## Remote Control Signals: UHF or IR About the Remote Control

The remote control gives you easy access to all the features of a DISH Network ${ }^{\mathrm{TM}}$ satellite TV system. You can set up the remote to control up to three devices other than the satellite TV receiver. The three devices may include a TV, a VCR, a DVD player, a cable TV box, a tuner, or an audio amplifier.

## Remote Control Signals: UHF or IR

- The remote control uses Ultra-High Frequency (UHF) radio signals to control the satellite TV receiver. UHF signals travel long distances ( 100 feet or more) and go through walls and other solid objects. Because UHF signals travel so far, the receiver may respond to signals from other nearby remote controls. To handle this problem, see Changing the Remote Control Address on page16. If this does not work, see Installing an Attenuator on page 17.
- To use the remote to control the receiver, you must attach the UHF antenna to the receiver back panel UHF Remote Antenna connection.
Note: To be able to use the remote control over the longest possible distance, place the antenna straight up. Do not let the antenna touch anything.

- The remote control uses Infra-Red (IR) light signals to control devices other than the receiver. IR signals travel only short distances ( 40 feet or less), and cannot go through walls or other solid objects. You must point the remote control directly at the device, with no objects blocking the line of sight.

## Installing Batteries in the Remote Control

Installing Batteries in the Remote Control

The remote control comes with AAA batteries, packaged separately. When you replace old batteries, you should replace all of the batteries. Use batteries of the same grade, for example, alkaline or carbon zinc, and do not mix batteries of different grades. Alkaline batteries provide longer battery life.

1. Press down on the slot in the battery cover (on the back of the remote control) and slide the cover off.
2. Insert the new batteries, making sure to match the plus ("+") ends with the plus markings on the battery case.

3. Replace the battery cover by sliding the cover back up into place.

## Remote Control Modes

To use the remote to control a device such as the satellite receiver or a TV, you must first set up the remote to control the device, and then set the remote to the right mode for that device.

1. Set up the remote to control the device. See Controlling a Device on pag e15 for instructions.
2. Use the remote control mode buttons, SAT (satellite receiver), TV, VCR (for a VCR or a DVD player), and AUX ("auxiliary," for a cable TV box, a tuner, or an audio amplifier) to set the remote to the right mode for the device. To change the mode setting, press the button for the device that you want the remote to control. The mode button's back light turns ON to show that the remote is set to that mode.

v

The following sections describe how to use the remote control buttons. Each section describes only the buttons that work in one remote control mode, for example SAT mode or TV mode.

# SAT (Satellite Receiver) Mode Using the Remote Control Buttons <br> <br> SAT (Satellite Receiver) Mode 

 <br> <br> SAT (Satellite Receiver) Mode}

| ATTENTION! | Some of the features described below may not <br> apply to your satellite receiver. See the receiver <br> User Guide for details about the receiver's features. <br> If a remote control button is not described in this <br> section, it does not work in SAT mode. |
| :--- | :--- |

## SAT Mode Button

The remote control already is set up to control the satellite receiver. But, you must press the SAT mode button to set the remote to SAT mode. The SAT mode button's back light turns ON to show that the remote is set to SAT mode. Make sure to keep the remote in SAT mode to use the buttons as described in this section.

## AUX Mode Button

Set up the remote to control the television and do not setup the remote in AUX mode. If you do this, then with the remote in SAT mode you can press the AUX mode button to turn the television ON or OFF. This allows you to turn the TV on or off without leaving SAT mode.

## TV/VIDEO

TV/Video Button
If you connect the receiver using only its back panel RF or VHF connections, use this button to switch the receiver between the satellite signal (routed into the receiver's Satellite $\mathbf{I n}$ input) and another video signal such as cable or broadcast TV antenna input (routed into the receiver's TV Antenna Cable In input).

## Menu Button

Press this button to open the Main Menu.

## Power Button

Press this button to turn the receiver ON or OFF. The green Power light on the receiver front panel lights up to show that the receiver is ON , and goes out to show that the receiver is OFF.

