Screen Examples In This Manual

The screen examples in this manual are subject to change without notice in the interest of product improvement.

The screenshots used in this manual were of those in Windows XP.

If the screenshots in this manual differ from the actual screens, follow the actual ones.

Note, Liability

READ ALL OF THIS MANUAL AND RELATED MANUAL CAREFULLY BEFORE USING THIS PRODUCT.

IF NOT USED CORRECTLY, UNEXPECTED INJURY MAY BE CAUSED TO USERS OR BYSTANDERS.

While all efforts have been made to ensure the accuracy of all information in this manual, PFU LIMITED assumes no liability to any party for any damage caused by errors or omissions or by statements of any kind in this manual, its updates or supplements, whether such errors are omissions or statements resulting from negligence, accidents, or any other cause. PFU LIMITED further assumes no liability arising from the application or use of any product or system described herein; nor any liability for incidental or consequential damages arising from the use of this manual. PFU LIMITED disclaims all warranties regarding the information contained herein, whether expressed, implied, or statutory.

PFU LIMITED reserves the right to make changes to any products herein, to improve reliability, function, or design, without further notice and without obligation.

Use in High-safety Applications

This product has been designed and manufactured on the assumption that it will be used in office, personal, domestic, regular industrial, and general-purpose applications. It has not been designed and manufactured for use in applications (simply called "high-safety applications" from here on) that directly involve serious danger to life and health when an extremely high degree of safety is required, for example, in the control of nuclear reactions at nuclear power facilities, automatic flight control of aircraft, air traffic control, operation control in mass-transport systems, medical equipment for sustaining life, and missile firing control in weapons systems, and when provisionally the safety in question is not ensured. The user should use this product without adopting measures for ensuring safety in such high-safety applications. PFU LIMITED assumes no liability whatsoever for damages arising from use of this product by the user in high-safety applications, and for any claims or compensation for damages by the user or a third party.

■ Trademarks

ScanSnap and the ScanSnap logo are trademarks of PFU LIMITED.

Microsoft, Windows and Windows Vista are registered trademarks of Microsoft Corporation in the United States and/or other countries.

Excel is a product of Microsoft Corporation in the United States.

Adobe and the Adobe logo, as well as Acrobat and Adobe Reader are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States and/or other countries.

Other product names referred to in this manual are registered trademarks or trademarks of respective companies.

The screen examples in this manual are created according to Microsoft Corporation's Guideline.

How Trademarks and Product Names are indicated in this Manual

In this document, the following product names are abbreviated as follows:

ScanSnap:	Color image scanner ScanSnap TM
CardMinder:	CardMinder TM application for ScanSnap
Microsoft Internet	
Explorer	: $Microsoft^{\mathbb{R}}$ Internet $Explorer^{\mathbb{R}}$
Microsoft Office:	Microsoft [®] Office
Microsoft Outlook	::Microsoft [®] Outlook [®]
Windows Mail:	Microsoft [®] Windows [®] Mail

The names of the operating systems are abbreviated as follows:

Microsoft [®] Windows [®] 2000 Professional operating system
Microsoft [®] Windows [®] XP Professional operating system
Microsoft [®] Windows [®] XP Home Edition operating system
$\operatorname{Microsoft}^{\mathbb{R}}$ Windows Vista ^{\mathbb{R}} Home Basic operating system
$\operatorname{Microsoft}^{\mathbb{R}}$ Windows Vista ^{\mathbb{R}} Home Premium operating system
$\operatorname{Microsoft}^{\mathbb{R}}$ Windows Vista ^{\mathbb{R}} Business operating system
Microsoft [®] Windows Vista [®] Enterprise operating system
$Microsoft^{\mathbb{R}}$ Windows Vista ^{\mathbb{R}} Ultimate operating system

Where there is no need to distinguish one of the above operating systems from other ones, the general term "Windows" is used. In addition, "® (registered trademark)" and "TM (trademark)" are omitted in this document.

CardMinder User's Guide

1.1 About CardMinder

CardMinder is an application that scans your business cards with an image scanner and converts them into the address database. CardMinder allows quick scanning, image recognition, and database management for all your office scanning needs.

Using an OCR (Optical Character Recognition) engine and sharing recognized data with a PIM (Personal Information Manager), CardMinder is able to...

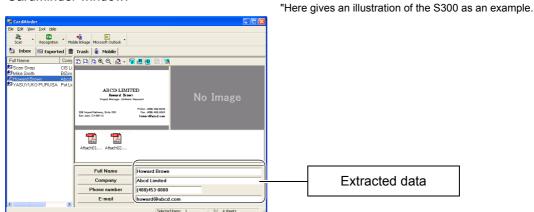

- Scan business cards and convert them into database records
- Recognize the characters on the business card and send the character data to a PIM (Personal Information Manager)
- Copy scanned business card's data to removable media together with the viewer application so as to use the data on other personal computers
- Link related files to respective contacts (records in the address database)
- Easily find a record (contact) extracted from a business card image, using simple keyword searches

CardMinder User's Guide 2

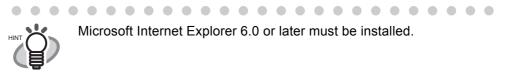

System Requirements

CardMinder runs on the system of the following environment:

Computer:

Operating System(*1)	Windows 2000 Windows XP	Windows Vista	
CPU	Intel Pentium III processor 600 MHz or higher (*2)	Intel Pentium 4 processor 1.8 GHz or higher (*2)	
Memory	256 M byte or more (*2)	512M byte or more (*2)	
Disk capacity	200 M byte or more of free disk spaces are required. (*3)		

- *1 It is recommended the operating system be used with the latest Service Pack · applied.
- *2 : If the system requirements for the scanner are higher than the above requirements, it is recommended to use CardMinder in the operating environment that meets the system requirements for the scanner or higher.
- To save the data of one business card (Duplex, Color, and Best image quality *3 scanning), 250K bytes of disk space is required. Estimate the total amount of necessary disk space according to the number of business cards you are to scan.

Other requirements :

- CD-ROM drive (required for the installation of CardMinder)
- ScanSnap* or the scanner that complies to TWAIN Standard (required for scaning • business cards)

"ScanSnap" is a FUJITSU compact color scanner. Although it is not compatible with TWAIN Standard, this novel scanner can create PDF files directly from scanned images with the touch of a button. For more details, please visit our website at: http://scansnap.fujitsu.com

- Removable media
 - (8 MB or more free space is required for using Mobile linkage function)
- Keyboard
- Mouse
- Display

• If the screen resolution is set to 800 x 600, line breaks will occur at positions where it would be inappropriate and lines of characters are misaligned when you change a point size to a larger one.
 To recognize and view Japanese and Chinese business cards, change the settings as follows: <u>Windows 2000</u>: Select "Control Panel," -> "Regional Options," -> the "General" tab. Check "Japanese," "Simplified Chinese," "Traditional Chinese," or "Korean" under "Language settings for the system." Install Universal Font (Arial Unicode MS) from the Setup Disk of Microsoft Office 2000 or later version. <u>Windows XP</u>: Select "Control Panel," -> "Regional and Language Options, " -> the "Languages" tab. Check "Install files for East Asian languages" under "Supplemental Language support." Install Universal Font (Arial Unicode MS) from the Setup Disk of Microsoft Office 2000 or later. <u>Windows Vista</u>: Install Universal Font(Arial Unicode MS) from installation CD of Microsoft Office 2003 or later version. Business cards written in Chinese or Korean cannot be recognized with scanners that support the TWAIN driver. To text-recognize a business card written in Chinese or Korean with CardMinder, ScanSnap must be ready to scan. Make sure that ScanSnap is powered on and the ScanSnap Manager icon on the task bar is in the Sor or Sor ready state.
CardMinder can interact with other applications. However, characters written on business cards may not be displayed properly in the interacting applica- tion.

1.2 Features of CardMinder

The features of CardMinder are as follows:

- Scan one side or both sides of business cards just at the touch of the button on the scanner. (ScanSnap).
- Capture memo written on business cards and create a database.
- Recognize characters on business cards, and automatically convert them into database records, assigning to specific database fields such as Full Name and Company, which are used as keywords.

