

Get luxuriously chilled and sparkling water at the tap with the Everpure Exubera™ sparkling and chilled water appliance. The perfect complement to an Everpure commercial grade water filtration system, the Exubera™ delivers the best-tasting chilled, sparkling – or still – water available, perfect for flavored sparkling beverages or classic bar drinks. The Exubera™ provides a healthy alternative to canned soft drinks. Add flavored syrups for truly customized water... plus it is easy to adjust the amount of “fizziness” of your sparkling water by simply adjusting the regulator on the CO2 canister.

## The Everpure Exubera™ CGCC-1 water appliance features:

- > Provides large quantities of sparkling bubbly water with adjustable carbonation level
- > Chills to an ideal temperature of 40°F
- > 6.6 gallons chilled/carbonated water per hour
- > Requires CO2 cylinder to provide carbonation (EV9318-62)
- > Compact unit is easy to hide in any kitchen cabinet or wet bar
- > Whisper-quiet, hermetically sealed, and maintenance-free compressor
- > Uses ozone-friendly R134a refrigerant
- > Consumes only 350 watts of electricity when compressor is cycling
- > Stainless steel components
- > 3 wire service cord and plug included
- > Ambient water port equipped
- > Can be plumbed to coffee or ice machine
- > UL listed
- > Must be used with the Everpure Exubera™ faucet or (EV9000-84/88) or the three way bar faucet (EV9000-79)
- > Use with an Everpure Commercial Grade Water Filtration System

\*Faucet and filtration system sold separately.

## Combine with commercial grade water filtration

### It's water filtration you can trust

The same commercial quality that makes Everpure the overwhelming choice for water filtration in restaurants is also available for your home. Everpure's exclusive precoat filtration technology combines Micro-Pure and a unique pleated filter membrane to reduce particles as small as 0.5 microns. This highly engineered design offers the largest filtering surface area, longer life and consistent performance.

### the pure solution

Our products polish water to premium quality so that water is sparkling and free of unwanted tastes and odors. You'll taste the difference in every sip and everything made with water will taste better, too.

### the practical solution

At only pennies per gallon, this system is less expensive per glass than bottled water or other drinking water systems and provides about a year's supply of water, depending on the size of your family and the amount of water you drink.

## Exubera™ CGCC-1 Sparkling & Chilled Water Appliance – Part No. EV9318-60

### Features:

- > Delivers up to 6.6 gallons of chilled/carbonated water per hour.
- > Chills to an ideal temperature of 40°F.
- > Compact unit is easy to hide in any kitchen cabinet or wet bar.
- > Whisper-quiet, hermetically sealed, and maintenance-free compressor
- > Stainless steel components.
- > 3 wire service cord and plug included.
- > Ambient water port equipped.
- > Controllable carbonator and temperature levels.

### General Installation/Operation/Maintenance Requirements:

- > Measures 16" high x 10" wide x 18" deep.
- > Adjustable thermostat is factory pre-set.
- > Install in well-ventilated cabinet.

### Helpful Tips

- > Position the appliance in the point of installation, away from sources of heat and direct sunlight
- > Do not install the appliance outdoors and in very damp rooms
- > The appliance should be positioned in such a way as to leave approximately 2.40 to 2.80 inches of space free for air to circulate freely
- > Special ventilation may be required when installing the unit in a cabinet so that the heat produced by the refrigerating circuit can properly circulate and escape
- > Make sure the appliance is resting fully on all four supporting feet
- > Before making the water connection, make sure the incoming water pressure is between 14.5 psi and 43.5 psi
- > If the incoming water pressure is below 14.5 psi or the flow rate is less than 0.50 gpm, fit a device capable of increasing the pressure (such as an autoclave or similar)
- > The pressure is especially important for those water coolers fitted with a carbonation device
- > If the incoming water pressure exceeds 43.5 psi, predispose a pressure reducer capable of reducing the latter to the 14.5 psi and 43.5 psi
- > Advice on using the appliance for carbonated water: To guarantee the correct operation of the pump in time, the appliance must always be operated with water in the cooling circuit

This water appliance is approved by Underwriters Laboratories Inc.  
in accordance with NSF/ANSI 61-2002.

### capacity

6.6 gallons per hour for chilled/  
carbonated water

### temperature output

40°F (based on 68°F inlet water and 77°F  
ambient)

### inlet/outlet

1/4" O.D. tubes for inlet and 6 mm O.D.  
tubes for outlets

### power

350 watts

### motor compressor

1/12 HP, 115 VAC, 60Hz single phase

### everpure warranty

The Exubera™ appliance has a 24-month  
limited warranty on the refrigeration  
system of the unit. Electrical components  
and water system are warranted for 12  
months from date of installation. Warranty  
pertains to drinking water applications  
only. Non-drinking water applications are  
not covered under warranty. A detailed  
warranty statement is included with each  
unit.