Press the Page Up button or the Page Down button to scan, page by page, through the Program Guide, a Themes menu, a Favorite List, an Event Timers list, or a list of channels.

## Mute Button

Press this button to turn off the sound. Press it again to restore the sound.

## Volume Button

Press the left-hand, minus (-) side of this button to lower the sound volume. Press the right-hand, plus (+) side of this button to raise the sound volume.
 Guide Button

Press this button to open the Program Guide. When the Program Guide is open, press this button to switch among Favorite Lists.

## Select Button

Press this button to select a highlighted option or program in a menu.

## Up/Down/Left/Right (ARROW) Buttons

- When using a menu, press these buttons to move the highlight to an option.
- When watching a program, press the Right button to open the Browse Banner or the Up or Down button to change channels.
- When the Browse Banner is open, press the Up or Down button to see the Browse Banner for the next channel.
- When a menu offers a list of choices (different from menu options), press the Up or Down button to see more choices.
- When the Program Guide is open, press these buttons to move the highlight among the programs.
- To enter a number in a menu, highlight the place where you need to enter the number. Then, press the Up or Down button to increase or decrease the number in the highlighted field. Or, you may use the Number Buttons.
- When the Browse Banner is open, press the Right or Left button to display the current program or the next program on a channel.
- When watching a program, press the Left button to open the Themes menu.

## Recall Button

Press this button to return to the last channel you were watching. Press it again to switch between the last two channels that you watched.

SAT (Satellite Receiver) Mode

Information (InFo) Button

- Press this button for more information when the Program Guide or the Browse Banner is open, or when watching a program.
- When a menu is open that includes aHelp option, press this button to see help information for that menu.
- Highlight a program in a Themes list and then press this button for more information on that program.
- When the receiver is OFF, press this button to display the Important System Information menu.
- Press this button to return to watching a program.
- If you are watching a program, press this button to briefly display the Program Banner.
- While using any menu, press this button to cancel a procedure and return to watching a program.

## Cancel Button

Press this button to cancel a procedure and to return to the previous menu or to watching a program.
sys info SYSTEM InFORMATION (SYS INFO) Button
Press this button to display the Important System Information menu.

## TV (Television) Mode

(0) Number Buttons

- When watching a program or with the Program Guide open, use these buttons to enter a channel number to change to that channel.
- When the Program Guide is open, enter a number of hours using these buttons, and then press the Right or Left arrow button to skip the display backward or forward by that number of hours.
- Use these buttons to enter menu option numbers. For an option that has a number, you may do this instead of highlighting the option and then pressing the Select button.
- Use these buttons to enter numbers in a menu. To do this, first highlight the place where you need to enter the number. Next, press a number button (or, you can use the Up/Down arrow buttons to enter the number). Then, move the highlight to the place for the next number that you need to enter, or press the Select button if you are done entering numbers.

## Pound Button

Use this button in Changing the Remote Control Address on mag e16.

## TV (Television) Mode

| ATTENTION! | Some of the features described below may not <br> apply to the TV. See your TV owner's manual <br> for details about the TV's features. If a remote <br> control button is not described in this section, it <br> does not work in TV mode. |
| :--- | :--- |

To use the remote to operate a television, you must first set up the remote to control the television. See Controlling a Device on page 15. Then, you must press the TV mode button to set the remote to TV mode. The TV mode button's back light turns ON to show that the remote is set to TV mode. Make sure to keep the remote in TV mode to use the buttons as described in this section.

## TV/VIDEO

## TV/Video Button

If the TV has video input options, use this button to switch the TV among those options.

## Power Button

Press this button to turn the television ON or OFF.

## mute Button

Press this button to turn off the sound. Press it again to restore the sound.

## Volume Button

Press the left-hand, minus (-) side of this button to lower the sound volume. Press the right-hand, plus (+) side of this button to raise the sound volume.

## Select Button

The Select button works as the Enter button for a TV.

## VCR (VideoCassette Recorder) Mode

## Up/Down (Arrow) Buttons

Use the Up/Down arrow buttons to change channels on the TV.

## Recall Button

Press this button to return to the last channel you were watching. Press it again to switch between the last two channels that you watched.

(4) (5) (6)
(7) (8) (9)
(0) Number Buttons

Use these buttons to enter numbers in a menu.

## VCR (VideoCassette Recorder) Mode

| ATTENTION! | Some of the features described below may not <br> apply to the VCR. See your VCR owner's manual <br> for details about the VCR's features. If a remote <br> control button is not described in this section, <br> it does not work in VCR mode. |
| :--- | :--- |

## VCR Mode Button

To use the remote to operate a VCR, you must first set up the remote to control the VCR. See Controlling a Device on pag e15. Then, you must press the VCR mode button to set the remote to VCR mode.
The VCR mode button's back light turns ON to show that the remote is set to VCR mode. Make sure to keep the remote in VCR mode to use the buttons as described in this section.

## VCR (VideoCassette Recorder) Mode

| ATTENTION: | You must set the remote control to VCR mode <br> to set it up to control a DVD player. You must set <br> the remote control to VCR mode to use it to control <br> a DVD player. |
| :--- | :--- |

## Mute Button

Press this button to turn off the sound. Press it again to restore the sound.

## Volume Button

Press the left-hand, minus (-) side of this button to lower the sound volume. Press the right-hand, plus ( + ) side of this button to raise the sound volume.

## Select Button

The Select button works as the Play button. Press this button to play or to resume playing a videotape.

- The Up arrow button works as the Stop button.

Press this button to stop a videotape.

- The Down arrow button works as the Pause button.

Press this button to pause a videotape. Press this button or the Select button (Play) to restart the tape.

- The Left arrow button works as the Rewind button.

Press this button to rewind a videotape.

- The Right arrow button works as the Fast Forward button. Press this button to forward a videotape.

## AUX (Auxiliary) Mode for Cable TV Box

(0) Number Buttons

Use these buttons to enter numbers in a menu.

## AUX (Auxiliary) Mode for Cable TV Box

| ATTENTION! | Some of the features described below may not <br> apply to the cable TV box. See your cable box <br> owner's manual for details about the box's features. <br> If a remote control button is not described in this <br> section, it does not work for a cable TV box. |
| :--- | :--- |

## AUX Mode Button

To use the remote to operate a cable TV box, you must first set up the remote to control the cable box. See Controlling a Device on page 15. Then, you must press the AUX mode button to set the remote to AUX mode. The AUX mode button's back light turns ON to show that the remote is set to AUX mode. Make sure to keep the remote in AUX mode to use the buttons as described in this section.

## Mute Button

Press this button to turn off the sound. Press it again to restore the sound.

Press the left-hand, minus (-) side of this button to lower the sound volume. Press the right-hand, plus ( + ) side of this button to raise the sound volume.

## AUX (Auxiliary) Mode for Tuner or Amplifier

## Select Button

The Select button works as the Enter button for the cable box.

Use the Up/Down arrow buttons to change channels on the cable box.

## Recall Button

Press this button to return to the last channel you were watching. Press it again to switch between the last two channels that you watched.

(0) Number Buttons

Use these buttons to enter numbers in a menu.

## Star Button

Use this button to set up the remote control in AUX mode.

## AUX (AuXiliary) Mode for Tuner Or Amplifier

| ATTENTION: | Some of the features described below may not <br> apply to the tuner or amplifier. See the device <br> owner's manual for details about the device's <br> features. If a remote control button is not described <br> in this section, it does not work for a tuner or <br> amplifier. |
| :--- | :--- |

## AUX (Auxiliary) Mode for Tuner or Amplifier

## AUX Mode Button

To use the remote to operate a tuner or amplifier, you must first set up the remote to control the device. See Controlling a Device on page 15. Then, you must press the AUX mode button to set the remote to AUX mode. The AUX mode button's back light turns ON to show that the remote is set to $\mathbf{A U X}$ mode. Make sure to keep the remote in AUX mode to use the buttons as described in this section.

