What's Included in the box

☐ CBR-980 Wireless N Broadband Router
☐ Quick Installation Guide
☐ Setup Software & User Manual on CD-ROM
☐ Power Adapter

# Quick Installation Guide

Step 1: Device Setup

Insert one end of the Ethernet cable to the LAN port and the other end to your PC. Connect power adapter to the Router's Power jack, and plug the other end into an electrical outlet.
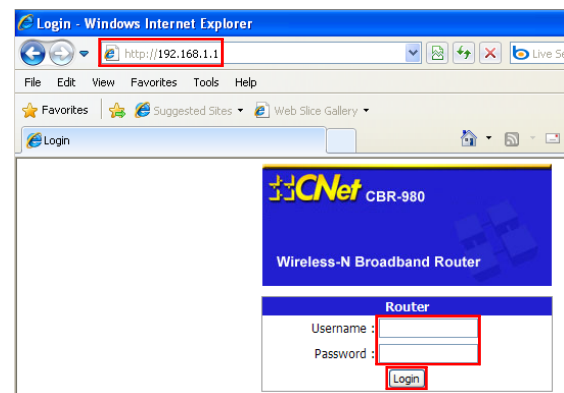

1. Connect Ethernet cable

2. Connect Power

Electrical Outlet
AC 100-240

Power Adapter

Step 2: Login

On your PC or laptop, open web browser and type *http://192.168.1.1* into the Address bar. Press **Enter**.

When login screen appears, type **admin** for both Username & Password. Click **Login** button to continue.
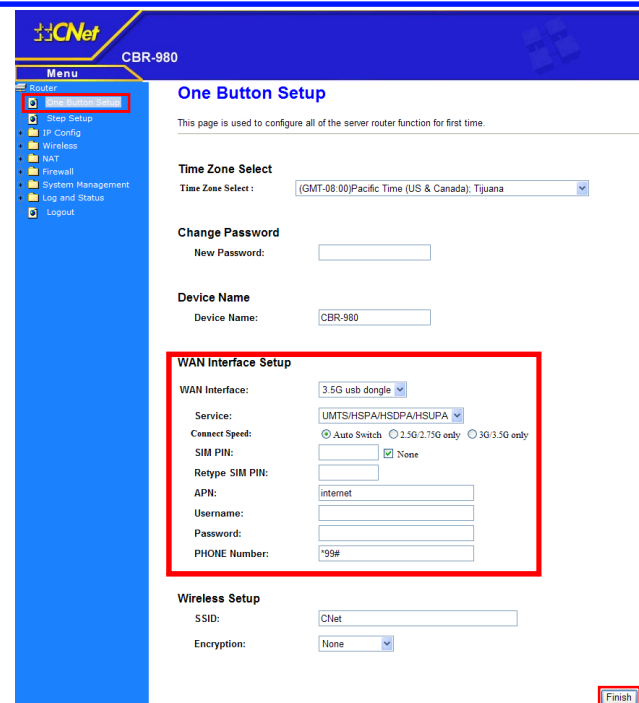

Step 3: Connect to the Internet

Through 3.5G USB Modem

Click on **One Button Setup** from the left navigation pane.

Insert your 3.5G USB Modem into the USB port. Select **3.5G usb dongle** in WAN interface drop-down menu. Fill in information provided by your 3G service provider. Click **Finish** button to finish setup process. The router will be restarted shortly. Once the *login page* shows up, you are ready to surf the Internet!

Note: APN & Phone Number are required. User Name & Password can be optional. The common APN name is *internet* and the phone number is **99#*.

Connect to the Internet through 3.5G USB Modem

Through xDSL Modem - PPPoE

Click on **One Button Setup** from the left navigation pane.

Connect one end of the Ethernet cable to the WAN port of CBR-980, and another end to the Ethernet port of xDSL modem. Select *Ethernet Port* in **WAN interface** drop-down menu and *PPPoE* in **WAN Access Type** drop-down menu. Fill in the user name and password provided by your xDSL service provider. Click **Finsih** button to finish setup process. The router will be restarted shortly. Once the *login page* shows up, you are ready to surf the Internet!

Connect to the Internet through xDSL Modem

USB Modem Does Not Work With the Router

If your USB modem is not working with the router. Check the support list to ensure you are using a supported device. CNet's supported device list changes regularly. We update our supported device list after a device is approved. If the device you have is not on the list, that means we do not support it at this time. The supported device list can be found at: http://www.cnet.com.tw

If you are still unable to access the Internet after following above instructions. Please consult the User Manual or contact CNet Technical Support for further assistance.

How to Restore the Default Password and Configuration Settings

1. Use a sharp object such as a pen or a paper clip to press and hold the Reset button, located on the rear panel of the router next to the power jack, for about 10 seconds, until the STATUS light goes off.
2. Release the Reset button, and wait for the router to restart, and for the Power light to stop blinking and become solid green.
   The factory default settings will be restored and the router's IP address will be reset to 192.168.1.1, user name to **admin**, and password to **admin.**

## Technical Information
