**Mechanical Installation:**

DS8100A-3002 can be installed to operate in any position. There are 16 screw holes (M6 X 8) on the sides of the scanner for mounting. The following diagrams give the overall dimensions of the reader standard model and mounting bracket. They may be used for their installation:

**WARNING**

*When installing several scanners, take care to position them correctly so that no laser beam enters the reading window perpendicularly and at the same level of the output beam of the other scanners. This condition could occur more frequently for side mounted applications. If these precautions are not followed, it may occur that the laser of the blinded scanner starts blinking due to an internal circuit which temporarily turns the laser off when detecting a power anomaly. To resolve this problem, it is sufficient to slightly change the inclination and position of one of the two scanners involved.*

**Reading Diagrams:**

**Note:** (0,0) is the center of the laser beam output window.

- ① Laser Safety Label
- ② Warning and Device Class Label
- ③ Identification Label

The scanner is classified as a Class 2 laser product according to EN60825-1 regulations and as a Class II laser product according to CDRH regulations.

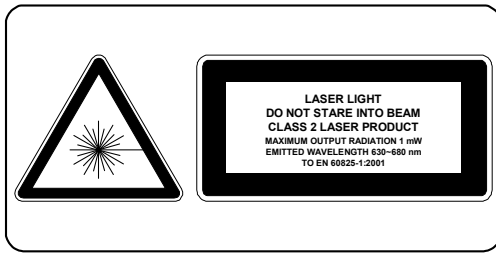

Disconnect the power supply when opening the device during maintenance or installation to avoid exposure to hazardous laser light.

There is a safety device, which allows the laser to be switched on only if the motor is rotating above the threshold for its correct scanning speed.

The laser beam can be switched off through a software command (see also the Genius™ Help On-Line).

**Laser Safety Label**

**Warning and Device Class Label**

**Device Identification Label**

The laser diodes used in this device are classified as Class 3B laser products according to EN 60825-1 regulations and as Class IIIb laser products according to CDRH regulations. Any violation of the optic parts in particular can cause radiation up to the maximum level of the laser diode (30 mW at 630~680 nm).

**Power Supply**

**This product is intended to be installed by Qualified Personnel only.**

This scanner is intended to be supplied by either a UL Listed power supply marked 'Class 2' or 'LPS', output rated 20 - 30 V dc, minimum 1.5 A or by a UL Listed computer with LPS outputs.

DS8100A-3002 must be supplied by a Class II Power Supply Unit conforming to the EN 60950 safety regulation.
