A WARNING!

Use this appliance only for its intended purpose as described in this Owner's Manual.

SAFETY PRECAUTIONS

When using electrical appliances, basic safety precautions should be followed, including the following:

- This refrigerator must be properly installed and located in accordance with the Installation Instructions before it is used.
- Do not allow children to climb, stand or hang on the shelves in the refrigerator. They could damage the refrigerator and seriously injure themselves.
- Do not touch the cold surfaces in the freezer compartment when hands are damp or wet. Skin may stick to these extremely cold surfaces.
- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- Keep fingers out of the "pinch point" areas; clearances between the doors and between the doors and cabinet are necessarily small. Be careful closing doors when children are in the area.

- In refrigerators with automatic icemakers, avoid contact with the moving parts of the ejector mechanism, or with the heating element that releases the cubes. Do not place fingers or hands on the automatic icemaking mechanism while the refrigerator is plugged in.
- Unplug the refrigerator before cleaning and making repairs.

NOTE: We strongly recommend that any servicing be performed by a qualified individual.

- Setting either or both controls to the **Off** position does not remove power to the light circuit.
- Do not refreeze frozen foods which have thawed completely.

A DANGER! RISK OF CHILD ENTRAPMENT

PROPER DISPOSAL OF THE REFRIGERATOR

Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators are still dangerous...even if they will sit for "just a few days." If you are getting rid of your old refrigerator, please follow the instructions below to help prevent accidents.

Before You Throw Away Your Old Refrigerator or Freezer:

- Take off the doors.
- Leave the shelves in place so that children may not easily climb inside.

Refrigerants

All refrigeration products contain refrigerants, which under federal law must be removed prior to product disposal. If you are getting rid of an old refrigeration product, check with the company handling the disposal about what to do.

USE OF EXTENSION CORDS

Because of potential safety hazards under certain conditions, we strongly recommend against the use of an extension cord.

However, if you must use an extension cord, it is absolutely necessary that it be a UL-listed (in the United States) or a CSA certified (in Canada), 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 15 amperes (minimum) and 120 volts.

Troubleshooting Tips

Consumer Support

Installation

Safety Instructions

Safety Instructions

Operating Instructions

A WARNING!

HOW TO CONNECT ELECTRICITY

Do not, under any circumstances, cut or remove the third (ground) prong from the power cord. For personal safety, this appliance must be properly grounded.

The power cord of this appliance is equipped with a 3-prong (grounding) plug which mates with a standard 3-prong (grounding) wall outlet to minimize the possibility of electric shock hazard from this appliance.

Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded.

Where a standard 2-prong wall outlet is encountered, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

The refrigerator should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating plate.

C

USE OF ADAPTER PLUGS

Adapter plugs are not permitted in Canada.

This provides the best performance and also prevents overloading house wiring circuits which could cause a fire hazard from overheated wires.

Never unplug your refrigerator by pulling on the power cord. Always grip plug firmly and pull straight out from the outlet.

Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end.

When moving the refrigerator away from the wall, be careful not to roll over or damage the power cord.

١̈́

READ AND FOLLOW THIS SAFETY INFORMATION CAREFULLY.

Water Filter Cartridge

The water filter cartridge is located in the back upper right corner of the refrigerator compartment.

When to Replace the Filter

The filter cartridge should be replaced when the flow of water to the icemaker decreases, or every six months.

Installing the Filter Cartridge

- If you are replacing the cartridge, first remove the old one. Open the cartridge cover by pressing in on the tab at the front and pulling down.
- Remove the cartridge by slowly rotating it counterclockwise. A small amount of water may drip down.

CAUTION: If air has been trapped in the system, the filter cartridge may be ejected as it is removed. Use caution when removing.

- Remove the protective foil from the end of the cartridge.
- Lining up the arrow on the cartridge and the cartridge holder, slowly rotate the cartridge clockwise until it stops.
 When the cartridge is properly installed, you will feel it "click" as it locks into place.
 The grip on the end of the cartridge should be positioned vertically.
 Do not overtighten.

5 Close the cartridge cover.

Filter Bypass Plug

You must use the filter bypass plug when a replacement filter cartridge is not available. The icemaker will not operate without the filter or filter bypass plug.

Replacement Filters:

To order additional filter cartridges in the United States, visit our Website, ge.com, or call GE Parts and Accessories, 800.626.2002.

Filter Model GSWF

Customers in Canada should consult the yellow pages for the nearest Mabe Service Center.

Troubleshooting Tips

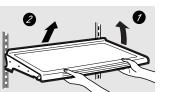

Not all features are on all models.

Rearranging the Shelves

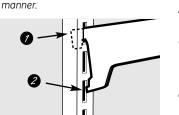

Shelves in the refrigerator compartment are adjustable.

Refrigerator Compartment

To remove:

Some models have wire shelves that can be adjusted in the same

Remove all items from the shelf.

- 2 Tilt the shelf up at the front.
- 3 Lift the shelf up at the back and bring the shelf out.

To replace:

2 Lower the front of the shelf until the bottom of the shelf locks into place.

Non-Adjustable Shelves on the Door (on some models)

To remove: Lift the shelf straight up; then pull out.

To replace: Engage the shelf in the molded supports on the door and push down. It will lock in place.

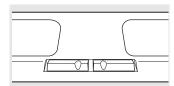

Operating Instructions

Installation Instructions Not all features are on all models.

Fruit and Vegetable Crisper

Excess water that may accumulate in the bottom of the drawers or under the drawers should be wiped dry.

Adjustable Humidity Crisper (on some models)

Slide the control all the way to the *HIGH* setting to provide high humidity recommended for most vegetables.

Slide the control all the way to the *LOW* setting to provide lower humidity levels recommended for most fruits.

Snack Pan (on some models)

This pan can be moved to the most useful location for your family's needs.

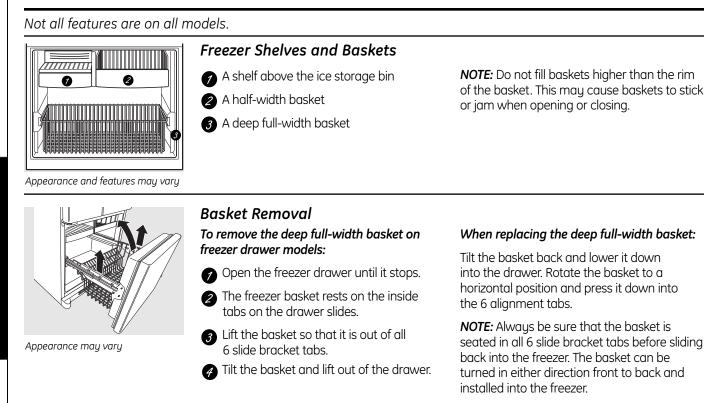

To remove, slide the pan out to the *stop* position, lift the pan up and past the *stop* position and lift it out.

Appearance may vary

About the freezer compartment. (on some models)

Not all features are on all models.

Freezer Shelf and Basket

- A full-width fixed wire shelf
- 2 A full-width sliding wire basket

NOTE: Do not fill basket higher than the rim of the basket. This may cause basket to stick or jam when opening or closing.

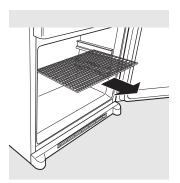

Basket Removal

To remove the full-width sliding wire basket on door models:

- Open the basket out to its full extension.
- 2 Lift up the front of the basket and pull straight out to remove.

When replacing the full-width sliding wire basket:

Insert the wire basket into the *lower* liner's rails and push back into place.

Fixed Shelf Removal

NOTE: The full-width wire shelf is not intended to slide.

To remove for cleaning:

Hold the shelf at the front and pull it firmly forward.

When replacing the full-width sliding wire shelf:

Insert the wire shelf into the *upper* liner's rails and push back into place.

