

# TPR150 Twisted Pair Receiver

1. If desired, projector mount the receiver. Refer to the TPS150 transmission system manual.
2. Make all connections to the TPT150 switching transmitter. Refer to the TPS150 transmission system manual and the TPT150 transmitter label.
3. Connect a CAT 5 **shielded twisted pair (STP)** or **foil shielded twisted pair (FTP)** cable, terminated with RJ-45 connectors, between the transmitter and the receiver. Ensure that **both** ends of the cable are terminated using the **same protocol**, either TIA/EIA 568 A or 568 B. Refer to the TPS150 transmission system manual.

**NOTE** Extron recommends the use of **STP** or **FTP** cable **only**.

4. Connect the RGB video, component (Y, R-Y, B-Y) video, S-video, and composite video outputs to a projector or other video device.
5. Connect a serial cable between the RS-232 port and the projector's serial port.
6. Connect power.

**Smear correction** – Press the Cable Equalization Select button as necessary to light the Low Frequency LED. Press the + or – button to adjust for the best image display.

**Sharpness correction** – Press the Cable Equalization Select button as necessary to light the High Frequency LED. Press the + or – button to adjust for the best image display.

**Convergence correction** – Use a small, flat-head screwdriver to gently adjust the rear panel Red, Green, and Blue Skew Adjust controls. **NOTE** Make small adjustments.

**CAUTION** Do not connect this device to a computer data or telecommunications network.