Records assigned in the following fields can be keywords:

Full Name Company Department Job title ZIP / Postal codes Address Location / Region Phone number Fax number Mobile phone E-mail Web site address Memo Save date

• Export recognized data to PIMs (Personal Information Manager)

Supported Applications: Microsoft Outlook 2000/2003/2007

Microsoft® Outlook Express 6

ACT!TM Version 6.0

GoldMine[®] Version 6.0

Windows Mail (in WIndows Vista)

Microsoft[®] Excel (when the CSV format is used)

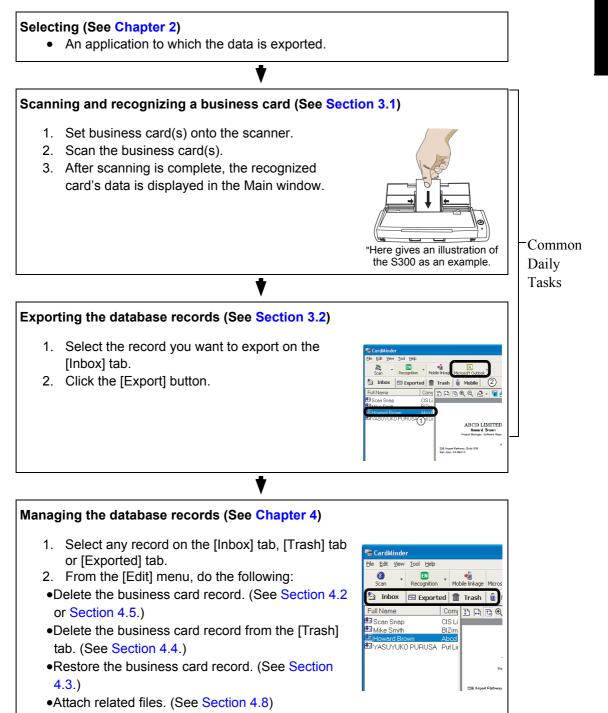

• Search for business card records quickly by Full Name or Company

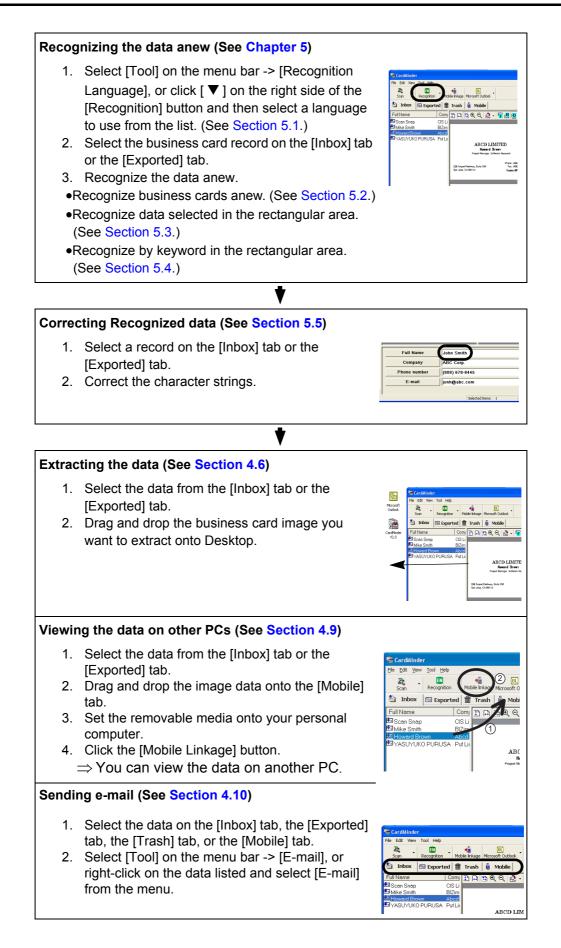

CardMinder User's Guide

About CardMinder

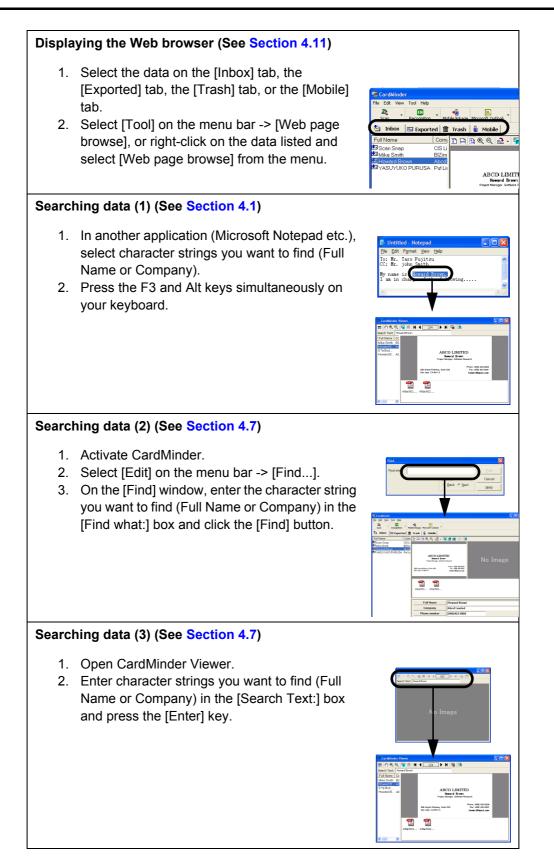

1.3 Operation Flow

You can operate CardMinder by doing the following:

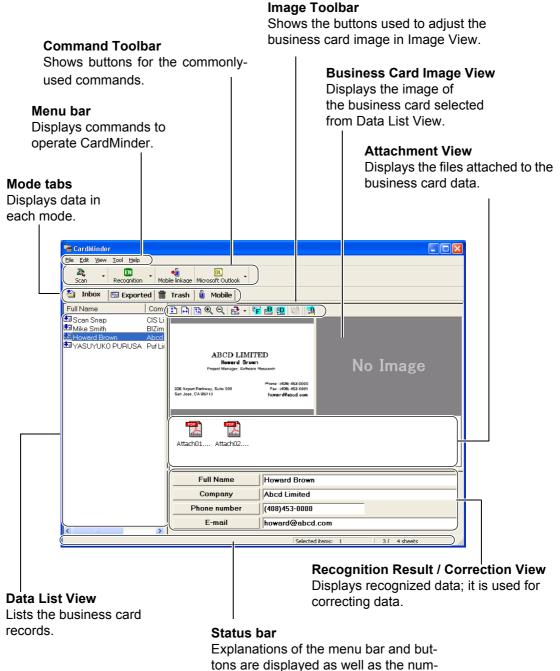

CardMinder User's Guide | 7

1.4 Operation Windows

There are two types of operation windows in CardMinder.

Main window

ber of selected business cards.

Button view		Function	
	Za Scan	 Start scanning of business card(s). With the [♥] button, you can change scanning settings (Duplex/ Simplex) and: <u>With ScanSnap:</u> You can set scanning quality (Normal/Bet- ter/Best). <u>With TWAIN scanners</u>: You can set resolution (150/200/300/ 400dpi) 	
Command Toolbar	EN Recognition	Recognize the business card selected in the Data List View. Only the characters on the front side of the business card are recognized. The recognition result will automatically be displayed in Recognition / Correction View. With the [♥] button, you can select the language for recognition.	
	* ∎ Mobile linkage	Copy the business card's data (database records) on the [Mobile] tab to removable media and then you can use the data on other personal computers.	
	OL Microsoft Outlook	Export the business card's data to another application. The data on any tabs can be exported to the application specified. In addition, the data on the [Inbox] tab is moved to the [Exported] tab. The button at the left shows that the destination is Microsoft Outlook. Refer to Chapter 2 to select different applications.	

Button view		Function
	‡ "	The height of the business card image is adjusted to Image Display View.
	₽	The width of the business card image is adjusted to Image Display View.
		The height and width of the business card image is adjusted to the image display view.
	Ð	The business card image size is enlarged.
	Ø	The business card image size is reduced.
	•	Rotate the business card image 90 degrees clockwise. Click the $[\mathbf{\nabla}]$ button to change the rotation angle and plane.
	F	Display the front side image of the business card. If no image exists, [No Image] is shown instead.
Image	B	Display the back side image of the business card. If no back side image exists, [No Image] is shown instead.
Toolbar	Đ	Display both the front and back side images together. You can specify how to display the business card image by selecting [View] on the menu bar -> [Show duplex image] -> [Split view window vertically] / [Split view window horizontally]. On the left side (or Upper side) of the Business Card Image View, the front side of the business card is shown. On the right side (or Lower side) of the Business Card Image View, the back side of the business card is shown. If you select [Auto] from the [Show duplex image] submenu using the [View] menu, CardMinder automatically selects either of view types (splitting vertically or horizontally) based on the front side image of the business card, so that the images can be displayed in their maximum size. If no back side image exists, [No Image] is shown.
		Swap the front and back side of the business card image. The same result is obtained by clicking the [View] menu and the [Swap data (front and back)] command.
	2 0	Display or hide the Attachment View.
	[Inbox] tab	Contacts that have not been exported to an application are on this tab.
Mode tabs	[Exported] tab	Contacts that have been exported to an application are on this tab.
	[Trash] tab	Contacts that have been sent to the Trash are on this tab.
	[Mobile] tab	Contacts to be copied to removable media are on this tab.