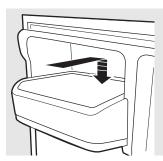

To remove

Non-Adjustable Shelf on Freezer Door

To remove: Lift the shelf straight up; then pull out.

To replace: Engage the shelf in the molded supports on the door and push down. It will lock in place.

To replace

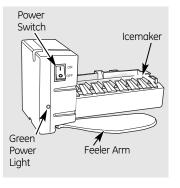

Safety Instructions

Operating Instructions

About the automatic icemaker. (on some models)

A newly installed refrigerator may take 12 to 24 hours to begin making ice.

Automatic Icemaker

The icemaker will produce seven cubes per cycle approximately 100–130 cubes in a 24-hour period, depending on freezer compartment temperature, room temperature, number of door openings and other use conditions.

See below for how to access ice and reach the power switch.

If the refrigerator is operated before the water connection is made to the icemaker, set the power switch in the **O** (off) position.

When the refrigerator has been connected to the water supply, set the power switch to the *I* (on) position. The icemaker power light will turn green when the freezer light switch is pressed in or when the freezer door is closed.

The icemaker will fill with water when it cools to 15°F (–10°C). A newly installed refrigerator may take 12 to 24 hours to begin making ice cubes.

Accessing Ice and Reaching the Power Switch

To reach the icemaker power switch, pull the shelf above the ice bin straight out. Always be sure to replace the shelf.

To access ice, simply pull the bin forward.

You will hear a buzzing sound each time the icemaker fills with water.

Throw away the first few batches of ice to allow the water line to clear.

Be sure nothing interferes with the sweep of the feeler arm.

When the bin fills to the level of the feeler arm, the icemaker will stop producing ice. It is normal for several cubes to be joined together.

If ice is not used frequently, old ice cubes will become cloudy, taste stale and shrink.

NOTE: In homes with lower-than-average water pressure, you may hear the icemaker cycle multiple times when making one batch of ice.

NOTE: Set the power switch to the **O (off)** position if the water supply is shut off.

To reach the power switch.

Icemaker Accessory Kit

If your refrigerator did not come already equipped with an automatic icemaker, an icemaker accessory kit is available at extra cost. Check the back of the refrigerator for the specific icemaker kit needed for your model.

Instructions

Troubleshooting Tips

Consumer Support

Installation

The door handles and trim. Clean with a cloth dampened with soapy water. Dry with a soft cloth. Do not use wax on the door handles and trim.

Keep the outside clean. Wipe with a clean cloth lightly dampened with kitchen appliance wax or mild liquid dish detergent. Dry and polish with a clean, soft cloth.

Do not wipe the refrigerator with a soiled dish cloth or wet towel. These may leave a residue that can erode the paint. Do not use scouring pads, powdered cleaners, bleach or cleaners containing bleach because these products can scratch and weaken the paint finish.

The stainless steel panels and door

handles. Stainless steel (on some models) can be cleaned with a commercially available stainless steel cleaner. A spray-on stainless steel cleaner works best.

Do not use appliance wax or polish on the stainless steel.

Cleaning the Inside

To help prevent odors, leave an open box of baking soda in the refrigerator and freezer compartments.

Unplug the refrigerator before cleaning.

If this is not practical, wring excess moisture out of sponge or cloth when cleaning around switches, lights or controls.

Use an appliance wax polish on the inside surface between the doors.

Use warm water and baking soda solution about a tablespoon (15 ml) of baking soda to a quart (1 liter) of water. This both cleans and neutralizes odors. Rinse and wipe dry. After cleaning the door gaskets, apply a thin layer of petroleum jelly to the door gaskets at the hinge side. This helps keep the gaskets from sticking and bending out of shape.

Avoid cleaning cold glass shelves with hot water because the extreme temperature difference may cause them to break. Handle glass shelves carefully. Bumping tempered glass can cause it to shatter.

Do not wash any plastic refrigerator parts in the dishwasher.

Troubleshooting Tips

Safety Instructions

11

Consumer Support

Behind the Refrigerator

Be careful when moving the refrigerator away from the wall. All types of floor coverings can be damaged, particularly cushioned coverings and those with embossed surfaces.

Raise the leveling legs located at the bottom front of the refrigerator.

Pull the refrigerator straight out and return it to position by pushing it straight in. Moving

the refrigerator in a side direction may result in damage to the floor covering or refrigerator.

Lower the leveling legs until they touch the floor.

When pushing the refrigerator back, make sure you don't roll over the power cord or icemaker supply line (on some models).

Preparing for Vacation

For long vacations or absences, remove food and unplug the refrigerator. Clean the interior with a baking soda solution of one tablespoon (15 ml) of baking soda to one quart (1 liter) of water. Leave the doors open.

Set the icemaker power switch to the **O (off)** position and shut off the water supply to the refrigerator.

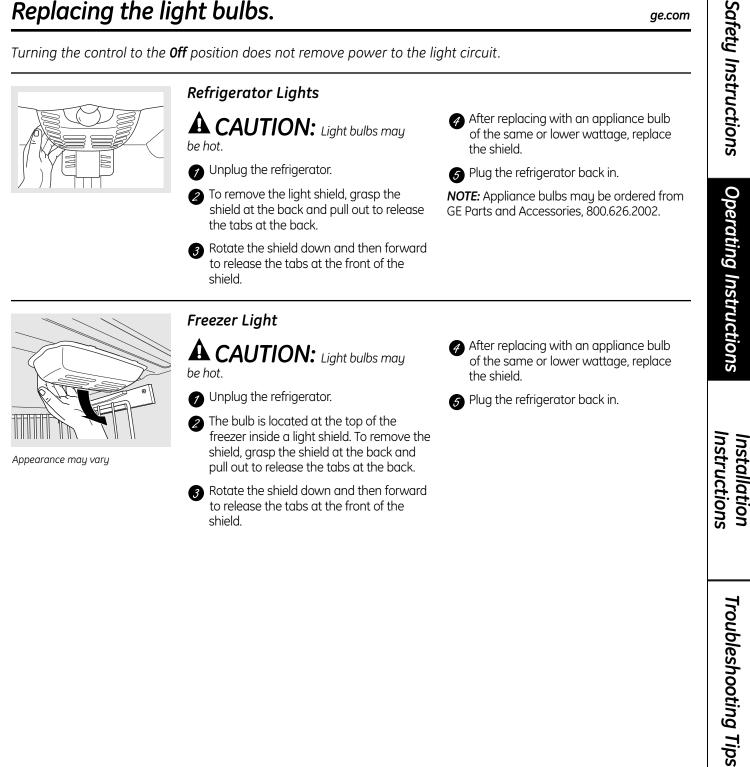

If the temperature can drop below freezing, have a qualified servicer drain the water supply system (on some models) to prevent serious property damage due to flooding.

Preparing to Move

Secure all loose items such as base grille, shelves and drawers by taping them securely in place to prevent damage.

When using a hand truck to move the refrigerator, do not rest the front or back of the refrigerator against the hand truck. This could damage the refrigerator. Handle only from the sides of the refrigerator. Be sure the refrigerator stays in an upright position during moving.

Turning the control to the **Off** position does not remove power to the light circuit.

BEFORE YOU BEGIN

Read these instructions completely and carefully.

- **IMPORTANT** Save these instructions for local inspector's use.
- **IMPORTANT** Observe all governing codes and ordinances.
- Note to Installer Be sure to leave these instructions with the Consumer.
- Note to Consumer Keep these instructions for future reference.
- **Skill level** Installation of this appliance requires basic mechanical skills.
- Completion time Refrigerator Installation 20 minutes Water Line Installation 30 minutes
- Proper installation is the responsibility of the installer.
- Product failure due to improper installation is not covered under the Warranty.

