

*2009MY F-250*

### **FAST TURN ORDERS (FTOs)**

In an effort to provide dealers with guidance on ordering recommendations, Ford has developed specific ordering recommendations, which statistically represent the fastest turning configurations when this specific content is grouped together (referred to as Fast Turn Orders). The Fast Turn Orders were developed as a result of an extensive analysis of actual retail dealer sales performance of every vehicle configuration with the goal of identifying those configurations with the best Days on Lot (DOL) performance.

FTOs are designed to provide dealers with:

- Vehicle configuration recommendations representing the fastest turning configurations available
- Options to consider adding to FTOs that do not degrade the inventory turn performance

9 FTO vehicle configurations have been developed for the MY 2009 Super Duty F-250 Pickup. The FTO descriptions with the required options, recommended options, and recommended take rates are listed in the following pages:
