WARRANTY

ONE YEAR FULL WARRANTY ON CRAFTSMAN TOOL

If this Craftsman tool fails to give complete satisfaction within one year from date of purchase, **RETURN IT TO THE NEAREST SEARS STORE IN THE UNITED STATES**, and Sears will replace it, free of charge.

If this Craftsman tool is used for commercial or rental purposes, this warranty applies for only 90 days from the date of purchase.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Sears, Roebuck and Co., Dept. 817 WA, Hoffman Estates, IL 60179

INTRODUCTION

This worklight has many features for making its use more pleasant and enjoyable. Safety, performance, and dependability have been given top priority in the design of this product making it easy to maintain and operate.

GENERAL SAFETY RULES

⚠ WARNING! READ AND UNDERSTAND ALL INSTRUCTIONS. Failure to follow all instructions listed below, may result in electric shock, fire and/or serious personal injury.

READ ALL INSTRUCTIONS

- **Know your worklight.** Read operator's manual carefully. Learn its applications and limitations as well as the specific potential hazards related to this light.
- **Use only recommended battery pack with your worklight.** Any attempt to use another battery pack will cause damage to your worklight and could possibly explode, cause a fire, or personal injury.

- **Use battery only with charger listed.**

MODEL	BATTERY PACK	CHARGER
315.114073	130279003	Model No.1425301
	130279005	(Item No. 911041)
	(Item No. 911375)	Model No. 315.115730
		(Item No. 140301003)
		Model No. 315.115720
		(Item No. 140301001)

- **Remove battery pack from worklight before replacing bulb or performing any routine maintenance or cleaning.**
- **Do not disassemble your worklight.**
- **Do not place worklight or battery pack near fire or heat.** They may explode. Also, **do not** dispose of a worn out battery pack by incinerating. Do not incinerate the battery, even if it is severely damaged or completely worn out. The battery may explode in fire.
- **Do not store your worklight in a damp or wet location. Do not store in locations where the temperature is less than 50°F or more than 100°F.** Do not store in outside sheds or in vehicles.
- **Do not permit children to use worklight unsupervised.** It is not a toy. The temperature of the bulb will become hot after being on for only a short period of time. This hot temperature can cause burn injury if touched and can create sufficient heat to melt some fabrics.
- **If wrapped or in contact with fabrics, the worklight lens can produce sufficient heat to melt some fabrics.** To avoid serious personal injury, never allow the worklight lens to come in contact with anything.
- **Keep work area clean.** Cluttered areas and benches invite accidents.

- **Avoid dangerous environments.**
- **Keep light dry, clean, and free from oil and grease.** Always use a clean cloth when cleaning. Never use brake fluids, gasoline, petroleum-based products or any strong solvent to clean your worklight.
- **Stay alert.** Watch what you are doing and use common sense. Do not rush.
- **Check damaged parts.** Before further use of this worklight, a part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function. Do not use worklight if it does not function properly.
- **Don't expose worklight to rain.** Water entering a power tool will increase the risk of electric shock or malfunction.
- **Stay alert, watch what you are doing and use common sense when operating a worklight. Do not use tool while tired or under the influence of drugs, alcohol, or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- **Do not overreach. Keep proper footing and balance at all times.** Proper footing and balance enable better control of the tool in unexpected situations. Do not use on a ladder or unstable support.

WORKLIGHT USE AND CARE

- **Check for alignment of moving parts, binding of moving parts, mounting, and any other conditions that may affect its operation. A part that is damaged should be properly repaired or replaced by an authorized service center.** Following this rule will reduce the risk of shock, fire, or serious injury.
- **Store worklight out of the reach of children and other untrained persons.** Tools are dangerous in the hands of untrained users.

SERVICE

- **Tool service must be performed only by qualified repair personnel.** Service or maintenance performed by unqualified personnel may result in a risk of injury.
- **When servicing a tool, use only identical replacement parts. Follow instructions in the Maintenance section of this manual.** Use of unauthorized parts or failure to follow Maintenance Instructions may create a risk of shock or injury.