PREPARATION

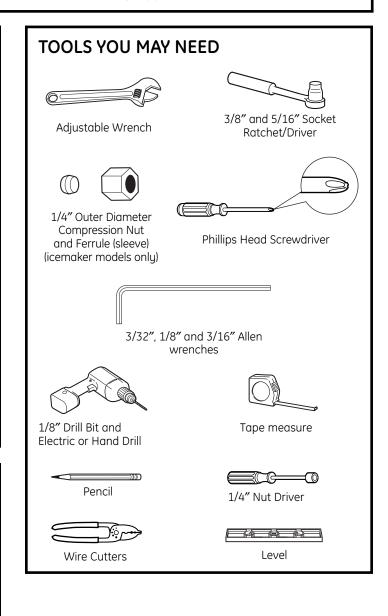

MOVING THE REFRIGERATOR INDOORS

If the refrigerator will not fit through a doorway, the refrigerator door and freezer drawer can be removed.

- To remove the refrigerator door, see Step 1 in the *Reversing the Door Swing* section.
- To remove the freezer drawer, see the *Removing the Freezer Drawer* section.

WATER SUPPLY TO THE ICEMAKER AND DISPENSER (ON SOME MODELS)

If the refrigerator has an icemaker, it will have to be connected to a cold water line. A GE water supply kit (containing tubing, shutoff valve, fittings and instructions) is available at extra cost from your dealer, by visiting our Website at **ge.com** (in Canada at **www.geappliances.ca**) or from Parts and Accessories, 800.626.2002 (In Canada 1.888.661.1616).

INSTALLING THE REFRIGERATOR

REFRIGERATOR LOCATION

- Do not install the refrigerator where the temperature will go below 60°F (16°C) because it will not run often enough to maintain proper temperatures.
- Do not install the refrigerator where the temperature will go above 100°F (37°C) because it will not perform properly.
- Install it on a floor strong enough to support it fully loaded.

CLEARANCES

Allow the following clearances for ease of installation, proper air circulation and plumbing and electrical connections.

Sides Top Back

Standard Depth Models 1/8" (3 mm) 1" (25 mm)

1" (25 mm)

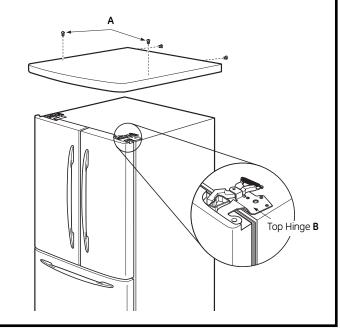

REMOVE TOP CAP (on some models)

- IMPORTANT NOTE: This refrigerator is 34-1/2" deep. Doors and passageways leading to the installation location must be at least 36" wide in order to leave the doors and handles attached to the refrigerator while transporting it into the installation location. If passageways are less than 36", the refrigerator doors and handles can easily be scratched and damaged. The top cap and doors can be removed to allow the refrigerator to be safely moved indoors. Start with Step A.
- If it is not necessary to remove doors, skip Step A. Leave tape and all packaging on doors until the refrigerator is in the final location.
- SKID REMOVAL: Tilt refrigerator to each side to remove skid.
- NOTE: Use a padded hand truck to move this refrigerator. Place the refrigerator on the hand truck with a side against the truck. We strongly recommend that TWO PEOPLE move and complete this installation.
- A Locate and remove the two Phillips head screws on the top of the refrigerator. Remove the two screws on each side at the rear of the top cap. Lift off and remove top cap.
- **B** Remove the fresh-food door(s). Refer to Steps 1 and 3 of "Reversing the Door Swing" section or Steps 1 and 2 of "Removing the Doors" section.
- C Remove the bottom freezer drawer or door. Refer to "Removing Freezer Drawer" section or Step 2 of "Reversing the Door Swing" section.
- D Move refrigerator to the installation location.

REMOVE TOP CAP (cont.) (on some models)

REINSTALL DOORS, DRAWERS AND TOP CAP

- E Carefully lower the door(s) onto the center hinge(s). Reinstall top hinge(s). **NOTE:** Ensure the door is properly aligned to the case top to avoid readjustment of the door during top cap reinstallation.
- F Place cap over the top of the refrigerator. Reinstall the original screws in the top and back of the cap.
- **G** Reinstall the bottom freezer drawer or door. Refer to "Replacing the Freezer Drawer" section or Step 8 of "Reversing the Door Swing" section.

1 CONNECTING THE REFRIGERATOR TO THE HOUSE WATER LINE (icemaker models)

A cold water supply is required for automatic icemaker operation. If there is not a cold water supply, you will need to provide one. See *Installing the Water Line* section.

NOTES:

- Before making the connection to the refrigerator, be sure the refrigerator power cord is not plugged into the wall outlet.
- If your refrigerator does not have a water filter, we recommend installing one if your water supply has sand or particles that could clog the screen of the refrigerator's water valve. Install it in the water line near the refrigerator. If using GE SmartConnect[™] Refrigerator Tubing Kit, you will need an additional tube (WX08X10002) to connect the filter. Do not cut plastic tube to install filter.

Download from Www.Somanuals.com. All Manuals Search And Download.

INSTALLING THE REFRIGERATOR (cont.)

1 CONNECTING THE REFRIGERATOR TO THE HOUSE WATER LINE (cont.)

A If you are using copper tubing, place a compression nut and ferrule (sleeve) onto the end of the tubing coming from the house cold water supply.

If you are using the GE SmartConnect[™] tubing, the nuts are already assembled to the tubing.

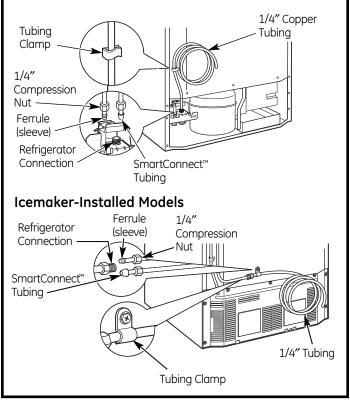

B If you are using copper tubing, insert the end of the tubing into the refrigerator connection, at the back of the refrigerator, as far as possible. While holding the tubing, tighten the fitting.

If you are using GE SmartConnect[™] tubing, insert the molded end of the tubing into the refrigerator connection, at the back of the refrigerator, and tighten the compression nut until it is hand tight. Then tighten one additional turn with a wrench. Overtightening may cause leaks.

C Fasten the tubing into the clamp provided to hold it in position. You may need to pry open the clamp.

One of the illustrations below will look like the connection on your refrigerator.

Icemaker-Ready models

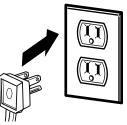

2 TURN ON THE WATER SUPPLY (icemaker models)

Turn the water on at the shutoff valve (house water supply) and check for any leaks.

3 PLUG IN THE REFRIGERATOR

On models with an icemaker, before plugging in the refrigerator, make sure the icemaker power switch is set to the **O (off)** position.

See the grounding information attached to the power cord.

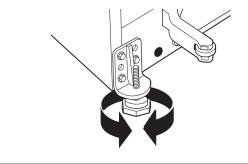

4 PUT THE REFRIGERATOR IN PLACE

Move the refrigerator to its final location.

