AIRCRAFT PROFILE

AIRCRAFT CERTIFICATION AND OPERATIONAL APPROVAL

Aircraft Certification: If the Purchaser elects to meet the certification criteria other than those required for U.S. FAA FAR 23—Normal category (day, night, VFR, IFR), compliance may necessitate airframe modifications and additional systems. Certification Kits are, or will be, available to meet the type design requirements set forth by the relevant civil authority, at an additional charge.

Aircraft Operating Approval: The Purchaser is responsible for obtaining Aircraft operating approval from the relevant civil aviation authority. Additional equipment or airframe modifications, dependent upon the location and planned operations, may be identified by that authority (various regions within one country may have differing requirements).

International Certification: The Purchaser must furnish to Cessna the country of Aircraft registration, a properly assigned or designated aircraft registration with the applicable Artex ELT and Mode S code identification, and any additional equipment or systems (if different from those mandated by the FAA for a similar operational category) required for the category of registration intended (e.g., private, commercial).

The Purchaser is responsible for added Aircraft modifications and associated expense to comply with operational requirements. International Certification Kit information is available upon request.

AIRCRAFT EQUIPMENT REGISTRATION

The Purchaser must furnish to Cessna from the relevant civil aviation authority, the binary code and country protocol for operation of the Artex ELT and the binary Mode S Transponder.

PAINT

Cessna strives to select and use high quality polyurethane paints from the leading manufacturers. Polyurethane paints are used because of their high gloss characteristics and ability to withstand dramatic temperature and pressure changes. The paint will maintain its high gloss characteristics for an extended period of time provided it is cared for properly.

Paint warranty applies only to defect in material and workmanship for a period of one year. Paint deterioration due to normal wear, exposure, or improper care is not covered by the warranty.

Paint associated with amphibious floats is applied and warranted by Wipaire, Inc.

PAINT DESIGN

Customers may choose a standard scheme or a custom stripe design. The cost of custom designs is dependent on the complexity of the design, use of special paint, number of colors, and logos.

Paint definition required concurrently with other aircraft specifications.

The use of multi-color fades or blends is not available.

The use of metallic paint on the radar dome or as an overall base coat is not available.

PAINT COLORS

Contact Contract Administration for paint brochures.

Matterhorn White is the standard base color.

Please select stripe colors from the Dupont Aviation Colors paint brochure. Dupont Imron 6000 is the standard paint used on stripe designs.

REGISTRATION

Styling, color, and placement of the aircraft registration is restricted by the regulations of the country in which the aircraft will be registered. Styling options available, if allowed, include rounded vertical block, 30-degree slant, and shadows.

CARAVAN LOGOS

Choose the Caravan logo, or the Cessna logo. Logos may be painted or applied in decal. Standard location is on vertical fin, but dependent on stripe design.

<p><input type="checkbox"/> Cessna Technical Information Cessna provides a complete system of manuals and catalogs for the operation and maintenance of the Caravan. All Cessna and related technical information is listed in the Cessna Customer Care Supplies and Publications Catalog.</p> <p>The Caravan will come with a free Service Maintenance Manual, Illustrated Parts Catalog, Wiring Diagram Manual, Structural Repair Manual, Service Bulletins and Avionics Wiring Diagram on CD-ROM.</p>	<p>First Year No Charge. \$1175 per year subsequent. (\$85 International Subscription Surcharge). (\$46 Mexico Subscription Surcharge). (\$49 Canada Subscription Surcharge).</p>
<p><input type="checkbox"/> Caravan Phase Card Program The PhaseCard Program is an inspection program designed to reduce inspection labor requirements for Caravan aircraft that operate approximately 400 hours a year or more. It can be used as a progressive inspection program if the aircraft is operated under Part 91, or as the foundation of an Approved Aircraft Inspection Program (A.A.I.P.) when the aircraft is operated under Part 135.</p>	<p>\$2566 Initial Cost (includes first year revision). \$525 per year subsequent year revision.</p>
<p><input type="checkbox"/> CESCOM CESCOM was developed to provide owners and operators with an automated system for operational maintenance recording, scheduling, and control. It provides an accurate and simple method of monitoring and scheduling inspections, service bulletins, airworthiness directives, and scheduled and unscheduled maintenance.</p> <p>CESCOM builds permanent airplane records that reflect material cost and man-hour involvement and provides measures of maintainability and reliability. Long-range projections are also provided to assist owners and operators in budgeting for upcoming airplane operations.</p>	<p>On-Line Service First Year No Charge. \$1365 one year \$2520 two years \$3450 three years</p> <p>Paper Service Charge Provided Upon Request</p>
<p><input type="checkbox"/> Cessna Owner Advisory Cessna Owner Advisories provide owners of Cessna aircraft up-to-the-minute information about mandatory and beneficial service requirements and the latest in product improvements. Cessna Owner Advisories are mailed automatically to owners of U.S. registered Cessna aircraft using the latest name and address provided to the FAA.</p>	<p>After warranty expiration: International Subscribers \$44 Mexico Subscribers \$38</p>
<p><input type="checkbox"/> Open Account Information With an active open account, Caravan owners are able to purchase spare parts at the current published list price directly from Cessna Parts Distribution. The open account can also be used to purchase Cessna publications and other items.</p>	
<p><input type="checkbox"/> Altair Data Acquisition System & Turbine Tracker Cessna has chosen the Altair ADAS+ system as standard equipment on the Caravan to allow operators to easily monitor and maintain the aircraft engine. The ADAS+ system records specific engine parameters for later retrieval and transfer to the Turbine Tracker™ website. The Turbine Tracker™ website formats the data into customized reports for use as analysis tools.</p>	<p>First Year No Charge.</p>

Engine Condition Trend Monitoring (ECTM)

Cessna Aircraft Company is a Pratt & Whitney authorized Designated Analysis Center. Using Pratt & Whitney and Altair software programs Cessna can provide expert engine condition analysis.

First Year No Charge.
\$860 per year subsequent.

ECTM analysis is a process of taking data from the Altair ADAS+ Engine Monitoring System installed on the Caravan and electronically comparing them to a mathematical set of typical or predictable engine characteristics. Reports keep the operator informed of the internal condition of the engine. If anomalies are found the operator is immediately notified.

Engine trend monitoring allows for early detection of compressor and/or turbine deterioration, thereby minimizing secondary problems and overall repair costs. If implemented within the first 100 hours in service, or after completion of the hot section inspection, engine condition trend monitoring allows for hot section inspections to be accomplished on an "on condition" basis instead of at schedule recommended 1800-hour intervals. "On Condition" hot sections mean actual hot sections are accomplished only when necessary and this can significantly reduce operating costs. Additionally ECTM is a Pratt & Whitney requirement for the optional extended 6,000-hour TBO.

Pratt & Whitney Engine Maintenance Programs

- * Fleet Management Program (FMP[®])
- * Term Cost Plan (TCP[™])
- * Maintenance Cost Guarantee Plan (MCG[™])
- * Event Cost Plan (ECP)
- * Eagle Service Plan (ESP[®])