SPECIFIC SAFETY RULES

- **Do not operate worklight or charger near flammable liquids or in gaseous or explosive atmospheres.** Internal sparks may ignite fumes.
- **Lens and bulb become hot during use:**
 - During or immediately after use, don't lay worklight flat on lens surface or place lens area in contact with a plastic or fabric covered surface.
 - Handle worklight with care around any flammable surface.
 - Let worklight cool for several minutes after use before changing bulb.
 - Do not use or permit use of worklight in bed or sleeping bags. This worklight lens can melt fabric and a burn injury could result.

SAFETY RULES FOR BATTERY WORKLIGHTS

- **Use only the charger recommended for use with your worklight.** Do not substitute any other charger. Use of another charger could cause batteries to explode causing possible serious injury.
- **Your battery tool should be charged in a location where the temperature is more than 50°F but less than 100°F.**
- **Under extreme usage or temperature conditions, battery leakage may occur.** If liquid comes in contact with your skin, wash immediately with soap and water, then neutralize with lemon juice or vinegar. If liquid gets in your eyes, flush them with clean water for at least 10 minutes, then seek immediate medical attention.
- **Batteries vent hydrogen gas and can explode in the presence of a source of ignition, such as a pilot light.** To reduce the risk of serious personal injury, never use any cordless product in the presence of open flame. An exploded battery can propel debris and chemicals. If exposed, flush with water immediately.
- **Never use a battery pack that has been damaged or received a sharp blow.** A damaged battery pack is subject to explosion. Properly dispose of a damaged battery pack immediately. Failure to heed this warning can result in serious personal injury.
- **When servicing, use only identical replacement parts.**

SAFETY RULES FOR CHARGER

⚠ WARNING! READ AND UNDERSTAND ALL INSTRUCTIONS. Failure to follow all instructions listed below, may result in electric shock, fire and/or serious personal injury.

■ **Before using battery charger,** read all instructions and cautionary markings in this manual, on battery charger, battery, and product using battery to prevent misuse of the products and possible injury or damage.

⚠ CAUTION: To reduce the risk of electric shock or damage to the charger and battery, charge only nickel-cadmium rechargeable batteries as specifically designated on your charger. Other types of batteries may burst, causing personal injury or damage.

■ **Do not use charger outdoors or expose to wet or damp conditions.** Water entering charger will increase the risk of electric shock.

■ **Use of an attachment not recommended or sold by the battery charger manufacturer may result in a risk of fire, electric shock, or injury to persons.** Following this rule will reduce the risk of electric shock, fire, or serious personal injury.

■ **Do not abuse cord or charger.** Never use the cord to carry the charger. Do not pull the charger cord rather than the plug when disconnecting from receptacle. Damage to the cord or charger could occur and create an electric shock hazard. Replace damaged cords immediately.

■ **Make sure cord is located so that it will not be stepped on, tripped over, come in contact with sharp edges or moving parts or otherwise subjected to damage or stress.** This will reduce the risk of accidental falls, which could cause injury, and damage to the cord, which could result in electric shock.

■ **Keep cord and charger from heat to prevent damage to housing or internal parts.**

■ **Do not let gasoline, oils, petroleum-based products, etc. come in contact with plastic parts.** They contain chemicals that can damage, weaken, or destroy plastic.

■ **An extension cord should not be used unless absolutely necessary.** Use of improper extension cord could result in a risk of fire and electric shock. If extension cord must be used, make sure:

- That pins on plug of extension cord are the same number, size and shape as those of plug on charger.
- That extension cord is properly wired and in good electrical condition; and
- That wire size is large enough for AC ampere rating of charger as specified below:

Cord Length (Feet)	25'	50'	100'
Cord Size (AWG)	16	16	16

NOTE: AWG = American Wire Gauge

■ **Do not operate charger with a damaged cord or plug,** which could cause shorting and electric shock. If damaged, have the charger replaced by an authorized serviceman.

■ **Do not operate charger if it has received a sharp blow, been dropped, or otherwise damaged in any way.** Take it to an authorized serviceman for electrical check to determine if the charger is in good working order.