Button view		Function		
Data List View	Full Name	Clicking the heading Full Name sorts names in alphabetical order. On the heading clicked for sorting, the mark or the mark appears. Note that if names are listed in the order scanned (the top of the list is the latest), no marks appears.		
	Company	Clicking the heading <u>Company</u> sorts company names in alphabetical order. On the heading clicked for sorting, the <u>mark</u> or the <u>mark</u> appears. Note that if company names are listed in the order scanned (the top of the list is the latest), no marks appears.		

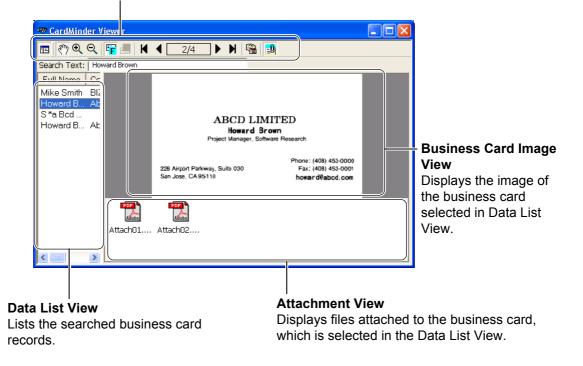

I CardMinder Viewer

You can open this viewer by doing any one of the following:

- •Search words with another application such as Microsoft Notepad and so on.
- •From the [Start] menu on the Desktop, select [All Programs] -> [CardMinder V3.2] -> [CardMinder Viewer].
- •Double-click on the [😵] icon on the task bar, which is present when CardMinder Viewer is active.

Image Toolbar

Shows buttons used to adjust the business card image displayed in the Image View.

About CardMinder

. • •

As the default settings, Data List View and Attachment View are hidden.

Button view		Function					
	ie	Display or hide the Data List View.					
	Ś	Move an image of a business card, dragging the image.					
	Ð	The image size is enlarged using the clicked point as the zoom center.					
	Q	The image size is reduced using the clicked point as the zoom center.					
	F	Display the front side image of the business card.					
Image	B	Display the back side image of the business card. If no back side image exists, this button is disabled.					
Toolbar	4	The previous business card is shown.					
		The next business card is shown.					
	K	Display the first business card data.					
	M	Display the last business card data.					
	*	The currently-selected business card image are shown on the main window.					
	2 0	Display or hides the Attachment View.					
Data List View	Full Name	Clicking the heading Full Name sorts names in alphabetical order.					
	Company	Clicking the heading <u>Company</u> sorts company names in alphabetical order.					

1.5 User Authority

The user authority to use CardMinder is as follows:

- If your operating system is Windows 2000 Professional or Windows XP Professional, you must be authorized as Standard User (Power Users group) or higher levels of user to log on and use this software.
- If your operating system is Windows XP Home Edition, you must be authorized as the computer administrator to log on and use this software.
- If your operating system is Windows Vista, you must be authorized as Standard User or higher levels of user to log on and use this software.

Chapter 2

Configuration Before Scanning

This chapter describes how to select a PIM (Personal Information Manager) application to use with CardMinder.

For information about how to configure advanced settings for CardMinder, refer to Chapter 6.

 From the [Start] menu on the desktop, select [All Programs] -> [CardMinder V3.2] -> [CardMinder V3.2].

 \Rightarrow The main window of CardMinder appears.

2. Select [File] -> [Export to].

 \Rightarrow A list of PIM applications appears. The marked application is the currently selected one.

3. Click an application to which you want to export the business card data.

Scanning and Exporting Business Card Data

This chapter describes the procedure for scanning business cards with a scanner. There are two ways of scanning; they are, Flatbed scanning and ADF (Auto Document Feeder) scanning. Further information on both ways are described in this chapter.

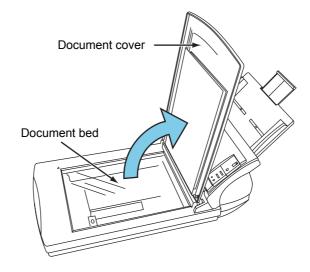

3.1 How to Scan Business Cards

This section describes the business card scanning with the following:

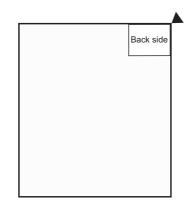

- •Flatbed
- •ADF (Automatic Document Feeder)

Scanning with the Flatbed

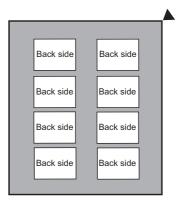

1. Open the scanner document cover.

- 2. Place business cards with its face down on the document bed.
 - 1. Scanning one card

2. Scanning multiple cards

Arrange the cards so that they do not overlap each other, keeping enough distance between them.

Scanning and Exporting Business Card Data

. . You cannot scan multiple cards at a time if the types of business cards are the ABCD LIMITED following: Haward Brown Business cards with a dark-colored line Project Manager, Software Research running across the length 226 Airport Parkway, Suite 030 San JOSE CA 95110 Phone: (408) 453-0000 Fax: (408) 453-0001 Business cards with its edge dark-colored Scan these business cards one-by-one. When you scan only one business card, it is necessary to select "1 card to reference point" on "Flatbed scanning method" of the [Scanner settings] window. Refer to Step 9 for details on the

3. If you are scanning multiple cards per scan, spread out dark-colored paper, and place it over the business cards.

Use dark-colored paper that covers the entire glass surface of the document bed.

- 4. Close the scanner document cover.
- 5. Select [File] on the menu bar -> [Scanner settings].

 \Rightarrow The following window appears.

6. <u>To use a TWAIN-compliant scanner</u>, click the [Select Scanner] button.

Scanner © TWAIN Select Scanner © Show TWAIN driver dialog box when scanning starts.	
C ScanSnap	

If you mark the "Show TWAIN driver dialog box when scanning starts" checkbox, the driver dialog box will appear before scanning starts, and you will be able to specify scanning settings. Note that the settings configured in the TWAIN driver dialog box is valid only for the scanning of this time.

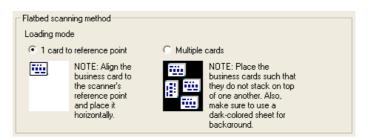

7. Select the scanner to use, and then click the [Select] button.

8. Under "Scanner type," select the "Flatbed" radio button.

9. Under the "Flatbed scanning method," specify the "Loading mode" of the business card(s).

- 1) To scan one card per scan, select "1 card to reference point."
- 2) To scan multiple cards per scan, select "Multiple cards."

10. Specify desired "Capturing Side/Color Mode/Resolution" settings for scanning.

Capturing Side: If the business card is a one-sided one, select "Simplex." If it is a two-sided one, select "Duplex." When two-sided cards are scanned, back sides are scanned after front sides have been scanned.

and click the [OK] button.

CardMinder

Front side scan is completed. Turn over the stack of cards. Place it on the tray and click the [OK] button.
NOTE: If you are using a flatbed scanner, turn over the card and place it on the same area.

OK Cancel

When the message below appears, turn over the business card,

If you click the [Cancel] button, scanning mode is switched to Simplex.

Color Mode: Specify the color mode, "B&W" (Black & White) or "Color."

Resolution: Specify the resolution to be used. <u>TWAIN scanners:</u> 150, 200, 300, and 400dpi. Scanning in color mode: "Best" or 300dpi is recommended. Scanning in B&W mode: "Best" or 400dpi is recommended.

- 11. When the configuration is finished, click the [OK] button to close the [Scanner settings] window.
- 12. Click the [Scan] button on the toolbar.

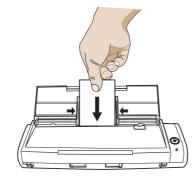

ATTENTION WAY See the scanner driver dialog box (TWAIN dialog box) when scanning business cards. If this is the case, specify the following and proceed with operation. • Recommended resolution Color mode: 300 dpi B&W mode: 400 dpi • Paper size Flatbed: A4

 \Rightarrow When the scanning is complete, the scanned images of the business cards are displayed on the [Inbox] tab of the main screen.

Scanning with the ADF (Automatic Document Feeder)

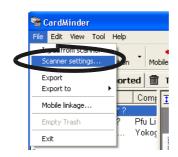

1. Load a business card onto the scanner.

(To scan multiple cards, stack the cards together and load them.)

"Here gives an illustration of the S300 as an example.

2. Select [File] on the menu bar -> [Scanner settings].

 \Rightarrow The following window appears.