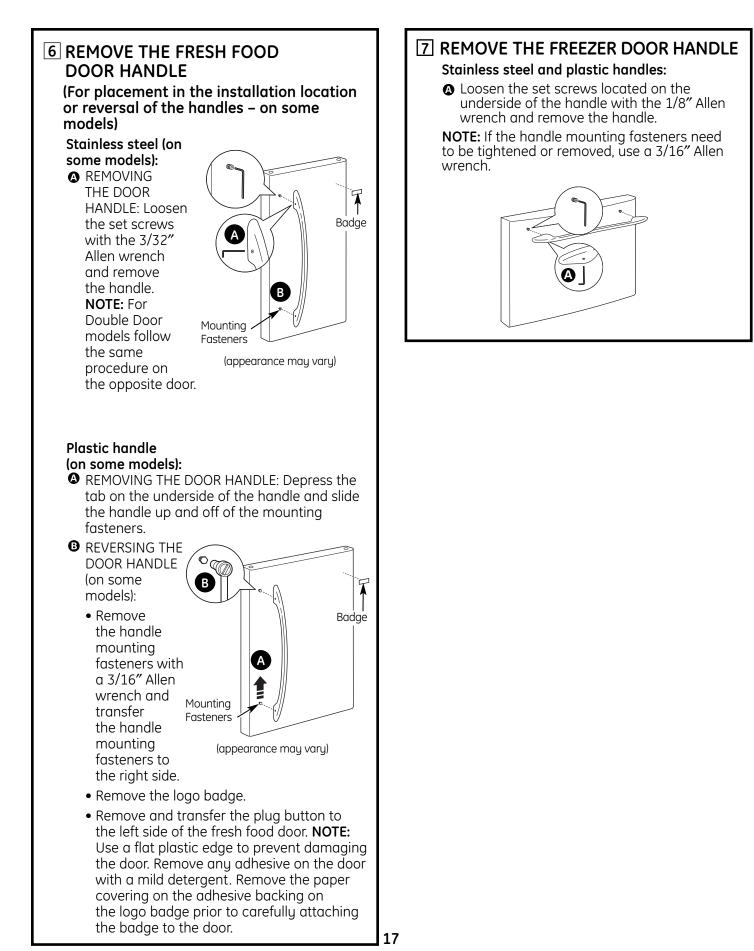

5 LEVEL THE REFRIGERATOR

Adjustable legs at the front corners of the refrigerator should be set so the refrigerator is firmly positioned on the floor, and the front is raised just enough that the door closes easily when opened about halfway.

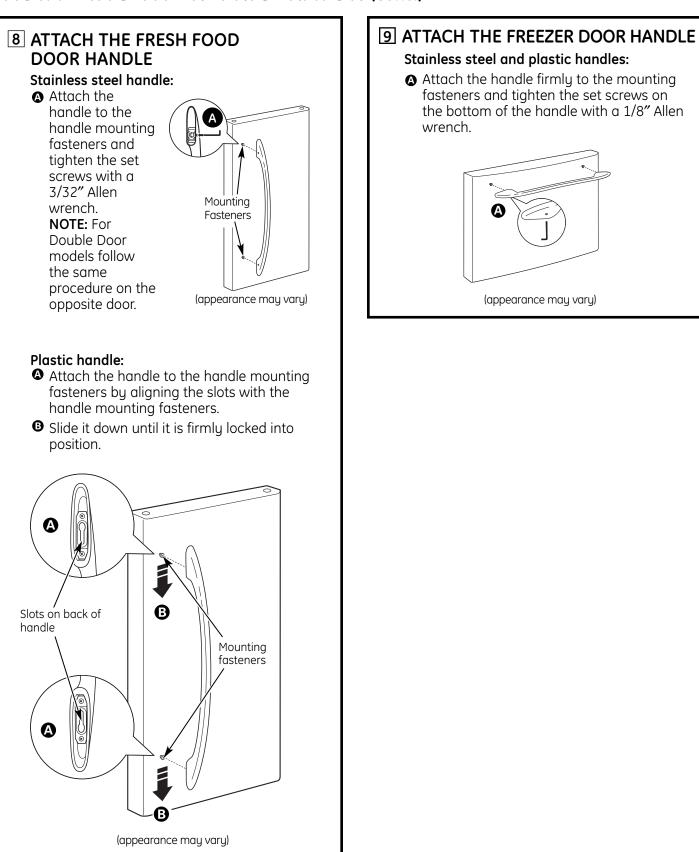

To adjust the leveling legs, turn the legs clockwise to raise the refrigerator, counterclockwise to lower it.

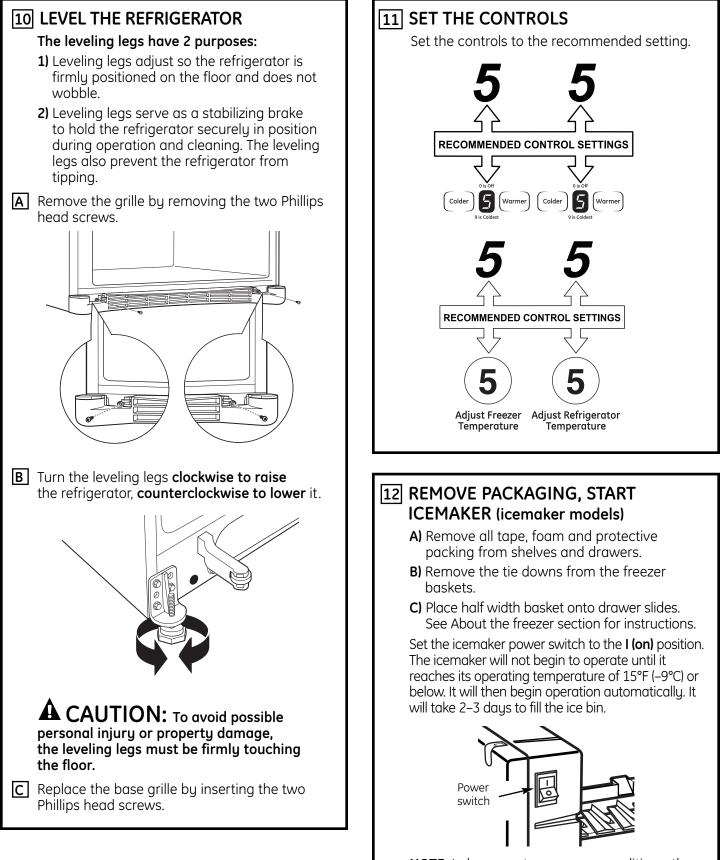

16

INSTALLING THE REFRIGERATOR (cont.)

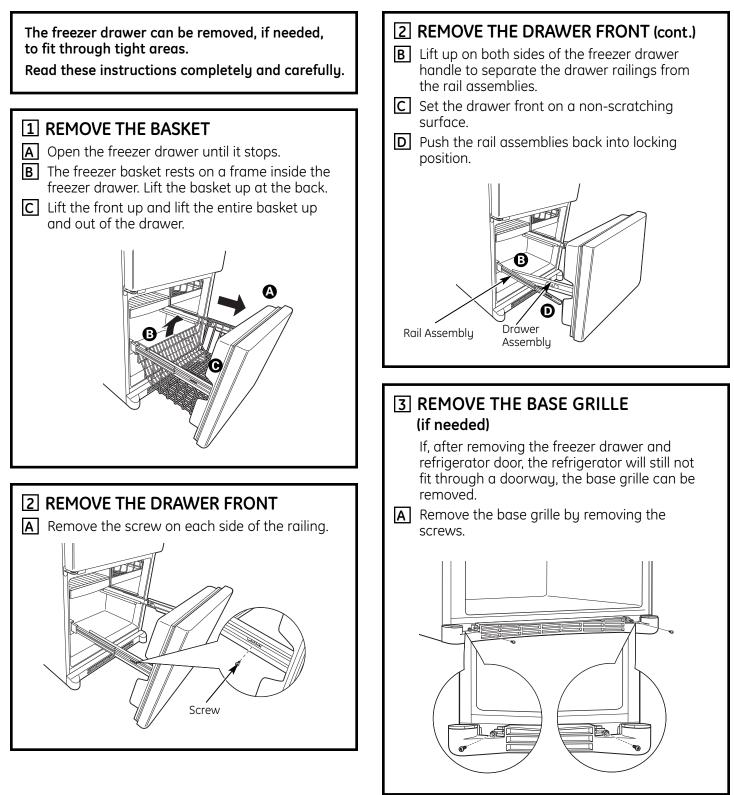

NOTE: In lower water pressure conditions, the water valve may turn on up to 3 times to deliver enough water to the icemaker.