■ **Do not disassemble charger.** Take it to an authorized serviceman when service or repair is required. Incorrect reassembly may result in a risk of electric shock or fire.

■ **Unplug charger from outlet before attempting any maintenance or cleaning to reduce the risk of electric shock.**

■ **Disconnect charger from the power supply when not in use.** This will reduce the risk of electric shock or damage to the charger if metal items should fall into the opening. It also will help prevent damage to the charger during a power surge.

■ **Risk of electric shock.** Do not touch uninsulated portion of output connector or uninsulated battery terminal.

■ **Save these instructions.** Refer to them frequently and use them to instruct others who may use this worklight. If you loan someone this worklight, loan them these instructions also to prevent misuse of the product and possible injury.

SYMBOLS

Some of the following symbols may be used on this worklight. Please study them and learn their meaning. Proper interpretation of these symbols will allow you to operate the tool better and safer.

SYMBOL	NAME	DESIGNATION/EXPLANATION
V	Volts	Voltage
A	Amperes	Current
Hz	Hertz	Frequency (cycles per second)
W	Watt	Power
min	Minutes	Time
~	Alternating Current	Type of current
≡	Direct Current	Type or a characteristic of current
n_0	No Load Speed	Rotational speed, at no load
	Class II Construction	Double-insulated construction
.../min	Per Minute	Revolutions, strokes, surface speed, orbits etc., per minute
	Wet Conditions Alert	Do not expose to rain or use in damp locations.
	Read The Operator's Manual	To reduce the risk of injury, user must read and understand operator's manual before using this product.
	Eye Protection	Always wear safety goggles or safety glasses with side shields and a full face shield when operating this product.
	Safety Alert	Precautions that involve your safety.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	Hot Surface	To reduce the risk of injury or damage, avoid contact with any hot surface.

SYMBOLS

The following signal words and meanings are intended to explain the levels of risk associated with this product.

SYMBOL	SIGNAL	MEANING
	DANGER:	Indicates an imminently hazardous situation, which, if not avoided, will result in death or serious injury.
	WARNING:	Indicates a potentially hazardous situation, which, if not avoided, could result in death or serious injury.
	CAUTION:	Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury.
	CAUTION:	(Without Safety Alert Symbol) Indicates a situation that may result in property damage.

SERVICE

Servicing requires extreme care and knowledge and should be performed only by a qualified service technician. For service we suggest you return the product to your nearest **AUTHORIZED SERVICE CENTER** for repair. When servicing, use only identical replacement parts.

WARNING: To avoid serious personal injury, do not attempt to use this product until you read thoroughly and understand completely the operator's manual. Save this operator's manual and review frequently for continuing safe operation and instructing others who may use this product.

WARNING:

The operation of any power tool can result in foreign objects being thrown into your eyes, which can result in severe eye damage. Before beginning power tool operation, always wear safety goggles or safety glasses with side shields, or a full face shield when needed. We recommend Wide Vision Safety Mask for use over eyeglasses or standard safety glasses with side shields. Always use eye protection which is marked to comply with ANSI Z87.1.

KNOW YOUR WORKLIGHT

See Figure 1.

Before attempting to use this product, familiarize yourself with all operating features and safety rules.

HANGING/STORAGE HOOK

The hanging/storage hook is useful for storing the light when not in use and keeping it out of the reach of children.

ASSEMBLY

UNPACKING

This product has been shipped completely assembled.

- Carefully remove the worklight and any accessories from the box. Make sure that all items listed in the packing list are included.
- Inspect the worklight carefully to make sure no breakage or damage occurred during shipping.
- Do not discard the packing material until you have carefully inspected and satisfactorily operated the worklight.
- If any parts are damaged or missing, please call 1-800-932-3188 for assistance.

PACKING LIST

19.2 Volt Fluorescent Light
Operator's Manual

WARNING: If any parts are missing do not operate this worklight until the missing parts are replaced. Failure to do so could result in possible serious personal injury.

WARNING: Do not attempt to modify this worklight or create accessories not recommended for use with this worklight. Any such alteration or modification is misuse and could result in a hazardous condition leading to possible serious personal injury.