3. To use a TWAIN-compliant scanner, click the [Select Scanner] button.

ScanSnap does not require this operation. Go to step 5.

If you mark the "Show TWAIN driver dialog box when scanning starts" checkbox, the driver dialog box will appear before scanning starts and you will be able to specify the scanning settings. Note that the settings configured in the TWAIN driver dialog box is valid only for the scanning of this time.

4. Select the scanner to be used, and click the [Select] button.

Select Source	X
Source: FUUITSU (#4220C2d) #2 Waster Head C2d	Select

5. Under "Scanner type," select "ADF Simplex" or "ADF Duplex" to scan.

	Scanner type	
	C Flatbed	
/	ADF Simplex (Type: The cards are stacked in reverse order after scanning the front side.)	
(\odot ADF Simplex (Type: The cards are stacked in the same order after scanning the front side.)	۱
	C ADF Duplex	I
	with Flatbed NOTE: Scan automatically from flatbed If there is no paper on the ADF.	/
	no paper on the AUF.	

. . .

When scanning multiple two-sided business cards with a ADF simplex-type scanner, first scan the front side of all cards, and then scan the back side of the cards. The front and back sides of each individual business card will be combined.

Note that the scanning order may change depending on the Scanner type selected, which is described in the previous page. The way of combining both sides differs between the two Scanner types.

Be careful not to select the wrong Scanner type; the front and back sides of the same business card will not be combined if you select the wrong type.

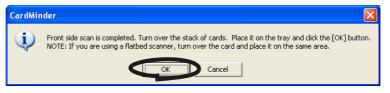

- The cards are stacked in reverse order after scanning the front side.
 - Front side: Scanning starts with the first sheet.
 - Back side: Scanning starts with the first sheet.
- The cards are stacked in the same order after scanning the front side.
 Front side: Scanning starts with the first sheet.
 Back side: Scanning starts with the last sheet.

6. Under "Capturing Side/Color Mode/Resolution," specify desired scanning settings.

-0	Capturing Side	/ Color M	ode / Resoluti	on			
	Simplex	• /	Color	• /	300dpi	•	

Capturing Side: If the business card is a one-sided one, select "Simplex." If it is a two-sided one, select "Duplex." If two-sided cards are scanned with an "ADF Simplex" type scanner, back sides are scanned after all front sides have been scanned.

When the message below appears, turn over the business card, and click the [OK] button.

If you click the [Cancel] button, it becomes simplex scanning mode.

Color Mode: Specify the color mode, "B&W" (Black & White) or "Color."

Resolution: Specify the resolution.

ScanSnap: "Normal," "Better" and "Best."

<u>TWAIN-compliant:</u> 150, 200, 300, and 400dpi.

Scanning in Color mode: "Best" or 300dpi is recommended.

Scanning in B&W mode: "Best" or 400dpi is recommended.

- 7. When the configuration is finished, click the [OK] button to close the [Scanner settings] window.
- 8. Click the [Scan] button on the toolbar.

You may see the scanner driver dialog box (TWAIN dialog box) when scanning business cards.

If this is the case, specify the following and proceed with operation.

- Recommended resolution Color mode: 300 dpi Black and White mode: 400 dpi
- Scanning size
 - ADF scanner: Business card

.

If you are using an ADF Simplex type scanner, after the front side of the cards are scanned, you will see a message that asks you to load business cards to scan the back side of the cards.

When you see this message, load the business cards so that the back side of the cards are scanned, and then click the [OK] button.

With ScanSnap S300, ScanSnap S500 series, or ScanSnap fi-5110EOX

series, you can also perform scanning by pressing the [SCAN] button

With the ScanSnap fi-4110EOX series, you can also perform scanning by

pressing the \bigcirc (duplex scan button) or \bigcirc (simplex scan button). In this case, scanning is performed according to the settings of the "ScanSnap Manager (or ScanSnap Monitor) - Scan and Save Settings" window, which is

 $\bullet \bullet \bullet \bullet$

opend by clicking [SCAN Button Setting] in the S or S right-click menu.

 \Rightarrow When the scanning is completed, the scanned images of the business cards are displayed on the [Inbox] tab of the main screen.

• •

3.2 Exporting to Associated Application

This section describes how to export data to an associated application.

1. When scanning is complete, the [Inbox] tab is displayed in the Main window. Click the business card record in the Data list and visually check the recognized result of the front side image.

You can correct the recognized data in this window. (See Chapter 5.)

Data list

Recognized data

• From the menu bar, select [View], and then select [Show duplex image] to change the display mode.

.

<Only for ScanSnap>

You can scan business cards by pressing the [Scan] button and save the records without starting CardMinder when you clear the "Show CardMinder window" checkbox under "Action when image scan complete" in the [General] tab of the "Settings" window. To display the "Settings" window, select [Tool] on the menu bar -> [Settings].(Refer to Section 6.1)

When you use the [SCAN] button to scan documents, you must select "Card-

Minder" from the [Application] drop-down list on the [Application] tab of S or

ScanSnap Manager (or ScanSnap Monitor) - Scan and Save Settings" in advance.

• Even if the name of persons and/or companies are not scanned correctly, those are stored in the database as they are. Please make sure that they are recognized correctly after scanning.

.

2. Select the business card data you wish to export.

Select multiple records by following the procedures below.

- If they are contiguous and you want to add them at one time: Select the records, while holding down the [Shift] key.
- If you want to add records one-by-one:
- Select them, while holding down the [Ctrl] key.
- 3. The following steps show an example using Microsoft Outlook. Click the [Microsoft Outlook] button on the toolbar.

- Data can also be exported by selecting [File] on the menu bar -> [Export].
- The set Export items of displayed items in the Recognized data area (except [Memo] and [Save date]) are exported to the associated application.
 Refer to Section 6.2 for setting the Export item.
- Refer to Help for mapping the items of the CardMinder business card records to the items of the application.
- You can drag and drop contacts (records) on the [Exported] tab to the [Inbox] tab while holding down the [Shift] key. You can, in turn, drag and drop those on the [Inbox] tab to the [Exported] tab while holding down the [Shift] key.
- In Microsoft[®] Outlook Express (Windows Mail in Windows Vista), ACT![™], and

 $\mathsf{GoldMine}^{\mathbb{R}},$ buttons display differently, but how to operate is exactly the same with Microsoft Outlook.

Exported contacts are stored in [Shared Contacts].

• When exporting data in the CSV (Excel) format, click the [CSV (Excel)] button and specify a file name and folder to save Excel data.

Exported Ap	plication file		? 🔀
Savejn: [My Documents		* +
Adobe	5		
File <u>n</u> ame:			<u>S</u> ave
Save as <u>t</u> ype:	CSV File(*.csv)	•	Cancel

The exported contacts are displayed on a sheet of the specified Excel file.

.

 . . .

........................

If data in languages that the operating system does not support is exported, characters may be displayed improperly.

e.g.) When attempting to display German in the Japanese operating system. To avoid this, export data in languages supported by the operating system.

 If there is exactly the same name exists in the associated application, the following message appears.

CardMinder				
?	The name "John Thomas Smith" already exists in the selected application's database. Select following option.			
	Add	<u>R</u> eplace	<u>C</u> ancel	A <u>b</u> ort

If you want to add it, click the [Add] button.

If you want to replace it, click the [Replace] button.

If you want to stop exporting all the business card data selected, click the [Abort] button.

If you want to cancel the exportation of the business card data that corresponds to the current message, click the [Cancel] button.

Chapter 4

Business Card Data Handling

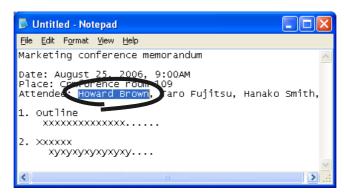

This chapter describes how to search, delete, restore, and extract business card records.

4.1 Data search by hot key	30
4.2 Deleting data from the [Inbox] / [Exported] tab	32
4.3 Restoring data from the [Trash] tab	33
4.4 Deleting data from the [Trash] tab	35
4.5 Deleting data from the [Mobile] tab	37
4.6 Extracting the business card image	39
4.7 Data search by keyword input	41
4.8 Attaching related files to the business card data	44
4.9 Viewing the business card's data on other PCs	47
4.10 Sending e-mail (Launching the e-mail program after specifying an e-mail address)	53
4.11 Activating Web Browser	55

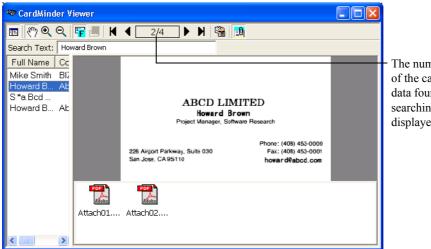

Data search by hot key 4.1

With CardMinder, you can search business card records including a character string specified on other application (such as Microsoft Notepad) windows. Follow the procedure below.