19

REMOVING THE FREEZER DRAWER (on some models)

Installation Instructions

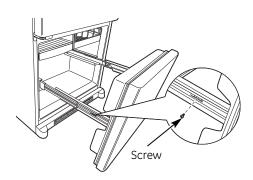

REPLACING THE FREEZER DRAWER (on some models)

Two people may be required to complete (\mathbf{I}) this procedure. 1 ATTACH AND SECURE THE DRAWER FRONT TO THE SLIDES A Pull out the rail assemblies to the full length on each side of the cabinet. **B** Locate the slots on the inside of the rail assemblies near the back. Slot Rail assembly **C** Insert the hooks at the back of the drawer railings into the slots on the rail assemblies. **D** Lower the front of the drawer, making sure the tabs on the sides of the railings fit into the front slots in the rail assemblies. O

Slot

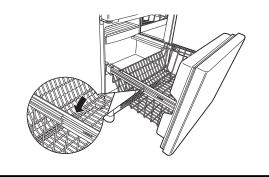

⊢Tab **D**

- 1 ATTACH AND SECURE THE DRAWER FRONT TO THE SLIDES (cont.)
- **E** Replace the screws on both rail assemblies.

2 REPLACE THE FREEZER BASKET

Replace the lower freezer basket by lowering it into the frame.

REVERSING THE DOOR SWING (Single Door Refrigerator Models only)

IMPORTANT NOTES

When reversing the door swing:

NOTE: Door swing is not reversible on stainless steel models.

- Read the instructions all the way through before starting.
- Parts are included in the door hinge kit.
- Handle parts carefully to avoid scratching paint.
- Set screws down by their related parts to avoid using them in the wrong places.
- Provide a non-scratching work surface for the doors.

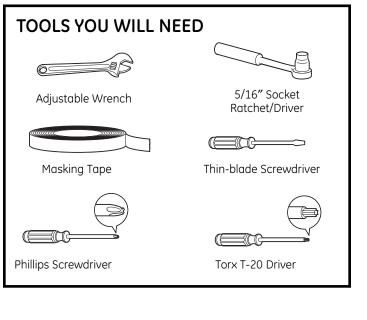

IMPORTANT: Once you begin, do not move the cabinet until door-swing reversal is completed.

These instructions are for changing the hinges from the right side to the left side—if you ever want to change the hinges back to the right side, follow these same instructions and reverse all references to left and right.

• Once door swing is finalized, ensure the logo badge is properly aligned and permanently secured to the door by removing the adhesive cover on the back side. **NOTE:** A replacement logo badge is included in the hinge kit.

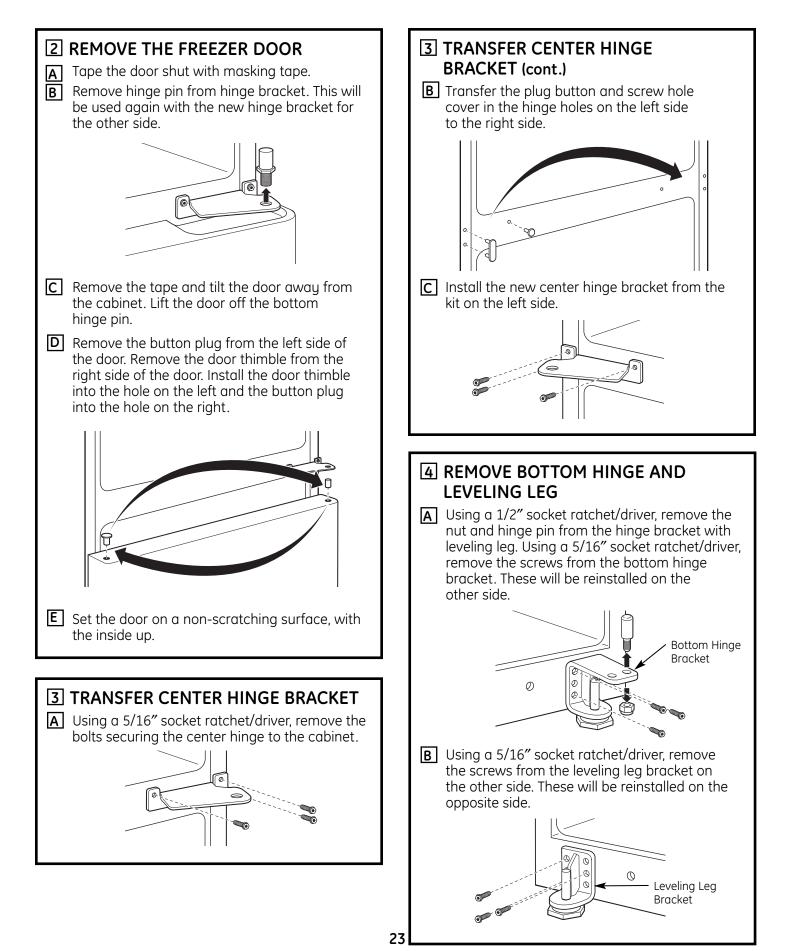

Unplug the refrigerator from its electrical outlet.

Empty all door shelves, including the dairy compartment.

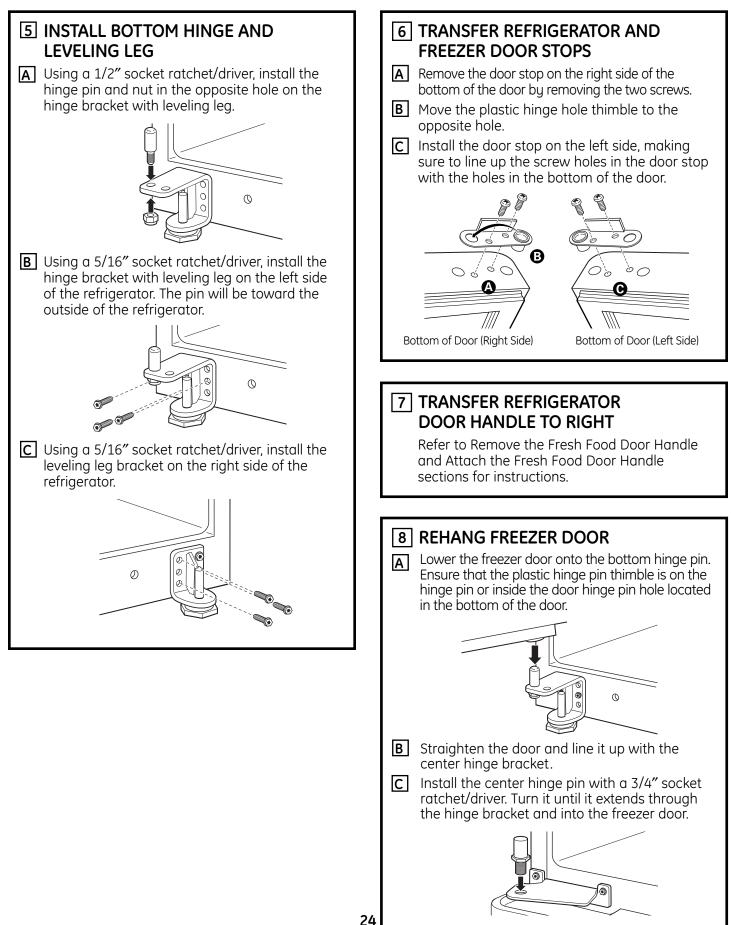

1 REMOVE THE **REFRIGERATOR DOOR A** Tape the door shut with masking tape. **B** Remove the hinge cover on top of the refrigerator door by carefully prying it up with a putty knife, if necessary. C Using a 5/16" socket ratchet/driver, remove the bolts securing the top hinge to the cabinet. Then lift the hinge straight up to free the hinge pin from the socket in the top of the door. **D** Carefully remove the door thimble from inside the socket. This will be used again when reinstalling the door on the other side. ß Hinge Cover Top Hinge œ Door Thimble D **E** Remove the tape and tilt the door away from the cabinet. Lift the door off the center hinge pin. Ensure that the plastic hinge pin thimble remains on the hinge pin or inside door hinge pin hole located in the bottom of the door. **F** Set the door on a non-scratching surface with

the inside up.