WARNING: Always remove the battery pack from the worklight when assembling parts or changing light bulb. Failure to do so could result in possible serious personal injury.

⚠ WARNING: Do not allow familiarity with worklights to make you careless. Remember that a careless fraction of a second is sufficient to inflict serious injury.

⚠ WARNING: Do not use any attachments or accessories not recommended by the manufacturer of this worklight. The use of attachments or accessories not recommended can result in serious personal injury.

CAUTION: If at any point during the charging process none of the LEDs are lit, remove the battery pack from the charger to avoid damaging the product. DO NOT insert another battery. Return the charger and battery to your nearest service center for service or replacement.

LED FUNCTIONS OF CHARGER

LED WILL BE ON TO INDICATE STATUS OF CHARGER AND BATTERY PACK:

- Red LED on = Fast charging mode.
- Green LED on = Fully charged and in maintenance charge mode.
- Green LED on = When battery pack is inserted into charger, indicates hot battery pack or that battery pack is out of normal temperature range.
- Yellow and Green LEDs on = Deeply discharged or defective battery pack.
- No LED on = Defective charger or battery pack.

CHARGING THE BATTERY PACK

The battery pack for this worklight has been shipped in a low charge condition to prevent possible problems. Therefore, you should charge it until the green LED on the front of the charger comes on.

NOTE: Batteries will not reach full charge the first time they are charged. Allow several cycles (operation followed by recharging) for them to become fully charged.

CHARGING A COOL BATTERY PACK

If battery pack is below normal temperature range, the green LED on charger will come on. Allow battery pack to reach normal temperature, then the red LED will come on.

NOTE: If the charger does not charge the battery pack under normal circumstances, return both the battery pack and charger to your nearest Sears Repair Center for electrical check.

- Charge the battery pack only with the charger provided.
- Make sure the power supply is normal household voltage, **120 volts, 60 Hz, AC only**.
- Connect the charger to the power supply.

■ Place the battery pack in the charger aligning raised rib on the battery pack with the groove in the charger. See *Figure 2*.

■ Press down on the battery pack to be sure contacts on the battery pack engage properly with contacts in the charger.

■ Normally the red LED on charger will come on. This indicates the charger is in fast charging mode.

■ Red LED should remain on for approximately 1 hour then the green LED will come on. Green LED on indicates battery pack is fully charged and charger is in maintenance charge mode.

NOTE: The green LED will remain on until the battery pack is removed from the charger or charger is disconnected from the power supply.

■ If both yellow and green LEDs come on, this indicates a deeply discharged or defective battery pack. Allow the battery pack to remain in the charger for 15 to 30 minutes. When the battery pack reaches normal voltage range, the red LED should come on. If the red LED does not come on after 30 minutes, this may indicate a defective battery pack and should be replaced.

■ After normal usage, a minimum of 1 hour of charging time is required to fully recharge battery pack.

■ The battery pack will become slightly warm to the touch while charging. This is normal and does not indicate a problem.

■ Do not place the charger and battery pack in an area of extreme heat or cold. They will work best at normal room temperature.

NOTE: The charger and battery pack should be placed in a location where the temperature is more than 50°F but less than 100°F.

■ When batteries become fully charged, unplug the charger from power supply and remove the battery pack.

BATTERY PACK SHOWN IN CHARGER

Fig. 2

CHARGING A HOT BATTERY PACK

When using the worklight continuously, the batteries in the battery pack will become hot. You should let a hot battery pack cool down for approximately 30 minutes before attempting to recharge. When the battery pack becomes discharged and is hot, this will cause the green LED to come on instead of the red LED. After 30 minutes, reinsert the battery pack in the charger. If the green LED continues to remain on, return battery pack to your nearest Sears Repair Center for checking or replacing.

NOTE: This situation only occurs when continuous use of the worklight causes the batteries to become hot. It does not occur under normal circumstances. Refer to “CHARGING A COOL BATTERY PACK” for normal recharging of batteries. If the charger does not charge your battery pack under normal circumstances, return both the battery pack and charger to your nearest Sears Repair Center for electrical check.

