imageRUNNER C6800, you can now create and distribute high-quality, professional-looking documents, and add the power of color to give your work the impact it deserves. You can capture and hold attention by producing flyers, booklets, presentations, and proposals in-house. You can also scan and instantaneously distribute the same information—in color—to multiple recipients electronically.

Delivering Key Industry Market Solutions

In addition to serving the general office needs of corporate departments, the imageRUNNER C6800 lends itself to critical applications in the following industries:

Healthcare

- Let the imageRUNNER C6800 optimize your medical records management and reduce storage costs by scanning documents into a secure database for retrieval at a later time.
- Improve security and workflow by holding information in a password-protected queue. This not only provides for easier administration, but also secures and protects healthcare information to facilitate compliance with privacy rules.
- Print patient medical records and information with confidence using the imageRUNNER C6800 device's Secured Print feature to reduce accidental disclosures.
- Use color to increase patient safety and satisfaction. Color in documents highlights instructions or warnings to staff, while color discharge packets can increase patient understanding of medical instructions.

Financial Services

- Accelerate workflow through the mortgage process by linking documents to your Loan Origination System (LOS) for secured access by authorized personnel.
- Shorten insurance claims processing time and decrease costs by eliminating paper-handling activities. As a result, your customer service representatives can devote quality time to serving the customer.
- Print short-run quantities of consumer banking products and service announcements in color while leveraging the system's advanced finishing features.
- Help facilitate compliance with regulatory requirements to protect consumer information, financial records retention, and customer identification verification.

Legal

- Leverage the imageRUNNER C6800 device's Color Universal Send technology to send your legal cases, contracts, and wills electronically to dramatically reduce document distribution expenses.
- Integrate the imageRUNNER C6800 with Canon's NetSpot Accountant software to facilitate cost recovery for bill-back/job accounting for all copied, printed, and faxed output for either clients or internal use.
- Save time by simplifying case document searches by combining the imageRUNNER C6800 device's scanning capabilities with Canon's imageWARE suite of document management software.

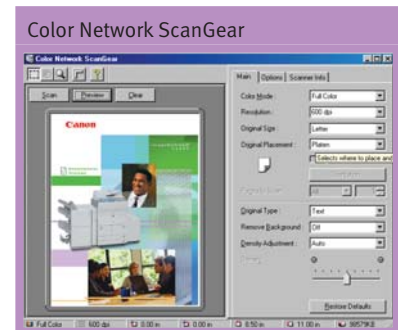

WORK SMARTER, NOT HARDER.

Intelligent document management solutions that are as flexible as they are user-friendly.

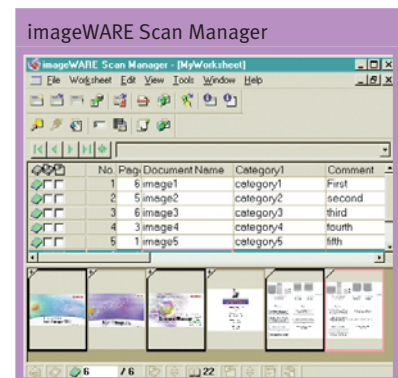

Scanning is a Snap with Color Network ScanGear

Canon's Color Network ScanGear (optional) is a user-friendly scanning utility that can be used with any 32-bit TWAIN-compliant software application to pull scanned images from the imageRUNNER C6800 over a network to a destination PC or file server. Scanned images then can be manipulated at the user's workstation and incorporated into other documents as needed.

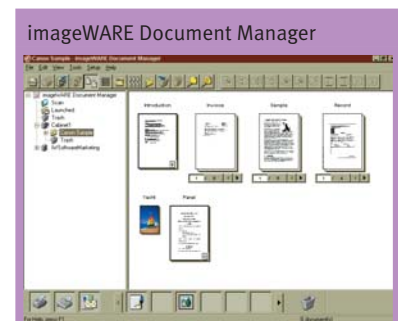

Integration with Canon imageWARE Software Suite

Integrate the powerful scanning capabilities of the imageRUNNER C6800 with Canon's optional imageWARE Software Suite for a comprehensive information capture, management, and distribution system.

Canon's imageWARE Document Manager is a central database repository with a client-server architecture that can be scaled to meet growing business needs. This repository is designed to reduce or replace traditional hard-copy document storage methods in general office environments, supporting applications for retrieval, archival, and records management.

With the automatic scanning and indexing capabilities of imageWARE Scan Manager, your business can capture and convert high volumes of documents into digital data quickly and easily. Advanced image capture and data recognition improve the accuracy and usefulness of digitized, computer-based information.

COMPLEMENT YOUR CAPABILITIES ACROSS MULTIPLE USERS.

Leverage Canon's expertise on user networks and engine design to deliver a sense of distinction in all your work.

