* Bare minimum spacing to allow for ventilation and avoid scraping on DWD, ERWD, EWD, MRWD, MWDH, MWDV and RWDV series models.

** On IWD series models or OWD24 without the optional front panel kit: The chassis and the drawer faceplate are smaller than the cutout. The custom front panel mounts to the drawer faceplate. The height and width of the custom front panel must exceed the appropriate cutout dimensions (A and C above) to cover the hole. Allow 1/4" minimum additional space on the top, bottom and sides from the custom front panel edge to prevent scraping against adjacent doors, drawers and the countertop.

*** OWD24 with optional factory front panel kit only. Bare minimum spacing shown to avoid scraping. Gap above and below cutout is 3/4" minimum. See ** above for OWD24 with custom front panel.

**** Model EWD36 cannot be installed above or below another warming drawer (any type).

***** Model OWD24 cannot be installed above, below or adjacent to a wall oven or warming drawer (any type).