TO INSTALL/REMOVE BATTERY PACK

See Figure 3.

TO INSTALL:

- Place the battery pack in your worklight, aligning raised rib on battery pack with groove in worklight's battery port.
- Make sure the latches on each side of the battery pack snap into place and battery pack is secured to worklight before beginning operation.

TO REMOVE:

- Locate latches on side of battery pack and depress both sides to release battery pack from your worklight.
- Remove battery pack from your worklight.

CAUTION: When placing battery pack in the tool, be sure raised rib on battery pack aligns with the bottom of the drill and latches into place properly. Improper installation of the battery pack can cause damage to internal components.

Fig. 3

OPERATION

SWITCH TRIGGER

See Figure 4.

To turn the light on and off, depress the switch trigger.

Fig. 4

HANGING/STORAGE HOOK

See Figure 5.

On top of the housing is a hook which you can use to hang the light. This is good for storing the light when not in use and keeping the light out of the reach of children. To use, simply lift up on the hook.

Fig. 5

MAINTENANCE

⚠ WARNING: When servicing, use only identical Craftsman replacement parts. Use of any other part may create a hazard or cause product damage.

⚠ WARNING: Always wear safety goggles or safety glasses with side shields when using compressed air to clean worklights. If the operation is dusty, also wear a dust mask.

⚠ WARNING: To avoid serious personal injury, always remove the battery pack from the worklight when cleaning or performing any maintenance.

⚠ WARNING: Do not at any time let brake fluids, gasoline, petroleum-based products, penetrating oils, etc. come in contact with plastic parts. Chemicals can damage, weaken or destroy plastic which may result in serious personal injury.

Only the parts shown in the parts list are intended to be repaired or replaced by the customer. All other parts should be replaced at a Sears Service Center.

GENERAL MAINTENANCE

Avoid using solvents when cleaning plastic parts. Most plastics are susceptible to damage from various types of commercial solvents and may be damaged by their use. Use clean cloths to remove dirt, dust, oil, grease, etc.

MAINTENANCE

⚠ WARNING: Lens and bulb become hot during use. Let worklight cool for several minutes after use before changing bulb to prevent possibility of a burn injury.

FLUORESCENT TUBE REPLACEMENT

See Figure 6.

When purchasing replacement fluorescent tube, request replacement part number 7819602.

TO REPLACE FLUORESCENT TUBE:

- Remove the battery pack from the worklight.
- Remove the screw to release the lens cover. Remove the lens cover by pulling the cover forward and lifting it from the housing.
- To remove the old fluorescent tube from the spring, gently grasp the lower edge of the rubber cushion and the sides of the bulb. Carefully work the tube in a
- side-to-side motion while easing the tube forward and up until the tube is free from the spring. Do not pull the fluorescent tube straight out from its center, as this increases the chance of breakage. Remove the rubber cushion from the old fluorescent tube and place it on top of the new tube, rounded edge facing outward.
- Insert the new fluorescent tube into the spring by aligning the prongs on the tube with the holes in the tube socket area. Gently push down on the base of the new tube until fully engaged. Do not force the tube into place.
- Replace the lens cover by sliding the lower edge into the housing. Align the screw holes at top. With a screwdriver, tighten the screw. Do not use a drill to tighten the screw, as the drill's torque may be strong enough to damage the lens cover.
- Replace the battery pack.