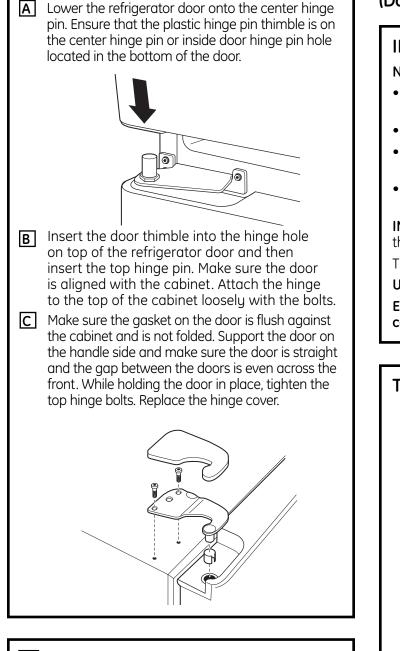

Download from Www.Somanuals.com. All Manuals Search And Download.

REVERSING THE DOOR SWING (cont.)

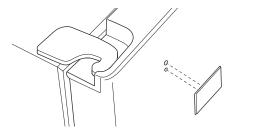

Download from Www.Somanuals.com. All Manuals Search And Download.

9 REHANG REFRIGERATOR DOOR

10 INSTALL THE LOGO BADGE

Remove the adhesive backing paper and align the pins on the back of the badge with the holes in the door. Apply pressure to the badge to ensure it sticks to the door.

REMOVING THE DOORS

(Double Door Refrigerator Models only)

IMPORTANT NOTES

NOTE: Door swing is not reversible.

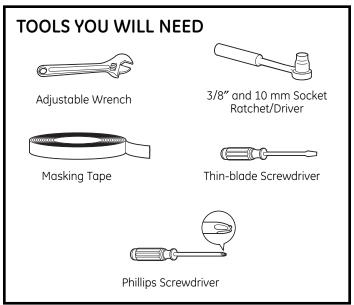

- Read the instructions all the way through before starting.
- Handle parts carefully to avoid scratching paint.
- Set screws down by their related parts to avoid using them in the wrong places.
- Provide a non-scratching work surface for the doors.

IMPORTANT: Once you begin, do not move the cabinet.

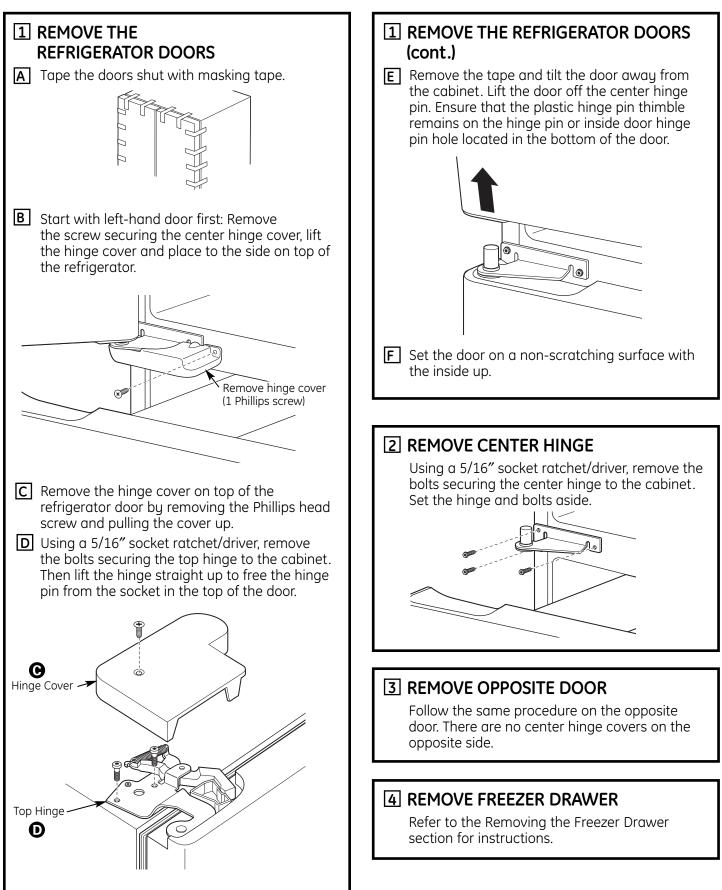

These instructions are for removing the doors.

Unplug the refrigerator from its electrical outlet.

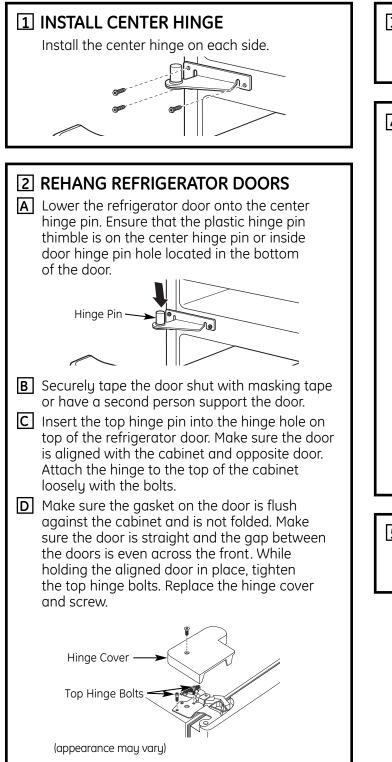

Empty all door shelves, including the dairy compartment.

REMOVING THE DOORS (Double Door Refrigerator Models only)

REPLACING THE DOORS (Double Door Refrigerator Models only)

3 REPLACE OPPOSITE DOOR

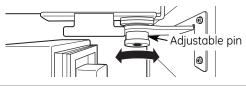

Follow the same procedure on the opposite door. There is no water line or hinge cover.

4 ALIGN DOUBLE DOORS

If the top of the doors are uneven, first try to raise the lowest door by turning the leveling leg on the same side as the door until the doors are even. If the unit rocks, re-adjust the leveling legs to the extent that the unit is stable.

If the doors remain uneven, turn the adjustable pin to raise, or lower, the left door to match the right door. Use a 1/4" Allen wrench to turn the pin.

5 REPLACE FREEZER DRAWER

Refer to the Replacing the Freezer Drawer section for instructions.

INSTALLING THE WATER LINE (ICEMAKER MODELS)

BEFORE YOU BEGIN

Recommended copper water supply kits are WX8X2, WX8X3 or WX8X4, depending on the amount of tubing you need. Approved plastic water supply lines are GE SmartConnect[™] Refrigerator Tubing (WX08X10006, WX08X10015 and WX08X10025).

When connecting your refrigerator to a GE Reverse Osmosis Water System, the only approved installation is with a GE RVKit. For other reverse osmosis water systems, follow the manufacturer's recommendations.

If the water supply to the refrigerator is from a Reverse Osmosis Water Filtration System AND the refrigerator also has a water filter, use the refrigerator's filter bypass plug. Using the refrigerator's water filtration cartridge in conjunction with the RO filter can result in hollow ice cubes.

This water line installation is not warranted by the refrigerator or icemaker manufacturer. Follow these instructions carefully to minimize the risk of expensive water damage.