1. Select a character string that shows the name or the company of a contact in any document (e.g. Microsoft Notepad).

- 2. Press the hot key (Alt+F3).
 - \Rightarrow CardMinder starts searching automatically.
 - \Rightarrow When searching is complete, the CardMinder Viewer window opens and displays the business card record that includes the selected character string.

The number of the card data found by searching is displayed.

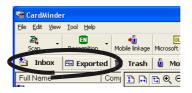

- The default setting for the hot key is the combination of [Alt] and [F3] keys. For how to change the hot key, refer to Section 6.1.
- By default, even when there is no matching character strings, "CardMinder Viewer" will be activated. In such cases, no image will be displayed on the Card-Minder Viewer, but you can continue searching by entering a keyword in the [Search Text:] box.
 If you do not want to activate "CardMinder Viewer" when there is no matching character strings, change the setting. For information on how to change settings, see Section 6.1, and how to search with "CardMinder Viewer," see Section 4.7.
- All records on all tabs; namely the [Inbox], [Exported], and [Mobile] tabs, are targeted for searching.
- As the default settings, Data List View and Attachment View are hidden.

If you want to show Data List View, click the 😐 button and to show Attachment View, click the 🛄 button.

Deleting data from the [Inbox] / [Exported] tab 4.2

To delete unnecessary business card records from the [Inbox] or [Exported] tab, follow the procedure below. The deleted records will be sent to the [Trash] tab.

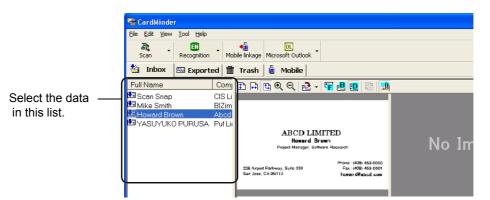

1. Open CardMinder and select the [Inbox] or [Exported] tab.

2. Select the record you want to delete.

If they are contiguous and you want to add them at one time: Select the records, while holding down the [Shift] key.

If you want to add records one-by-one: Select them, while holding down the [Ctrl] key.

3. Select [Edit] on the menu bar -> [Delete].

🖷 c	ardl	linder	r				
File	Edit	View	Tool	Help			
	Ur	ndo				1	4
9	a	ut		Ctrl+X		Mob	bile
2	C	ру		Ctrl+C		龠	1

⊡s	At	tached	file		۲	Li	
⊡ N ∭ F	Fi	nd		Ctrl+F		im :d	
ΞŶ	Se	elect All		Ctrl+A		Liı	

 $\bullet \bullet \bullet \bullet \bullet$ You can also delete records by: Pressing the [Delete] key on the keyboard, Drag and drop records to the [Trash] tab, Right-click on the selected record and select [Delete].

 \Rightarrow The selected records are sent from the [Inbox] tab or the [Exported] tab to the [Trash] tab. For information on how to restore them from the [Trash] tab, see Section 4.3.

Business Card Data Handling

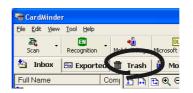

4.3 Restoring data from the [Trash] tab

To restore records from the [Trash] tab, follow the procedure below.

Restored records will be returned to their original location on the [Inbox] tab or the [Exported] tab.

1. Open CardMinder, and then select the [Trash] tab.

 \Rightarrow The deleted records are shown on the window.

2. Select records you want to restore from the [Trash] tab.

If they are contiguous and you want to add them at one time: Select the records, while holding down the [Shift] key.

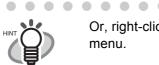

If you want to add records one-by-one: Select them, while holding down the [Ctrl] key.

3. Select [Edit] on the menu bar -> [Undo].

1	ardk	linder	ľ

	_						

Business Card Data Handling

Or, right-click on a record you want to restore, and select [Undo] from the menu.

 \Rightarrow The selected record moves from the [Trash] tab to either [Inbox] or [Exported] tab where the record was before it was put in the [Trash] tab.

4.4 Deleting data from the [Trash] tab

To permanently delete records from the [Trash] tab, follow the procedure below. If the record is permanently deleted, it cannot be restored by the procedure described in Section 4.3.

Select records to be deleted permanently

The record deleted from the [Trash] tab is completely deleted from the CardMinder database.

Be careful not to delete necessary records because those deleted from the [Trash] tab cannot be restored.

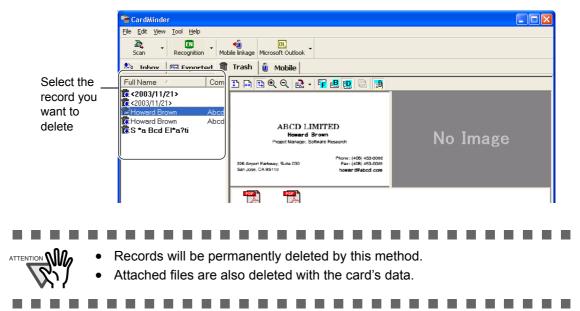

1. Open CardMinder and select the [Trash] tab.

2. Select the record you want to delete.

If they are contiguous and you want to add them at one time: Select the records, while holding down the [Shift] key.

If you want to add records one-by-one: Select them, while holding down the [Ctrl] key.

3. Select [Edit] on the menu bar, and then select [Delete].

1 1 1 1	ardk	linder	r				
File	Edit	View	Tool	Help			
	Ur	ndo				1	
9	a	ut		Ctrl+X		Mob	oile

č (At	tachel	nic.		•		
∭ F	Fi	nd		Ctrl+F		od Dod	
₿.s	Se	elect All		Ctrl+A			
	_						

You can also delete records by doing either of the following:

- Press the [Delete] key on your keyboard.
- Right-click on the selected business card record, and then select "Delete."

.

.

4. A confirmation message appears. Click on the [Yes] button.

 \Rightarrow Selected records in the [Trash] tab are deleted from the CardMinder database.

Empty [Trash]

> If you empty the [Trash] tab, all records are completely deleted from the Card-Minder database. Be careful not to delete necessary records because those deleted from the [Trash] tab cannot be restored.

1. Start CardMinder and select the [Trash] tab.

2. Select [File] on the menu bar, and then select [Empty Trash].

3. A confirmation message appears. Click the [Yes] button.

 \Rightarrow All records in the [Trash] tab will be deleted permanently from the CardMinder database.

4.5 Deleting data from the [Mobile] tab

To delete unnecessary business card records in the [Mobile] tab, follow the procedure below. By performing the procedure, the records are deleted from the [Mobile] tab.

However, the records in the [Mobile] tab are the links of the Business card records either in [Inbox] or in [Exported]. Deleting records from the [Mobile] tab still remains the original records in the respective tabs.

For information on how to use the [Mobile] tab, see Section 4.9.

1. Open CardMinder and select the [Mobile] tab.

Business Card Data Handling

4.6 Extracting the business card image

Business card images scanned with CardMinder are stored as PDF files, and therefore, you can extract them to attach to e-mail by doing the following:

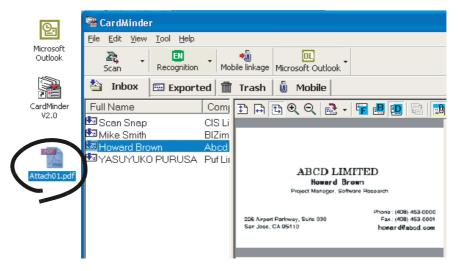

1. Select the contact (record) of which you want to extract the image from the Data List View.

2. Drag and drop a business card image from the CardMinder window to any folder in the Explorer or to your Desktop.

 \Rightarrow A PDF file of the business card will be created where you drop it.

- If the both sides of the business card images are displayed, only one side can be dragged at a time.
- When you drag and drop an image from the Business Card Image View, the business card front image is saved as "Full name (Front).pdf" and back image as "Full name(Back).pdf." If the name is not specified, it is saved as "Untitled (Front).pdf" or "Untitled (Back).pdf"

When you drag and drop a contact (record) from the Data List View, the created PDF file name will be "Full name.pdf." If the name is not specified, it will be "Untitled.pdf.

Note that character(s) that cannot be used for a file name (\, /, :, *, ?, ", <, >, |) are converted into "_ (under bar)."

e.g.) When the name specified is "Howard *Brown," the PDF file name will be "Howard _Brown.pdf"

3. You can attach the PDF file(s) (image data) to your e-mail by using your mailing software such as MicrosoftOutlook.

4.7 Data search by keyword input

With CardMinder or CardMinder Viewer, you can search for business card records by entering a keyword. Follow the procedure below.