## Mute Button

Press this button to turn off the sound. Press it again to restore the sound.

## Volume Button

Press the left-hand, minus (-) side of this button to lower the sound volume. Press the right-hand, plus (+) side of this button to raise the sound volume.

## Select Button

This button works as the Input Select button for a tuner or amplifier.

Use these buttons to change channels on the tuner or amplifier.

## Star Button

Use this button to set up the remote control in AUX mode.

## Controlling a Device

## Remote Control Procedures

## Controlling a Device

This section explains how to set up the remote to control a device, such as a satellite TV receiver, a TV, a VCR, a cable TV box, a tuner, or an amplifier.

Note: The remote already is set up to control the receiver. But, if the receiver has its own volume control, then when you first install it, it is set up so that the remote cannot control the receiver sound volume. If you want to set up the receiver so that the remote can control the receiver volume, see Receiver Volume Control on pag e18.

1. Turn ON the device you want the remote to control, using the device's buttons or the remote control that came with the device.
2. Find the brand name of the device in the tables that start on page 22. If the brand is not listed, see Doing the Device Code Scan on pag e20.
3. Press and hold the mode button for the device that you want the remote to control, for about three seconds. When all the other mode button backlights come on, release the mode button.

For example
4. Use the number buttons to enter the code for the device.
Note: For the AUX mode, you must enter a 4-digit code. The first digit is the code for the device, as follows:
0 is for a second TV, 1 is for a second VCR, and 2 is for an audio amplifier or cable TV box.
5. Press and release the Pound (\#) button. If the code is valid, the mode button backlight blinks three times.
6. Test if the code works for the device by pressing the Power button. If the code works, the device should turn OFF.

7. Turn the device back ON and try some other buttons to make sure they work. Sometimes, the Power button may work when other buttons do not. If the code works for other buttons, stop here.

## Changing the Remote Control Address

8. If the code you entered does not work, repeat steps 3 through 7 using another code from the tables.
9. If you have tried all of the codes listed for the device without success, or if you cannot find the device brand name in the tables, see Device Code Scan on pag e20.

## Changing the Remote Control Address

Note: Do not change the address of the remote unless absolutely necessary, because the remote cannot control the receiver if the two devices have different addresses. If you start doing this procedure and then do not press any button for 20 seconds, the remote will end the procedure. Just start over again.
Note: This procedure shows examples of menu options. The options that you see may differ.

1. Display the Important System Information menu.

Note the Remote Address shown on this menu.
To do this:
Either: Press the System Information button.
or: a) Press the Menu button.
b) Select the System Setup option.

Note: This step does not apply to some receivers.
 SYS INFO or:

System Setup
Installation
System Info
2. Press and hold the SAT mode button about three seconds, until all the mode button backlights come on, and then release the SAT button.
3. Use the number buttons to enter a number from 1 to 15 . The SAT mode button backlight will blink off after you enter each digit, and then come on again.

## Installing an Attenuator

4. Press the Pound (\#) button. If the address you entered is valid for the remote control, the SAT mode button backlight flashes three times.
5. Press the Record button.

The Remote Address on the Important System Information menu should match the one that you entered.
6. To check the address, press and hold the SAT mode button for three seconds. Then, press the Pound (\#) button twice. The SAT mode button backlight flashes the same number of times as the address.

RECORD

7. Press the Select button.

## Installing an Attenuator

Unwanted UHF signals may block signals from the remote control to the receiver. To prevent such blockage, you can install a 10 dB attenuator. This will help keep out other UHF signals, but also reduce the distance at which you can use the remote control.

1. Remove the UHF antenna from the UHF Remote
Antenna connection on the receiver back panel.
2. Attach a 10 dB attenuator to the

UHF Remote Antenna connection.