Network Printing

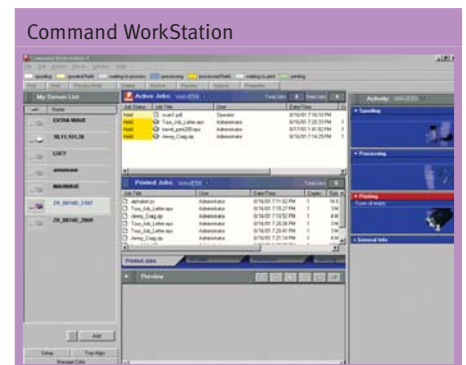

When it comes to printing, nobody does it better than Canon, and no other solution gives you more flexibility than the imageRUNNER C6800.

You may choose from two print controller options, the Canon-designed Color Network Multi-PDL Printer Kit-C1, or the imagePASS-D1, co-engineered by Canon in partnership with EFI.

The Color Network Multi-PDL Printer Kit-C1 delivers color printing capabilities best suited for general office environments, with support for PCL 5c and PostScript® 3™ emulation, and Canon's proprietary Ultra Fast Rendering (UFR) technology. This new UFR technology utilizes a recently invented printing algorithm to minimize file processing time and achieve maximum performance.

For higher bandwidth printing requirements, the imagePASS-D1 features its own hardware dedicated to printing applications, and supports genuine Adobe® PostScript 3 and PCL 5c emulation. Plus, users can benefit through the value-added capabilities of EFI's Command WorkStation® utilities.

Whichever print controller option you choose, you'll get maximum image quality and system performance. Through intuitively designed print drivers, you can start the document creation process right from your desktop with the ability to access page layout, document finishing, and image quality settings.

ELEVATE YOUR EXPECTATIONS FOR EFFICIENCY AND EXCELLENCE.

It's not merely a new way of printing—
it's a new way of working.

A New Level of Printing Flexibility

Canon has equipped the imageRUNNER C6800 with capabilities not found on dedicated single-function, color laser printers. Some of these enhanced capabilities include:

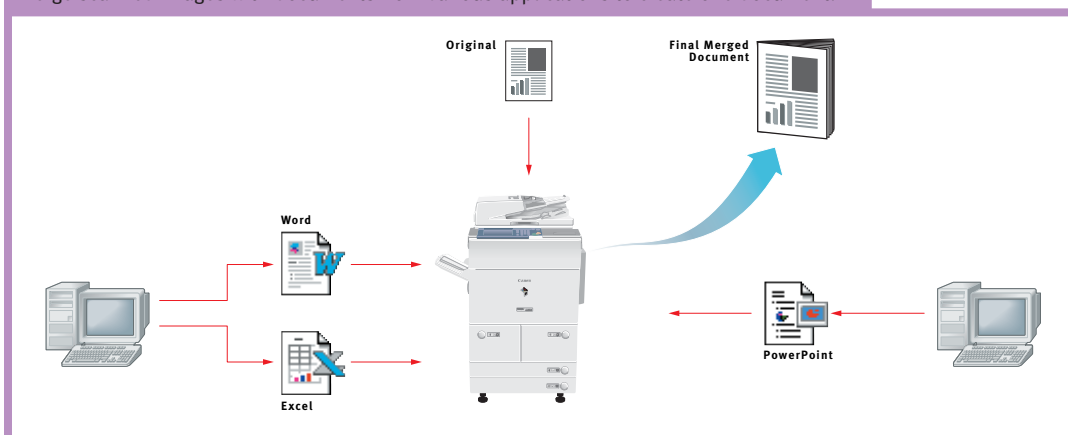

- **Secured Print** – Permits entry of a confidential PIN from within the print driver. Printing will begin only upon entry of the confidential PIN at the device.
- **Store (to a Mail Box)** – Users can send print jobs to a personal Mail Box for integration with other printed or scanned data, thereby creating new compound documents.
- **Edit and Preview (Page Composer)** – Users can combine and print documents that were created in different applications as a single document, preview and manipulate the merged file through a thumbnail view, and change settings on the fly.

Create Professional-looking Output

Together with the imageRUNNER product line, Canon's optional imageWARE Publishing Manager and imageWARE Document Composer provide a complete solution for document creation and optimal output. The result is simplified production of professional-looking color documents requiring various inserts and content types, such as manuals, brochures, catalogs, proposals, reports, books, and presentations.

Merge scanned images with documents from various applications to create one document.

FINALLY, YOU'RE IN CONTROL OF ALL RESOURCES.

The imageRUNNER C6800 comes equipped with a comprehensive set of utilities and features designed to simplify operation, management, and security.

User Authentication

Administrators may enable Department ID Mode to limit access to the imageRUNNER C6800 to those users assigned valid IDs and passwords. The administrator can set volume ceilings and restrict or enable access to color and black-and-white copy, scan, and print functions for up to 1,000 departments or users. An optional Control Card/Card Reader system manages usage through intelligent cards that must be inserted in the system before granting access to functions.

