1:4 VGA Distribution Amplifier

The Kramer **VP-400** is a high performance 1:4 distribution amplifier for VGA signals. It accepts one input, provides correct buffering and isolation, and then distributes the signal to four identical outputs on high-density 15 pin D connectors. Unused outputs do not require special termination. Video bandwidth exceeding 345MHz ensures that the **VP-400** remains transparent even for high-resolution VGA modes like XGA. It is ideal for presentation systems requiring a local monitor and up to three projectors. A 12V power supply is included. The **VP-400** is part of the Kramer TOOLS family of compact, high quality, and cost effective solutions for a variety of applications.