3. Attach the UHF antenna to the attenuator.

## Controlling Sound Volume Controlling Sound Volume

Receiver Volume Control
The receiver may have its own volume control. When you first install such a receiver, it is set up so that the remote cannot control the receiver sound volume. You can set up the receiver so that the remote can control the receiver sound volume.
Note: You should use the receiver remote to control the sound volume for normal viewing. But, if you are recording a program using a VCR, and you change the sound volume using the receiver remote, the volume recorded also will change. So, you may want to set up the receiver so that only the TV remote can control the sound volume. Then, when you use the TV remote to change the volume, the volume recorded will not change. When you are finished recording, make sure to change the receiver setup back so that the receiver remotecan control the sound volume.

To change the way sound volume is controlled, do the following:
Note: This procedure shows examples of menu options. The options that you see may differ.

1. Use the TV remote control to make sure that the TV sound volume is not turned down or muted.
Note: If you turn down or mute the TV sound volume using the TV remote, the receiver remote cannot restore the volume even if the receiver is set up so that the remote should be able to do so.
2. Press the Menu button.
3. Select the System Setup option.

MENU

System Setup
Volume Control display this option, the receiver does not have its own volume control.
5. Select the TV remote volume control or the DISH remote volume control option.
6. Select the Save option.
7. If you are setting up the remote control for the first time, see Controlling a Device on pag e15. In step 4 of that procedure, use code 222 in TV mode to set up the remote to control the receiver, including the receiver sound volume.

## Controlling Sound Volume

## TV or Amplifier Volume Control

If you set up the remote to control a television, the Mute and Volume buttons - in any mode - control the TV volume. This applies whether or not the receiver has its own volume control. This does not apply if you use the AUX mode to control a device that has a volume setting.

If you want to control a device that has a volume setting, using any remote mode, do the following:

1. Press and hold the AUX mode button for three seconds, then release it.

2. Press the Pound (\#) button.
3. Press the plus $(+)$ side of the Volume button.
4. Press the $\mathbf{0}$ number button.

5. Press the Pound (\#) button. The AUX mode button backlight blinks three times.

To switch back to TV volume control, do the following:

1. Press and hold the TV mode button for three seconds, then release it.

2. Press the Pound (\#) button.
3. Press the plus $(+)$ side of the Volume button.

UME

5. Press the Pound (\#) button. The AUX mode button backlight blinks three times.

## Doing the Device Code Scan Doing the Device Code Scan

If a device is not listed in the tables or if the listed codes do not work, you can scan through all the codes, testing each one. Remember that the remote may not control some devices.

1. Press and hold the mode button for the device, for about three seconds. When all the other mode button backlights come on, release the button. It will flash to show that the remote is ready for address setting.
2. For AUX mode only, use the number buttons to enter a number as follows: 0 is for a second TV, 1 is for a second VCR, and 2 is for an audio amplifier or cable TV box. Then, press the Star ${ }^{*}$ ) button.

3. Press the Up or Down arrow button to set the remote to the next code. The Down arrow button scans backward, and the Up arrow button scans forward. Press the button again
 to continue scanning.
4. When the remote reaches the correct code, the device turns OFF. If this happens, press the

For example
 Pound (\#) button to store the code in the remote. If the code is valid, the matching mode light blinks three times.
6. Press the Power button to turn the device back ON.

7. Try some other remote control buttons to make sure that you have the right code.

## Finding the Device Codes

## Finding the Device Codes

You can find out what device code is set for each remote control mode. Do the following:

1. Press and hold the mode button for the device, for about three seconds. When all the other mode button backlights come on, release the mode button.
2. Press the Pound (\#) button twice. The mode light flashes the number for each digit of the current mode, with a pause between the groups of flashes. A quick flash is for zero. For example, the mode light flashes five times, pauses, flashes seven times, pauses, and flashes quickly for the 570 code.

## Device Codes

Use these codes to set up the remote to control other devices.
If a device is not listed or the codes do not work, the remote may not be able to control the device.
Note: The end of the VCR table provides codes for DVD players. Only for a receiver that has its own volume control, use code 222 with the remote in SAT, TV, or VCR mode to set up the remote to control the receiver sound volume.