Searching for business cards in CardMinder

1. Open CardMinder, and then select [Find] on the [Edit] menu.

2. The [Find] window appears. Enter a Name or a Company in the [Find what:] field, then click the [Find] button.

Find			X
Find what:	Brown		<u>F</u> ind
		Direction	Cancel
		⊂ <u>B</u> ack	Help

 \Rightarrow The search results of the business card will be displayed on the Main window. If there is no matching results, the "End of Search" message appears.

For further searching, enter a new name or a company in the [Find what:] field.

- You can use the following characters in the [Find what] box.
 You can use wildcard characters "*" and/or "?"
 You can do AND-search by using one-byte space instead of "AND."
 You cannot use the characters in the following parentheses in a search term. (I;#, ", [,],~, -, !)
 These characters, if used, will be converted to a wildcard character "?" automatically for searching the search term.
 [Direction] setting
 Back: Data List will be searched backward from the current record. Next: Data List will be searched forward from the current record.
 You can search for all records that include the search term you enter. Both the Name and Company on the business card are targeted for searching, and the results will be either Name(s) or Company(-ies) that matches your search term.
 Search targets are the whole records on the [Inbox], [Exported], [Trash], and
 - Search targets are the whole records on the [Inbox], [Exported], [Trash], and [Mobile] tabs.

Searching business card record in CardMinder Viewer

1. Open CardMinder Viewer, enter a Name or a Company in the [Search Text:] box, and press the [Enter] key.

🕸 CardMinder Viewer

- Records in the [Inbox] and [Exported] tabs cannot be copied at one time. First, copy records in either of the tab onto removable media, then copy those in the other tab.
- Dragging and dropping the records into the [Mobile] tab does not move the original ones. Contacts shown in the [Mobile] tab is the links of the original business card records in the [Inbox] and/or [Exported] tabs.
 Contacts in the [Mobile] tab is the links of the original business card records in the [Inbox] and/or [Exported] tabs. Therefore, the contacts shown in the [Mobile] tab will automatically be updated when the original records are modified. When the original records are deleted from the [Trash] tab, the links remain in the [Mobile] tab; when the [Trash] tab is emptied, the links are finally deleted from the [Mobile] tab.

Copying the business card's data to removable media

1. Start CardMinder, and then select the [Mobile] tab.

2. Connect the removable media to your personal computer.

 Removable media is used to save data. You can plug/unplug it to/from another personal computer as needed to use the data. Magneto-optic disks or Flash memory devices (via the USB interface, etc.) can be used for this purpose.

 $\bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet$

(* CD-R/RW, DVD-R/RW cannot be used for this purpose.)

- Removable media of 64 MB or more is recommended. (At least 8 MB of memory is required for the business card's data and viewer application.)
- Floppy disks cannot be used because they have less storage capacity.
- 3. From the [File] menu, select [Mobile linkage] or click the [Mobile linkage] button.

📽 CardMinder

 \Rightarrow The [Mobile linkage setting] window appears.

4. Configure the settings on the [Mobile linkage setting] window.

Mobile linkage s	etting				
Target data:	Mobile	•	Number of data:	5	
			Data volume:	XXX MB	Check disk space
Drive:	(M:)	•	Free disk space:	22 MB	
Data to transfer:	✓ Include image data				
	(Transfer	Cancel	Help		

Target data:

Select [Entire data], [Inbox], [Exported], or [Mobile], where the card's data you want to select is stored. All the business card's data in the specified tab is copied to the removable media, which you can specify following the procedure below.

Select [Mobile] to copy the card's data of the [Mobile] tab.

When any files exist in the [Mobile] tab, the default setting is "Mobile." When no files exist in the [Mobile] tab, the default setting is "Entire data."

Drive:

Select the drive to which you want to copy the selected cards' data. Click the $[\Psi]$ button to show the list, and then choose the available removable media.

Data to transfer:

Specify whether to include business card images in the data to copy.

• File size will increase when the graphic data of business cards is included. When there is not enough space on the removable media, unmark the [Include image data] checkbox.

Files attached to business cards are not be copied.

.

Number of data:

The number of selected business card records is indicated beside "Number of data."

Data volume:

When the [Check disk space] button is clicked, the total size of currently selected business card records is indicated beside "Data volume."

[Check disk space]

Click this button to calculate and display the total size of selected business card records beside "Data volume."

Free disk space:

Free space in the removable media (selected drive) is indicated. When the [Check disk space] button is clicked, free space in the removable media is indicated; free space is calculated based on the total size of currently selected business card records.

5. Click the [Transfer] button.

 \Rightarrow The copying of the selected business card recoreds is started.

- 6. When copying is complete, a confirmation message appears. Click the [OK] button.
- 7. Remove the removable media from your personal computer.

Utilizing the business card's data on removable media

- 1. Connect the removable media to another personal computer.
- 2. From the [Start] menu, select [My Computer].
- 3. Specify the removable media.
- 4. Double-click the [Second Viewer.exe] icon. \Rightarrow The [CardMinder Mobile Viewer] window will appear.
- 5. Enter a keyword in [Search Text:] to start searching business card data.

- You can use the following characters in the [Search Text] field.
- You can use wildcard characters "*" and/or "?"
- You can do AND-search by using one-byte space instead of "AND."
- You cannot use the characters in the following parentheses in the search term. (|, #, ", [,], ~, -, !)

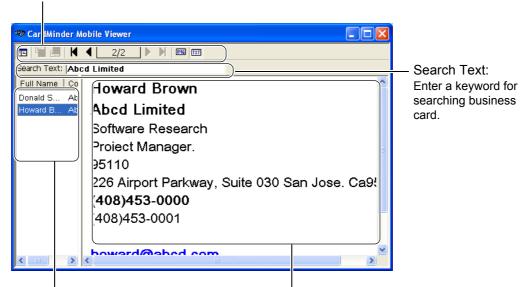

These characters, if used, will be converted to a wildcard character "?" automatically for searching the search term.

- You can search for all records including the search term you enter. Both the Name and Company on the business card are targeted for searching, and the results will be either Name(s) or Company(-ies) that matches your search term.
- Search targets are those records in the [BzCardViewr] folder.

 \Rightarrow The business card records will be displayed as search results.

Image Toolbar

The buttons used to adjust the image displayed in the Image View.

Data List View

The list of searched records. This window may be hidden and will be displayed when more than one business card is found.

Business Card Record View The record of the business card selected from Data List View.

You can display the Business card image by clicking the MB button. To use this function, you have to mark the "Data to transfer" checkbox to enable the "Include image data" setting in the "Mobile linkage setting" window.

Burror	n viewy	Function
	ie	Display or hide the Data List View.
	F	Display the front side image of the business card.
	B	Display the back side image of the business card. If no back side image exists, this button is disabled.
	•	Show the previous business card.
Image Toolbar		Show the next business card.
	K	Display the first business card.
	M	Display the last business card.
	IME	Display the image data of the business card. This button is enabled when the "Include image data" checkbox is marked on the "Mobile Linkage Setting."
	TXT	Display the character data of the business card.

Deleting the data from removable media

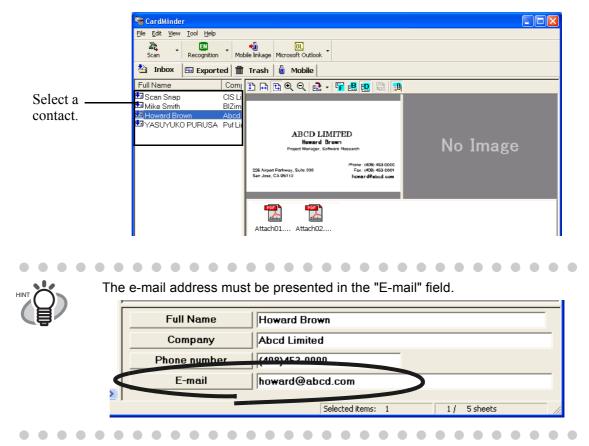

- 1. Connect the removable media to the personal computer you are using.
- 2. From the [Start] menu, select [My Computer].
- 3. Specify the removable media.
- Delete the following files and folder.
 Files: BzCardViewer.exe, autorun.inf
 Folder: [BzCardViewer] folder

Business Card Data Handling

4.10 Sending e-mail (Launching the e-mail program after specifying an e-mail address)

When e-mail addresses are on business cards scanned with CardMinder, you can launch an e-mail program and send e-mail to those addresses. Follow the procedure below to send e-mail.

1. Select a contact to whom you want to send e-mail from the data list of business cards.

- 2. Select [Tool] on the menu bar -> [E-mail], or right-click on the contact in the Data List View, and then select [E-mail].
 - ⇒ The [New Message] window of the mailer (E-mail program) installed in your computer pops up.