Simplified Device Management

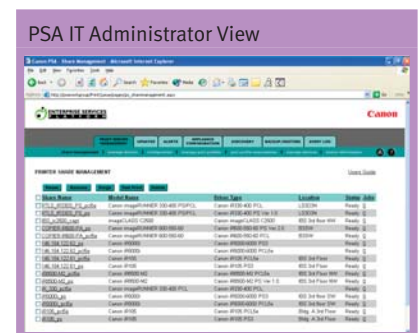

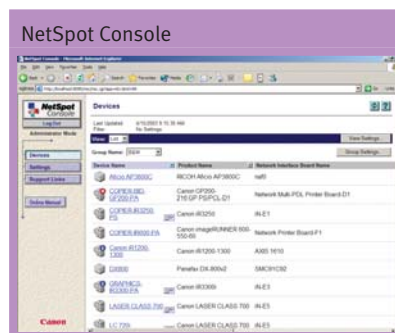

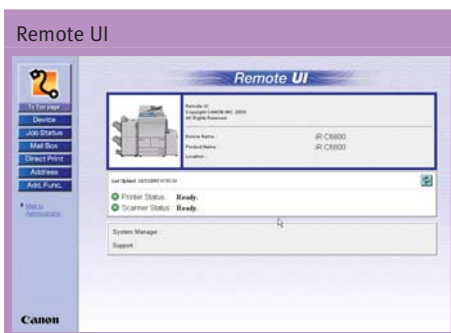

To truly support your requirements, networked devices must be easy to install, seamless to integrate with existing networks, and remotely manageable. Canon's comprehensive solution to this is embodied within Canon's Remote UI™ utility and NetSpot® Suite. Remote UI provides real-time system access and information using a standard Web browser. NetSpot Suite is a group of utilities designed to reduce those administrative burdens associated with vast numbers of print devices on corporate enterprise networks.

Canon Print Server Appliance

The optional Canon Print Server Appliance (PSA) is designed to help administrators manage enterprise network printing. When the PSA is first connected to a network, it will automatically discover all print devices, create print shares for those devices, and publish them on an intranet page generated by the appliance. From this intranet page, users can download the driver—with a single click—and start printing, resulting in increased efficiency and ease-of-use.

imageRUNNER Security Kit

Canon has taken comprehensive measures to ensure that your confidential data is kept secure. With the imageRUNNER Security Kit—an optional software package that initiates the overwriting of hard disks and completely erases previously stored data—your information is kept safe and secure so you can feel at ease.

DESIGN A SOLUTION TO SUIT YOUR NEEDS.

The imageRUNNER C6800 provides all the tools you need to automate most of your paper-handling chores so you're free to do other tasks.

Exceptional Versatility and Performance

The Canon imageRUNNER C6800 will make yesterday's tedious tasks a thing of the past. With its standard Duplexing Automatic Document Feeder, the imageRUNNER C6800 easily handles multipage, single, or double-sided, and even different-size originals quickly and easily. Its generous paper supply of 4,200 sheets can be boosted to a bountiful capacity of 7,700 sheets for virtually uninterrupted productivity.

True media flexibility is provided with the imageRUNNER C6800 via support for large paper sizes of up to 13" x 19" and heavy weights of up to 140 lb. Index. Additionally, the system can accommodate tab paper, transparencies, and irregular-size media—making the imageRUNNER C6800 a bona fide in-house solution!

The imageRUNNER C6800 offers several document output and finishing choices that are designed to handle the applications most common to high-volume departments. From simple collating to advanced multiposition stapling, hole-punching, and saddle-stitched booklet-making, the imageRUNNER C6800 can be configured to meet your entire document finishing needs.

Best of all, every finishing mode is accessible to every user for every job. Just one more way Canon technology helps you work smarter.

Image of a Leader

As the industry's leading producer of network-connected multifunction devices, Canon continues to set new standards for quality, performance, and reliability. That's why you can trust Canon to provide you with solutions to make your department more productive and your business more competitive.

imageRUNNER C6800 Specifications

Type:	Color Digital, Multifunction Imaging System
Imaging System:	Laser Dry Electrostatic Transfer
Developing System (B/W, Color):	Dry Monocomponent/Dual Component Toner Projection
Image Server Memory:	Standard 768MB RAM + 40GB HDD (Max. Capacity: Approximately 3,700 Originals)
First-copy Time:	5.3 Seconds (B/W) 12.2 Seconds (Color)
Warm-up Time:	9 Minutes or Less
Copy Speed (B/W, Color):	68/16 ppm (Letter)
Acceptable Originals:	Sheets, Books, 3-dimensional Items (Up to 4.4 lb.)
Max. Original Size:	11" x 17"
Max. Copy Size:	13" x 19"
Min. Copy Size:	4-1/8" x 5-7/8"
Max. Mail Boxes Supported:	100
Max. Copy Reservation:	5 Jobs
Copy/Scan Resolution:	600 dpi x 600 dpi
Engine Resolution:	2400 dpi x 600 dpi Interpolated
Print Resolution:	AE or Manual (Text, Photo, or Text and Photo)
Automatic Exposure:	
Halftones:	256 Gradations (Continuous-tone)
Duplexing:	Standard Automatic Trayless Duplexing
Magnification:	25% to 400% (in 1% Increments) from Glass