## Trouble-Shooting Table

| What Is Happening | Possible Reason | What to Do |
| :---: | :---: | :---: |
| You cannot find the remote control. | You may have misplaced the remote control, or someone else may have it. | Use the receiver front panel Control Buttons to control the receiver until you find the remote. If the remote control is permanently lost or too damaged to use, call the Service Center to order a replacement. You will have to pay for the remote control, plus shipping and handling. |
| When you press the remote control Power button to turn the receiver ON, the receiver front panel Power light does not turn on. | You may not be able to see that the receiver Power light is on, if other lights in the room are too bright. <br> The remote control may not be operating properly or the batteries may be weak or dead. <br> The receiver power cord may not be plugged into a power outlet, or there may be a problem with the power. | Try other remote control buttons to see if the receiver is responding. <br> Replace the remote batteries with fresh ones. <br> Check that the receiver power cord is not damaged, and that the plug is inserted correctly into the outlet. |
| You set up the remote control for the TV mode. Then, you find that you cannot set up the remote control for the AUX mode. | A few remote controls have a problem when you set up the AUX mode after you set up the TV mode. | Do the following: (a) write down the TV code, (b) reset the TV mode using code 222, (c) set up the AUX mode, and (d) reset the TV mode using the code that you wrote down in step (a). |

| When you press a button on the remote control, the device does not do what you expect. | You may be trying to control a device other than the receiver, without pointing the remote control directly at the device. <br> The remote control may be missing batteries, the batteries may be incorrectly placed in the remote, or the batteries may be weak or dead. <br> The remote may not be set to the mode that matches the device you want to control. <br> The remote may not be set up to control the device. | Remember that the remote control uses IR signals to control devices other than the receiver. IR signals travel only 40 feet or less, and cannot go through walls or other solid objects. You must point the remote control directly at the device, with no objects blocking the line of sight. <br> If the batteries are missing or dead, insert fresh AAA-size batteries. <br> If the remote has fresh batteries, check whether they are placed according to the label diagram. If not, remove them and place correctly. <br> Make sure to set the remote to the mode that matches the device that you want to control. <br> Make sure to set up the remote to control all the devices that you want to operate. |
| :---: | :---: | :---: |
| The system uses infrared (IR) remote control extenders (called "pyramids"). Electronic devicesexhibit ultra-high frequency (UHF) interference. | The extenders use UHF signals to transmit signals from one room of the building to another. These signals may be causing the interference. | Temporarily stop using the extenders, to see whether this eliminates the interference. If the extenders are the source of the interference, you will have to avoid using them whenever you do not want interference with other devices that use UHF. This is because UHF signals travel 100 feet or more, and go through walls and other solid objects. |
| The system uses infrared (IR) remote control extenders (called "pyramids"). The IR remote control extenders do not seem to work. | The IR sensor on the extender that receives the remote control signals may not be facing the remote control. <br> The IR cable on the extender that sends the signal to the receiver may not be right in front of the IR sensor on the receiver front panel. | Make sure the extender that receives the signal from the remote control is facing the right way, so that the IR sensor can receive the remote control signals. Make sure the IR cable on the extender that sends the signal to the receiver is right in front of the IR sensor on the receiver front panel, so that the receiver IR sensor can receive the signals. If doing the above does not solve the problem, contact the manufacturer of the extenders for help. |

## Limited Warranty

This warranty extends only to the original user of the DISH Network ${ }^{\mathrm{TM}}$ Remote Control ("you," "your") and is limited to the purchase price of the remote control. EchoStar Communications Corporation and its affiliated companies ("we," "our," "us") warrant this remote control against defects in materials or workmanship as follows.

For one year from the original date of purchase, if we find that the remote control is defective subject to the limits of this warranty, we will replace the remote at no charge for parts or labor. We warrant any such work done against defects in materials or workmanship for the remaining part of the original warranty period.