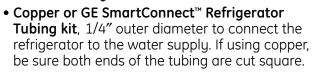

Water hammer (water banging in the pipes) in house plumbing can cause damage to refrigerator parts and lead to water leakage or flooding. Call a qualified plumber to correct water hammer before installing the water supply line to the refrigerator. To prevent burns and product damage, do not hook up the water line to the hot water line.

If you use your refrigerator before connecting the water line, make sure the icemaker power switch is in the **O (off)** position.

Do not install the icemaker tubing in areas where temperatures fall below freezing.

When using any electrical device (such as a power drill) during installation, be sure the device is double insulated or grounded in a manner to prevent the hazard of electric shock, or is battery powered. All installations must be in accordance with local plumbing code requirements.

WHAT YOU WILL NEED

To determine how much tubing you need: measure the distance from the water valve on the back of the refrigerator to the water supply pipe. Be sure there is sufficient extra tubing to allow the refrigerator to move out from the wall after installation.

GE SmartConnect™ Refrigerator Tubing Kits are available in the following lengths:

6' (1.8 m) – WX08X10006 15' (4.6 m) – WX08X10015 25' (7.6 m) – WX08X10025

WHAT YOU WILL NEED (CONT.)

NOTE: The only GE approved plastic tubing is that supplied in GE SmartConnect[™] Refrigerator Tubing kits. Do not use any other plastic water supply line because the line is under pressure at all times. Certain types of plastic will crack or rupture with age and cause water damage to your home.

- A GE water supply kit (containing tubing, shutoff valve and fittings listed below) is available at extra cost from your dealer or from Parts and Accessories, 800.626.2002 (in Canada 1.888.261.3055).
- A cold water supply. The water pressure must be between 20 and 120 p.s.i. (1.4–8.1 bar).

- Power drill.
- 1/2" or adjustable wrench.
- Straight and Phillips blade screwdriver.

• Two 1/4" outer diameter compression nuts and 2 ferrules (sleeves)—to connect the copper tubing to the shutoff valve and the refrigerator water valve.

OR

• If you are using a GE SmartConnect[™] Refrigerator Tubing kit, the necessary fittings are preassembled to the tubing.

 If your existing copper water line has a flared fitting at the end, you will need an adapter (available at plumbing supply stores) to connect the water line to the refrigerator OR you can cut off the flared fitting with a tube cutter and then use a compression fitting. Do not cut formed end from GE SmartConnect[™] Refrigerator tubing.

• Shutoff valve to connect to the cold water line. The shutoff valve should have a water inlet with a minimum inside diameter of 5/32" at the point of connection to the COLD WATER LINE. Saddletype shutoff valves are included in many water supply kits. Before purchasing, make sure a saddle-type valve complies with your local plumbing codes. Install the shutoff valve on the nearest frequently used drinking water line.

1 SHUT OFF THE MAIN WATER SUPPLY

Turn on the nearest faucet long enough to clear the line of water.

2 CHOOSE THE VALVE LOCATION

Choose a location for the valve that is easily accessible. It is best to connect into the side of a vertical water pipe. When it is necessary to connect into a horizontal water pipe, make the connection to the top or side, rather than at the bottom, to avoid drawing off any sediment from the water pipe.

3 DRILL THE HOLE FOR THE VALVE

Drill a 1/4" hole in the water pipe (even if using a self-piercing valve), using a sharp bit. Remove any burrs resulting from drilling the hole in the pipe.

Take care not to allow water to drain into the drill.

Failure to drill a 1/4" hole may result in reduced ice production or smaller cubes.

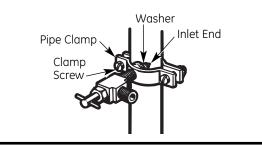

INSTALLING THE WATER LINE (CONT.)

FASTEN THE SHUTOFF VALVE Fasten the shutoff valve to the cold water pipe with the pipe clamp. Pipe Clamp Pipe Clamp Saddle-Type Sutoff Valve Vertical Cold Water Pipe Shutoff Valve NOTE: Commonwealth of Massachusetts Plumbing Codes 248CMR shall be adhered to. Saddle valves are illegal and use is not permitted in Massachusetts. Consult with your licensed plumber.

5 TIGHTEN THE PIPE CLAMP

Tighten the clamp screws until the sealing washer begins to swell.

NOTE: Do not overtighten or you may crush the tubing.

6 ROUTE THE TUBING

Route the tubing between the cold water line and the refrigerator.

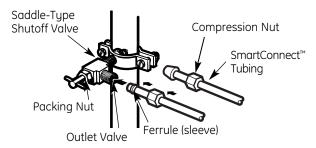

Route the tubing through a hole drilled in the wall or floor (behind the refrigerator or adjacent base cabinet) as close to the wall as possible.

CONNECT THE TUBING TO THE VALVE

Place the compression nut and ferrule (sleeve) for copper tubing onto the end of the tubing and connect it to the shutoff valve.

Make sure the tubing is fully inserted into the valve. Tighten the compression nut securely.

For plastic tubing from a GE SmartConnect[™] Refrigerator Tubing kit, insert the molded end of the tubing into the shutoff valve and tighten compression nut until it is hand tight, then tighten one additional turn with a wrench. Overtightening may cause leaks.

NOTE: Commonwealth of Massachusetts Plumbing Codes 248CMR shall be adhered to. Saddle valves are illegal and use is not permitted in Massachusetts. Consult with your licensed plumber.

B FLUSH OUT THE TUBING

Turn the main water supply on and flush out the tubing until the water is clear.

Shut the water off at the water valve after about one quart (1 liter) of water has been flushed through the tubing.

To complete the installation of the refrigerator, go back to Step 1 in *Installing the Refrigerator*.

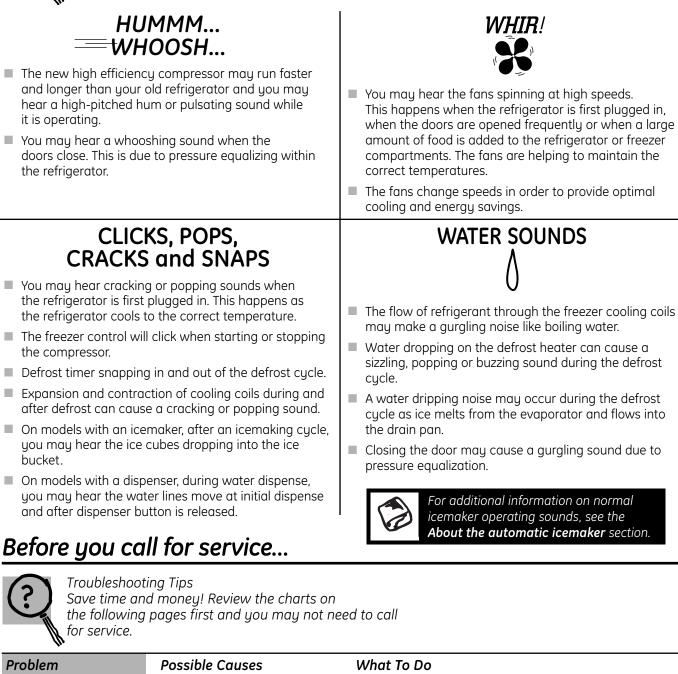

Normal operating sounds.