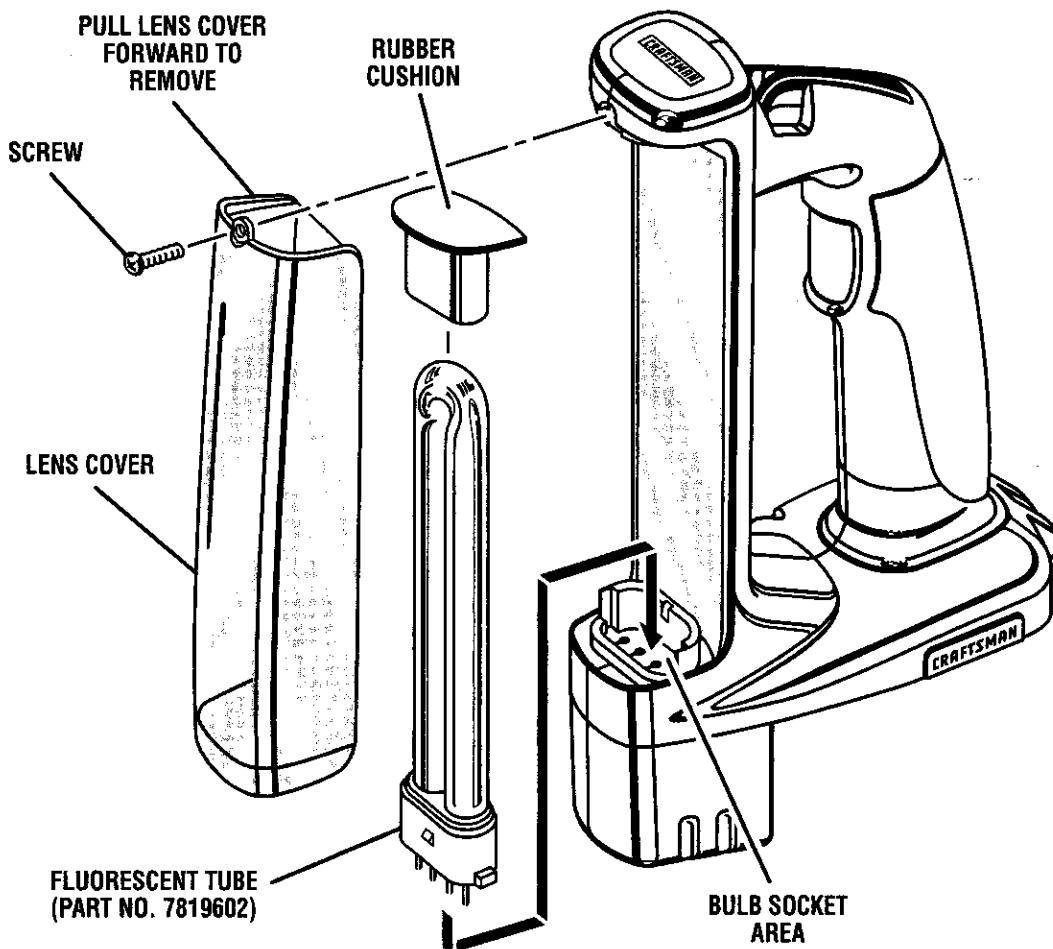

Fig. 6

BATTERIES

The battery pack for this worklight is equipped with nickel-cadmium rechargeable batteries. Length of service from each charging will depend on the type of work you are doing.

The batteries in this worklight have been designed to provide maximum trouble-free life. However, like all batteries, they will eventually wear out. **Do not** disassemble battery pack and attempt to replace the batteries. Handling of these batteries, especially when wearing rings and jewelry, could result in a serious burn.

To obtain the longest possible battery life, we suggest the following:

- Remove the battery pack from the charger once it is fully charged and ready for use.

For battery storage longer than 30 days:

- Store the battery pack where the temperature is below 80°F.
- Store battery packs in a "discharged" condition.

BATTERY PACK REMOVAL AND PREPARATION FOR RECYCLING

To preserve natural resources, please recycle or dispose of batteries properly.

This product contains nickel-cadmium batteries. Local, state or federal laws may prohibit disposal of nickel-cadmium batteries in ordinary trash.

Consult your local waste authority for information regarding available recycling and/or disposal options.

⚠ WARNING: Upon removal, cover the battery pack's terminals with heavy-duty adhesive tape. Do not attempt to destroy or disassemble battery pack or remove any of its components. Nickel-cadmium batteries must be recycled or disposed of properly. Also, never touch both terminals with metal objects and/or body parts as short circuit may result. Keep away from children. Failure to comply with these warnings could result in fire and/or serious injury.