This warranty does not cover installation of the DISH Network ${ }^{\text {TM }}$ System; consumer instruction; physical set up or adjustment of any consumer electronic device; remote control batteries; signal reception problems; loss of use of the equipment; unused programming charges due to equipment malfunction; cosmetic damage; damage due to lightning, electrical or telephone line surges, fire, flood, or other acts of Nature; accident; misuse; abuse; repair or alteration by other than our factory service; negligence; commercial or institutional use; improper or neglected maintenance; equipment sold AS IS or WITH ALL FAULTS; equipment removal or reinstallation; shipping damage if the equipment was not packed and shipped in the manner we prescribe; nor equipment purchased, serviced, or operated outside the contiguous United States of America.

REPLACEMENT AS PROVIDED UNDER THISWARRANTY IS YOUR EXCLUSIVE REMEDY. WE SHALL NOT BE HELD LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESSED OR IMPLIED WARRANTY ON THIS DEVICE, NOR FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE RESULTING FROM THE USE OF, OR INABILITY TO USE, THIS DEVICE. UNDER NO CIRCUMSTANCES SHALL OUR LIABILITY, IF ANY, EXCEED THE PURCHASE PRICE PAID FOR THIS DEVICE. EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FORA PARTICULAR PURPOSE ON THIS DEVICE IS LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY. WE RESERVE THE RIGHT TO REFUSE TO HONOR THIS WARRANTY IF WE DETERMINE ANY OF THE ABOVE EXCEPTIONS TO HAVE CAUSED THIS DEVICE NOT TO HAVE PERFORMED PROPERLY. THIS WARRANTY SHALL BE VOID IF ANY FACTORYAPPLIED IDENTIFICATION MARK, INCLUDING BUT NOT LIMITED TO SERIAL OR CONDITIONAL ACCESS NUMBERS, HAS BEEN ALTERED OR REMOVED. THISWARRANTY SHALL ALSO BE VOID IF THE DEVICE HAS BEEN OPENED BY AN UNAUTHORIZED PERSON (with the exception of opening the battery cover).

## Advance Exchange Program

Whether covered under this warranty or not, the Advance Exchange Program allows you to have replacement equipment shipped immediately to you (depending upon where you live, it could take up to three business days). Along with replacement equipment, you will receive a prepaid shipping label and instructions on how to return the defective equipment. The shipping cost for receiving replacement equipment and sending back the defective equipment is a one time fee based on EchoStar's competitive, bulk shipping rates and will be charged to your credit card.

If you do not ship the defective equipment back to EchoStar within ten days after receiving the replacement, your credit card will be charged the market price of the replacement. If you return the defective equipment after the ten days, you will receive a full refund less an administrative fee.

If damage to the defective equipment is found which DISH Network Service in its sole discretion determines is not covered by the warranty, we will charge your credit card our standard flat rate exchange fee.

This warranty gives you specific legal rights which may vary from state to state. Some states do not allow the exclusion or limitations of incidental or consequential damages, or allow limitations on the duration of an implied warranty, so those limitations may not apply to you.

## If You Need Help

1. Review this Guide.
2. See the Trouble-Shooting Table on pag e26.
3. Call the DISH Network ${ }^{\text {SM }}$ Service Center at 1-800-333-DISH (3474). Have the date of purchase and your customer account number ready.
4. A Representative will assist you. He or she will try to troubleshoot any problem you may be having.
5. If the Representative finds that you should return the remote control, he or she will give you a telephone number to call to get a Return Authorization (RA) number. Before shipping any equipment to us, you must get a Return Authorization number.
6. You must package returned equipment properly. Follow the instructions that the Representative gives you.
7. Write the RA number in large, clearly visible characters on the outside of the shipping box used to return the equipment.
To avoid confusion and misunderstandings, we will return shipments without an RA number clearly visible on the outside of the box to you at your expense.
8. We will:

- Check the remote control, including whether it is covered under the warranty.
- Replace any remote that we find is defective with a new or refurbished remote, if the defective remote is covered under the warranty. We will ship the replacement remote at our expense.
- If a defective remote is not covered under the warranty, we will tell you. We may assess you a flat rate charge for a replacement remote, including shipping and insurance.