Business Card Data Handling

4.10 Sending e-mail (Launching the e-mail program after specifying an e-mail address)

The mailer or the "E mail" program that automatically used in the one apositied

The mailer or the "E-mail" program that automatically used is the one specified in Microsoft Internet Explorer.

To specify an "E-mail" program in Microsoft Internet Explorer, select [Tools] -> [Internet Options] -> the [Programs] tab, and then select the desired program from the "E-mail" drop-down list.

If the "E-mail" program does not work properly with CardMinder, please contact the manufacturer of the "E-mail" program to use.

4.11 Activating Web Browser

By using the Web browser, you can connect to the URL (Uniform Resource Locator) or the web site address on the business card image, which is scanned with CardMinder. Follow the procedure below to activate the Web browser.

1. Select a contact of which you want to connect to the web site with the browser.

 \Rightarrow The browser installed in your computer is activated and the web site is displayed.

Chapter 5

Correctiing Recognized Character data

The accuracy of text-recognition depends on the conditions of the business card to recognize; you may have to correct some recognition results. This chapter describes how to correct the recognition results.

Check the following before performing data correction:

- If the orientation of the characters in the front side is incorrect, correct the orientation by clicking the Rotate button as described in Section 1.4. Then try again.
- If the front side of the business card is shown on the right side (or lower side) of the Image View window, swap the images by clicking the Swap Images button ₽, and then try the recognition again (See Section 5.2).
- If photos or logos are too close to characters, incorrect recognition may occur. To avoid incorrect recognition, drag a rectangle to select only characters to recognize (Section 5.3 or 5.4), and then try the recognition again.
- Otherwise, correct characters manually.

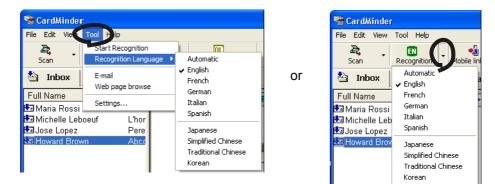

. Text recognition accuracy depends on the following: - Text layout on the business card - Font size of text - Style of the font - Conditions of the business card There may be other factors that affect recognition accuracy. 5.2 Recognizing the business card image again58 5.5 Correcting Recognition Results Manually......63

5.1 Selection of language

CardMinder supports English, German, French, Italian, Spanish, Chinese (Simplified/Traditional), Korean, and Japanese for character recognition.

To select a language manually, follow the procedure below before recognizing business cards.

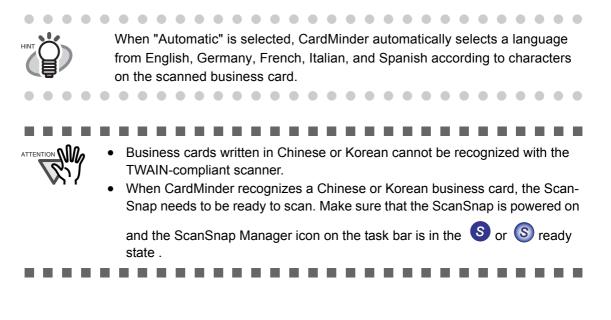

1. Select [Tool] - [Recognition Language] or click - beside the [Recognition] button.

2. Select a language from the pop-up list.

 \Rightarrow The selected language is marked and the setting is applied to the recognition.

5.2 Recognizing the business card image again

You can use the same procedure to correct the records in both the [Inbox] and [Exported] tabs. To correct records in the [Inbox], follow the procedure below.

1. Select the contact of which you want to recognize his/her business card image from the [Inbox] tab.

2. Click the [Recognition] button on the toolbar.

н

 \Rightarrow All characters are recognized. The previous recognition result is replaced by the new one.

5.3 Recognition by using Rectangle Selection

You can use the same procedure to correct the records in both the [Inbox] and [Exported] tabs.

1. Select the contact of which you want to recognize his/her business card image from the [Inbox] tab.

Only the selected part on the front or back side image of the business card can be recognized.

2. Select the part to be recognized on the front side image of the business card by dragging a rectangle with the mouse as shown below.

3. Click the [Recognition] button on the toolbar.

 \Rightarrow All characters in the selected part are recognized. The previous recognition result is replaced with the new one.

5.4 Keyword Recognition by using Rectangle Selection

This section describes how to recognize each keyword (field such as Full Name, Company, etc.) selected by dragging a rectangle over a keyword on the business card.

You can use the same procedure to correct the records in both the [Inbox] and [Exported] tabs.

1. Select the contact of which you want to recognize his/her business card image from the [Inbox] tab.

2. Specify the part to recognize on the front/back side image by dragging a rectangle

with the mouse as shown below. The following shows an example of how to correct misrecognized characters in the "Company" field.

• •

3. Click the [Company] button below the business card image.

 \Rightarrow The newly recognized characters appear in that field. The previous recognition result is replaced with the new one.

.

As you have done with the "Company" field, other fields can also be corrected following the procedure above. You can correct "Full Name," "Company," "Department," "Job title," "ZIP/Postal codes," "Address," "Phone number," "Fax number," "Mobile phone," "E-mail," "Web site address," and "Memo" fields.

You can use up to 60 double-byte characters or 120 single-byte characters in the "Memo" field.

.

5.5 **Correcting Recognition Results Manually**

The procedure for correcting records in the [Exported] tab is the same as for correcting those in the [Inbox] tab. How to correct records in the [Inbox] tab is described in the following example.

1. Select the contact of which you want to correct the business card image from the [Inbox] tab.

You can correct "Full Name," "Company," "Department," "Job title," "ZIP/ Postal codes," "Address," "Phone number," "Fax number," "Mobile phone," "E-mail," "Web site address," "Memo" fields.

5.6 Changing the Save Date

When you scan a business card with CardMinder, the date scanned is recorded as "Save date." The following procedure describes how to change the "Save date."

1. Select a contact (record) of which you want to change the save date from the Data list view.

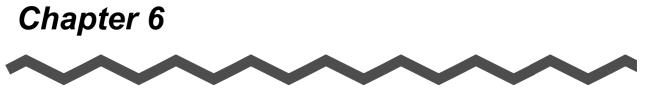

2. Click the Jutton next to the "Save date" field in the Recognition Result/Correction view.

Attach01 Attach02	•		Ju	ly, 2	006		Þ

 $\bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet$ If the "Save date" is not displayed in the Recognition result/Correction view, display it following the procedure below. 1. Select [Tool] in the menu bar and click [Settings]. 2. Select the [Export Items] tab in the [Settings] window. 3. Mark "Save date" in "Export Items Settings." 4. Click [OK] and close the [Settings] window. 3. Click the date to apply in the calendar. $\bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet$ You can change the date by entering numbers directly from the keyboard or

using the $[\uparrow]/[\downarrow]$ (Up/Down) keys after clicking in the "Save date" field.

Setting Preferences

This chapter describes how to set CardMinder preferences.

 6.1 General Settings of CardMinder
 67

 6.2 Export Item Settings
 70

CardMinder User's Guide | 66

6.1 General Settings of CardMinder

The general settings of CardMinder described in this chapter are as follows.

- •Action when image scan is complete
- •CardMinder Viewer options
- •Specifying the database file of CardMinder
- 1. Select [Tool] on the menu bar -> [Settings].

 \Rightarrow The [Settings] window appears.

2. Select the [General] tab.

You can configure various settings on this tab.

Settings		
General Export Item		
Action when image scan complete Show CardMinder window Export Business Card data automatically.		
CardMinder Viewer Hot <u>k</u> ey Alt + F3 Move cursor to the field and press the keys you want to use as Hot key combination. Action I ✓ Show jmage window when the card is not found.		
Database Database file C:\Documents and Settings\PFU\Application Data\PFU\CardMin Browse		
OK Cancel <u>H</u> elp		

Action when image scan is complete

•Show CardMinder window

The Main window and recognition result will be displayed after the [SCAN] button on the front of ScanSnap is pressed.

•Export Business Card data automatically

The recognized record is added to the database of CardMinder, and, at the same time, Card-Minder is associated with another application to which records are exported. The wrong names of persons or companies can be accidentally stored in your database. Therefore, this setting is not recommended unless you check that the added records are correct. On the Main window, by selecting [File] on the menu bar and [Export to] from the [File] menu, you can see which application is associated with CardMinder on the submenu. The currently selected application is marked with a check.

CardMinder Viewer

•Hot key

You use the hot key when performing automatic search with a keyword selected. To set a hot key, on your keyboard, press the key that you want to use as the hot key.

You can designate the key from [A] to [Z], [0] to [9], and [F2] to [F12]. Also, such keys as [Ctrl], [Shift], and [Alt] have to be followed by those keys.