Troubleshooting Tips

Troubleshooting Tips

Problem	Possible Causes	What To Do			
No ice cube production	Supply line or shutoff valve is clogged.	• Call a plumber.			
(on some models)	Water filter clogged.	• Replace filter cartridge or remove filter and install plug.			
	Filter cartridge not properly installed.	 Remove and reinstall filter cartridge, being certain the it locks into place. The blade on the end of the cartri should be positioned vertically. 			
Handle is loose / handle has a gap	Handle needs adjusting.	• See Attach the Fresh Food Door Handle and Attach the Freezer Door Handle sections for detailed instructions.			
Refrigerator beeping	This is the door alarm.	• Close door.			
Control setting is not lit	On some models, the light bulbs at the top of the refrigerator compartment light up the temperature control settings.	 If the control settings do not light up, check to see if the light bulbs are burned out, and replace if necessary 			
Refrigerator doors are not even (on Double Door models only)	Doors need realigning.	• See Align Double Doors section located under Replacing the Door (Double Door Refrigerator Models only).			
Baskets stick or jam when opening or closing	Baskets are too full.	 To open: remove some of the products from the basket when opened as far as possible. Readjust the products left in the basket and try to open the basket again. To close: readjust products in the basket or remove any product that is above the rim of the basket and close the basket. 			

GE Service Protection Plus[™]

GE, a name recognized worldwide for quality and dependability together with Assurant Solutions, offers you Service Protection Plus[™]—comprehensive protection on your appliances.*

Benefits Include:

- Prompt, reliable service from GE Authorized Servicers
- Convenient hours designed to suit your busy schedule
- Quality replacement parts
- The dependability of GE, a name recognized and trusted worldwide
- Ask about our interest-free payment plans

With Service Protection Plus you can expect:

- An extended service plan that limits unexpected repair bills
- Service coverage for most major brands
- Unlimited service calls for the length of your contract, or credit toward a replacement product
- Service coverage for covered operating parts and labor on appliances and home electronics that fail during normal single family household use
- Your satisfaction is our goal. We strive to provide you with excellent service in a professional and timely manner.

Place your confidence in GE and call us in the U.S. toll-free at **1.800.626.2224** for more information.

*Most brands covered up to 15 years old in the continental U.S. SPP is a trademark of General Electric Company.

Troubleshooting Tips

Consumer Support

For The Period Of: GE Will Replace:

GE and GE PROFILE MODELS:

One Year From the date of the original purchase	Any part of the refrigerator which fails due to a defect in materials or workmanship. During this limited one-year warranty, GE will also provide, free of charge , all labor and related service to replace the defective part.
Thirty Days (Water filter, if included) From the original purchase date of the refrigerator	Any part of the water filter cartridge which fails due to a defect in materials or workmanship. During this limited thirty-day warranty , GE will also provide, free of charge , a replacement water filter cartridge.

GE PROFILE MODELS ONLY:

Five Years	Any part of the sealed refrigerating system (the compressor, condenser, evaporator
(GE Profile models only)	and all connecting tubing) which fails due to a defect in materials or workmanship.
From the date of the	During this limited five-year sealed refrigerating system warranty, GE will also provide,
original purchase	free of charge, all labor and related service to replace the defective part in the sealed
	refrigerating system.

What GE Will Not Cover:

- Service trips to your home to teach you how to use the product.
- Improper installation, delivery or maintenance.
- Failure of the product if it is abused, misused, or used for other than the intended purpose or used commercially.
- Loss of food due to spoilage.
- Replacement of house fuses or resetting of circuit breakers.
- Damage caused after delivery.

- Replacement of the water filter cartridge, if included, due to water pressure that is outside the specified operating range or due to excessive sediment in the water supply.
- Replacement of the light bulbs, if included, or water filter cartridge, if included, other than as noted above.
- Damage to the product caused by accident, fire, floods or acts of God.
- Incidental or consequential damage caused by possible defects with this appliance.
- Product not accessible to provide required service.

EXCLUSION OF IMPLIED WARRANTIES—Your sole and exclusive remedy is product repair as provided in this Limited Warranty. Any implied warranties, including the implied warranties of merchantability or fitness for a particular purpose, are limited to one year or the shortest period allowed by law.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within the USA. If the product is located in an area where service by a GE Authorized Servicer is not available, you may be responsible for a trip charge or you may be required to bring the product to an Authorized GE Service location for service. In Alaska, the warranty excludes the cost of shipping or service calls to your home.

Some states do not allow the exclusion or limitation of incidental or consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are, consult your local or state consumer affairs office or your state's Attorney General.

TERMS AND CONDITIONS:

This warranty applies only for single family domestic use in Canada when the Refrigerator has been properly installed according to the instructions supplied by Mabe and is connected to an adequate and proper utility service.

Damage due to abuse, accident, commercial use, and alteration or defacing of the serial plate cancels all obligations of this warranty.

Service during this warranty period must be performed by an Authorized Mabe Service Agent.

Neither Mabe nor the Dealer is liable for any claims or damages resulting from failure of the Refrigerator or from service delays beyond their reasonable control.

To obtain warranty service, purchaser must present the original Bill of Sale. Components repaired or replaced are warranted through the remainder of the original warranty period only.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within Canada. In home warranty service will be provided in areas where it is available and deemed reasonable by Mabe to provide.

WHAT IS NOT COVERED:

- Owner is responsible to pay for service calls related to product installation and/or teaching how to use the product.
- Damage to finish must be reported within 48 hours following the delivery of the appliance.
- Damage to finish after delivery.
- Improper installation—proper installation includes adequate air circulation to the refrigeration system, adequate electrical, plumbing and other connecting facilities.
- Replacement of house fuses or resetting of circuit breakers.
- Replacement of light bulbs.
- Damage to product caused by accident, fire, floods or acts of God.
- Loss of food due to spoilage.
- Proper use and care of product as listed in the owner's manual, proper setting of controls.
- Product not accessible to provide required service.
- WARRANTOR IS NOT RESPONSIBLE FOR CONSEQUENTIAL DAMAGES.

This warranty is in addition to any statutory warranty.

EXCLUSION OF IMPLIED WARRANTIES—Your sole and exclusive remedy is product repair as provided in this Limited Warranty. Any implied warranties, including the implied warranties of merchantability or fitness for a particular purpose, are limited to one year or the shortest period allowed by law.

IMPORTANT

Keep this warranty and your bill of sale as proof of original purchase and purchase date. Please have serial number and model number available when calling for service.

Mabe Service is available coast to coast. If further help is needed concerning this warranty, contact: Manager, Consumer Relations Mabe Canada Inc., Consumer Service 1 Factory Lane, Suite 310 Moncton, New Brunswick E1C 9M3 1.800.561.3344

Staple your receipt here. Proof of the original purchase date is needed to obtain service under the warranty.

* Tested using a flow rate of 0.5 gpm; pressure of 60 psig; pH of 7.5 ± 0.5; temp. of 68° ± 5°F (20° ± 3°C)

** Measurement in Particles/ml. Particles used were 0.5-1 microns

*** NTU=Nephelometric Turbiditu units

Operating Specifications

■ Capacity: certified for up to 750 gallons (2,838 l); up to six months

■ Pressure requirement: 40–120 psi (2.8–8.2 bar)

■ Temperature: 33–100°F (0.6–38°C)

■ Flow rate: 0.5 gpm (1.9 lpm)

General Installation/Operation/Maintenance Requirements

- Flush new cartridge at full flow for 3 minutes to purge out trapped air.
- Replace cartridge when flow becomes too slow.

Special Notices

- Installation instructions, parts and service availability, and standard warranty are included with the product when shipped.
- This drinking water system must be maintained according to manufacturer's instructions, including replacement of filter cartridaes.
- Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cust reduction may be used on disinfected water that may contain filterable custs.
- The contaminants or other substances removed or reduced by this water treatment system are not necessarily in your water. ■ Check for compliance with the state and local laws and regulations.
- Note that while the testing was performed under standard laboratory conditions, actual performance may vary. Systems must be installed and operated in accordance with manufacturer's recommended procedures and quidelines.

System tested and certified by NSF International against Standard 42 for the reduction of chlorine, taste and odor, particulate Class I and Standard 53 for the reduction of cyst, lead, Lindane, Atrazine and turbiditu.
