

2006 MAGNUM

After more than thirty years, HEMI @ power is unleashed to the streets in the all-new 2006 Dodge Magnum.

With its innovative styling, performance and utility, you'll see that there's nothing else like it.

Check out the bold look and powerful performance of Magnum

POWER & PERFORMANCE

ALL-WHEEL DRIVE

Introducing a new spin on performance with less spin at the wheels. Magnum SXT and R/T feature an available all-wheel-drive system that greatly improves traction. A front differential and transfer case added to the standard rear-wheel drive layout deliver a 38/62 percent torque split between the front and rear wheels for the performance of rear-wheel-drive handling with the security of all-wheel-drive traction.

ALL-SPEED TRACTION

The available all-speed traction control operates both the brakes and the electronic throttle control (ETC), enhancing mobility and directional stability while preventing excessive wheel slip when accelerating on slippery surfaces.

TOWING

Magnum R/T, when equipped with the Trailer Tow Group, can tow trailers up to 3,800 pounds. Without the Trailer Tow Group, Magnum delivers up to 2,000 pounds of towing capacity when powered by the 3.5- or 5.7-liter engine. Magnum SE's 2.7-liter engine can tow up to 1,000 lbs. Maintaining a proper ride height is critical while towing or carrying heavy loads. R/T models with the Trailer Tow Group feature a self-leveling rear suspension that adjusts automatically to ensure a constant ride height, no matter what kind of load you're carrying. (Also available on SXT rear-wheel- and all-wheel-drive models.)

REAR-WHEEL DRIVE

Magnum marks the return of powerful rear-wheel drive performance to the Dodge line. Rear-wheel drive gives better traction for acceleration with high-performance engines, a near-50/50 weight distribution enhances vehicle balance, and a longer wheelbase means a smoother ride with even more interior room.

POWER

Magnum R/T's 5.7-liter HEMI® V8 engine with the Multiple-Displacement System (MDS) is a pure stroke of genius. By switching from eight cylinders to four during cruising and light acceleration, MDS improves fuel economy from 5 to 20 percent, depending on driving habits.

Magnum gives you a choice of three awe-inspiring engines: Magnum SE's 2.7-liter V6, Magnum SXT's high-output 3.5-liter V6, and, for the Magnum R/T, a 5.7-liter HEMI® V8 with the Multiple-Displacement System (MDS). With horsepower and torque ratings that most vehicles envy, all three deliver heart-stopping acceleration.

ELECTRONIC STABILITY PROGRAM

The available advanced electronic stability program (ESP)* helps maintain stability by monitoring such factors as steering angle, turning rate, and lateral acceleration to determine vehicle behavior. Once the system determines that vehicle behavior differs from the driver's intended course, ESP will do whatever can be done, within the limits of available traction, to keep the car on course. The brake assist feature can detect a driver's intended panic stop, and apply optimum brake pressure to help achieve minimum stopping distances.

* Always drive carefully, consistent with conditions. Always wear your seat belt and obey traffic laws.

SUSPENSION

A short- and long-arm (SLA) front suspension and five-link independent rear suspension system maintain independent control of each wheel

for excellent handling. An advanced suspension mounting system dramatically reduces road noise inside the passenger compartment. What this means to you is a smooth ride that is also quiet.

INSTRUMENT CLUSTER

From the black-on-white gauge display in the daytime to the comfortable blue-green glow of the digits in the evening, the engaging gauges on Magnum are easy to read any time of the day or night.

The available electronic vehicle information center (EVIC) is designed to provide valuable information to get you down the road. The steering wheel—mounted controls will let you navigate through such features as the UConnect™ hands-free communication system screen, the navigation system's turn-by-turn route guidance, trip computer, outside temperature, compass, and audio settings.

NAVIGATION SYSTEM

The available integrated DVD-based global positioning satellite system (GPS) with color display provides precise detail on where you are and where you're going. In fact, it will give you turn by turn-by-turn instructions so you'll never have to stop to ask for directions.

UCONNECTTM

The available Uconnect hands-free communication system is cool and convenient. All you need to do is set up any compatible Bluetooth™ hands-free wireless phone in Magnum, and the UConnect system automatically lowers the audio system volume and broadcasts the incoming call. A microphone in the rearview mirror takes your voice commands while you keep your hands on the wheel and your eyes on the road.

VERSATILE PERFORMER

For too many years you've had to choose between performance and versatility. If you needed a vehicle that could haul the kids to practice or haul lumber from the home improvement store, you had to give up on real, aggressive power. But with the 2006 Dodge Magnum you can kiss that compromise goodbye. In addition to great power, performance, and handling, Magnum is also versatile enough to handle everyday tasks.

Magnum lets you carry passengers and cargo—a whole lot of cargo. There's 27.2 cubic feet of cargo space behind the rear seats, which turns into 71.6 cubic feet with the rear seats folded down. This gives you the versatility to handle both workday projects and weekend fun.

The bilevel cargo floor includes a removable trifold upper divider and lower load floor to organize, store, and hide valuables. The lower load floor is also hinged for easy access to the spare tire, jack, and battery.

LIFTGATE

The unique forward-hinging liftgate opens up and away from you, allowing access to the rear cargo area without making you back out of the way. In fact, Magnum's unique rear cargo area enables you to load and unload large objects with ease.

* Properly secure all cargo.

PASSENGER PROTECTION

Even the most careful driver occasionally gets into unavoidable situations. When that happens, it's nice to know that the next-generation multistage front air bags standard on all models of Dodge Magnum will inflate according to the severity of the impact.†

And the supplemental air bags† available on all models offer additional side-impact protection to both front- and rear-seat passengers.

† Always wear a seat belt. Remember, a back seat is the safest place for children 12 and under.

^{• =} Included. P = Available within package noted. O = Optional.

⁽¹⁾Certified to the Federal Regulation for automatic passenger occupant classification. Always use seat belts. Children 12 and under should always be in a backseat correctly using an infant or child restraint system, or the seat belt positioned correctly for the child's age and weight.

⁽²⁷⁾ The OCS determines the conditions for activation or deactivation of the passenger-side front air bag based on the weight of the occupant. It may not activate the air bag if the occupant has incorrect seating posture or is moving in the seat. You should observe the air bag light to determine if the OCS is deciding properly. Passenger should sit properly in the front seat with the seat belt fastened at all times.

 $[\]ensuremath{^{(3)}}\mbox{Auxilliary input jacks are late availability.}$