Do not use the combinations of hot keys that are used for Windows as standard, such as [Alt] + [F4].

For example, the following combinations can be used:

[Ctrl]+[0], [Shift]+[Alt]+[A], [Ctrl]+[Shift]+[Alt]+[F2]

The combinations below and similar cannot be set as the hot key.

[9]+[F12], [Ctrl]+[Shift]

Action

The [Show image window when the card is not found] checkbox is marked by default. As long as it is marked, the CardMinder Viewer window becomes active even if there is no matching record. In such case, no business card image is shown, but you can continue searching by entering another keyword in the [Search Text] box.

With the checkbox cleared, the CardMinder Viewer window will not be displayed when there is no matching result.

Database

•Database file

The database file folder (Full path) of CardMinder can be specified in this field.

Click the [Browse] button, and specify a folder to save data in the "Browse for Folder" window.

By default, CardMinder saves data to the C: drive. The default folder is the following: When the operating system is Windows XP or Windows 2000

C:\Documents and Settings\<- Log-in User name->\Application Data\PFU\Card-Minder\ENTRY\ENTRYDB.BID

<- Log-in User name-> is defined according to the current user.

When the operating system is Windows Vista

C:\Users\<- Log-in User name>\AppData\Roaming\PFU\CardMinder\ENTRY\ ENTRYDB.BID

<- Log-in User name-> is defined according to the current user.

You do not have to change the folder to save the database under normal circumstances. However, if there is not enough space in the C: drive, change the path to save the data in another drive.

To make a backup copy of the database in CardMinder, exit CardMinder and then

copy the following file and folder to the folder designated to store the "Database file" as described above. File to be copied: **ENTRYDB.BID**

Folder to be copied: [ENTRYDB] folder

• Uninstalling CardMinder does not delete its database. However, it is recommended to make backup copies on a routine basis.

6.2 Export Item Settings

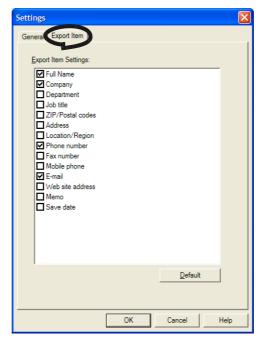

The Export item settings described in this section affect the following settings.

- •Settings of Recognition Result/Correction View
- Export items checked on the [Settings] window are displayed on the Recognition Result/ Correction View.
- •Settings of data items to be exported to another application linked with CardMinder. The fields of export items checked on the [Settings] window are exported to another application.
- 1. In the Main window, select [Tool] on the menu bar -> [Settings].

🖓 CardMinder

 \Rightarrow The [Settings] window appears.

2. Select the [Export Item] tab, and then mark the items you want to export. Clicking the [Default] button resets the settings.

Setting Preferences

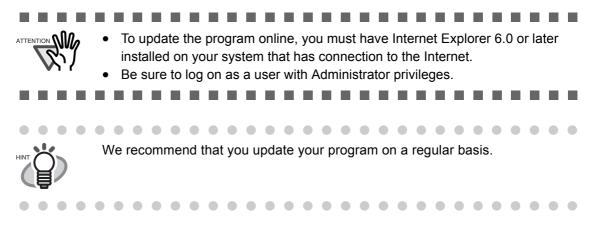

Chapter 7

Updating CardMinder Online

In this chapter, how to update CardMinder online is described.

In an effort to improve the usability and functionality of CardMinder, program updates are carried out timely.

On the Main window, CardMinder can check if the latest program (Update Pack) is available and update the program.

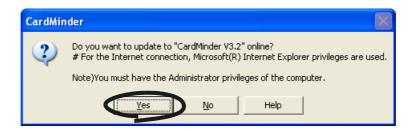

When updating CardMinder, follow the instructions below.

1. On the [Help] menu, select [Online Update].

 \Rightarrow A message window to confirm whether or not to update CardMinder online appears.

2. Click the [Yes] button.

 \Rightarrow If the latest Update program is available, a message window that asks you whether you want to download and install the program online appears.

After an online update interruption, if you retry the online update immediately, a message "Failed to download" appears and the operation may not be possible. This is because it takes some time to delete the half-downloaded file. Wait for a while and retry the online update.

In the case where the latest update is already installed, the message below appears.

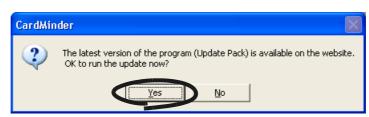

Click the [OK] button to close the message.

.

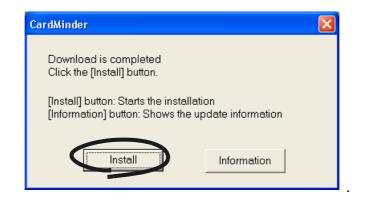

_ _ _ _ _ _

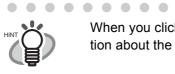

3. Click the [Yes] button.

 \Rightarrow The program download starts, and the confirmation window appears when it completes.

4. Click the [Install] button.

When you click the [Information] button, Internet Explorer opens and information about the latest update for CardMinder appears.

.

• •

 \Rightarrow Installation starts, and the "Welcome to InstallShield Wizard for CardMinder" window appears.

Follow the instructions on the screen to install.

Chapter 8

Troubleshooting

This chapter describes the troubleshooting.

No	Phenomena	Recommendation	
1	Scanning does not start	 ⇒ Check the following items <u>When using scanners other than the ScanSnap or the TWAIN-</u> <u>compliant scanners</u> CardMinder is not compatible with scanners other than the 	
		ScanSnap or the TWAIN-compliant scanners. When using ScanSnap	
		 When using ScanSnap Is ScanSnap Manager installed correctly? Refer to Getting Started of ScanSnap and install the ScanSnap Manager correctly. Is the ScanSnap icon on task bar shown as ? If so, set ScanSnap Manager by referring to the ScanSnap Operator's Guide, so that the icon of ScanSnap Manager changes to S or S. Is the [ScanSnap Manager] window opened? Scanning is disabled when the window [ScanSnap Manager] is opened. Close the window. Is the scanner supported by ScanSnap Manager? ScanSnap Manager does not support besides the ScanSnap Scanner series. 	
		When using a TWAIN scanner	
		 Is the scanner driver installed correctly? Refer to the scanner manual. Does the TWAIN scanner driver window remain on the screen? Close the TWAIN scanner driver window and then scan. Is the scanner supported by TWAIN driver? The scanner compliant with neither ScanSnap Manager nor TWAIN driver does not support CardMinder. 	

No	Phenomena	Recommendation
2	The scanned business card image is not displayed on the window.	⇒ Did you scan the right side of the business card? Follow the instructions in the scanner manual to set the card properly.
3	The image is scanned, but Full Name or Company does not appear or appear incorrectly on the Main window.	 ⇒ Check the following items. Is the image of the characters aligned horizontally? If not, correct the direction of the business card image by pressing , and press end on the toolbar. Are the front and back sides of the image switched? The name should appear on the front side. Swap the front and back side images of the business card by clicking and pressing end on the toolbar. (See Section 1.4 for button functions) Otherwise, try recognition again by referring to Section 5.1.
4	The recognition of images is not correct.	 ⇒ Check the following Do the characters and image contact with each other or aren't they too close to each other? Such characters cannot be recognized. Correct the data manually. (See Section 5.5.)
		 Is the color of the characters white and the background dark? Those characters cannot be recognized. Correct the data manually. (See Section 5.5.)
		 Are several phone numbers printed together as shown in the example? These phone numbers cannot be recognized. Please correct the data manually. (See Section 5.5.)
5	The items you wish to recognize do not appear on the window.	⇒ Select [Tool] on the menu bar -> [Settings] in the Main window. Then select the [Export Item] tab. Add the check mark next to the item you wish to recognize and export. (See Section 6.2.)

No	Phenomena	Recommendation
6	The original file is not modified even if the file attached to the business card data is modified.	⇒ When attached files are included in the business card data, they are copied and added to the database of CardMinder. Therefore, modifications made on the original file do not affect the attached file.
7	Characters on the scanned business card is not text- recognized correctly.	 ⇒ Verify the following: Aren't many handwritten characters on the card? If there are many handwritten characters on the card, the card is prone to incorrect recognition. Recognize each item sepa- rately using the [Recognition] button after selecting the incor- rectly scanned part. Otherwise, correct the characters by directly typing in with the keyboard. Aren't the background or the patterns overlapped? If the background or patterns overlap with the name or the address on the business card, the card is prone to incorrect rec- ognition. Recognize each item separately using the [Recogni- tion] button after selecting the incorrectly scanned part. Otherwise, correct the characters by directly typing in with the keyboard.
