PLEASE study these instructions carefully before beginning this installation. If you have any questions, please call our **Technical Hotline at: 1-800-416-8628**, 7:00 am - 5:00 pm, Pacific Standard Time, Monday through Friday or e-mail us at **Edelbrock@Edelbrock.com**.

DESCRIPTION: This is a USB to Serial communications adapter cable. It is used to convert a Laptop or PC USB port to a 9-pin RS232 serial communications connector. This item is included in all QwikData Data Acquisition and Edelbrock EFI kits. Software drivers are included on the supplied CD.

KIT CONTENTS

- ❏ 1 USB-to-Serial Adapter Cable

SYSTEM REQUIREMENTS

Hardware – A USB-enabled PC or Laptop

Software – Microsoft® Windows 98SE/ME/2000/XP

INSTALLATION: The drivers for the USB-Serial Port adapter cable are located on the supplied CD.

Microsoft® Windows Installation

Insert the disc into your CD-ROM drive and click on *"Install USB-to-DB9"* then follow the onscreen prompts.

> **NOTE:** *You may use the same program to un-install the driver if desired. Run the "PL-2303 Driver Installer" program again and follow the prompts to un-install the driver.*

TROUBLESHOOTING: If the adapter is not communicating after installation of the driver, follow the troubleshooting suggestions below.

- Many serial devices will not operate on a COM port higher than 4. If the COM port is higher than 4, change it to a lower number using the Device Properties.

- To change the assigned COM number, go to the Start menu, click Control Panel then System. Select the Hardware tab and then Device Manager. Select the category *"Ports (COM & LPT)"* and right click the device *"USB-to-Serial (COM x)"* (Or a similar name. *"X"* represents the assigned COM number). Click the Port Settings tab, then the Advanced button. A box will be in the lower left corner to assign a different COM port to the adapter.

> **NOTE:** *This procedure applies only to Windows 98SE, ME, 2000, and XP.*
