

Your new GE telephone system is EXPANDABLE up to a total of 4 handsets (by purchase of optional Model 25902 handset with charge cradle)

Equipment Approval Information

Telephone Network and is in compliance with parts 15 and 68. FCC Rules and Regulations and the Technical Requirements for Telephone Terminal Equipmen published by ACTA.

1 Notification to the Local Telephone Company On the bottom of this equipment is a label indicating, among other information, the

US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company. The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone numbe is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modulo plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details

telephone company

- This equipment may not be used on coin service provided by the telephone
- Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
- Notice must be given to the telephone company upon permanent disconnection of your telephone from your line
- If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this product does not disable your alarm equipment. If you have guestions about what will disable glarm equipment consult your telephone company or a qualified installer

Rights of the Telephone Company Should your equipment cause trouble on v our line which may harm the telephon network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such

temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations. The telephone company may make changes in its communications facilities

equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to

Interference Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired This equipment has been tested and found to comply with the limits for a Class B.

digital device pursuant to Part 15 of the ECC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation This equipment generates, uses, and can radiate radio frequency energy and, if not

installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation Privacy of Communications may not be ensured when using this product.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measure • Reorient or relocate the receiving antenna (that is, the antenna for radio or television

- that is "receiving" the interference). Reorient or relocate and increase the separation between the telecommunications equipment and receiving antenna.
- Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected.

If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal ommunications Commission has prepared a helpful booklet. "How To Identify and Resolve Radio/TV Interference Problems "This booklet is available from the LLS. Government Printing Office, Washington, D.C. 20402, Please specify stock number 004-000-00345-4 when ordering copies

Notice: The changes or modifications not expressly approved by the party responsible for apliance could void the user's authority to operate the equipment.

Hearing Aid Compatibility (HAC)

This telephone system meets FCC standards for Hearing Aid Compatibility

Licensing

Licensed under US Patent 6,427,009.

FCC RF Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body. This transmitter must not be co-located or operated in conjunction with any other antenna

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines when used with the belt clip supplied with this product. Use of other

ELECTRICAL SHOCK HAZARD, DO NOT RODUCT TO RAIN

Introduction

CAUTION: When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY NSTRUCTIONS provided with this product and save them for future reference

IMPORTANT: Because cordless phones operate on electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home

bracket

Digital Security System

Your cordless phone uses a digital security system to protect against false ringing, unauthorized access, and charges to your phone line. INSTALLATION NOTE: Some cordless telephones operate

at frequencies that may cause or receive interference with nearby TVs, microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave ovens, or VCR. If such interference continues. move the cordless telephone farther away from these

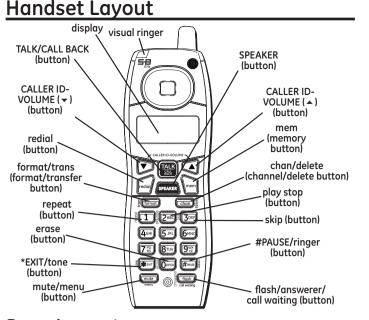

Certain other communications devices may also use the 5.8 GHz / 900 MHz frequency for communication, and, if not properly set these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the owner's manual for these devices on how to properly set channels to avoid interference. Typical devices that may use the 5.8 GHz frequency for communication include wireless audio/video senders, wireless computer networks, multi-handset cordless telephone systems, and some long-range cordless telephone systems.

Important Installation Guidelines

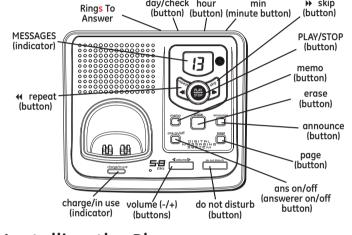

- Avoid sources of noise and heat, such as motors, fluorescent lighting, microwave ovens, heating appliances and direct sunlight.
- Avoid areas of excessive dust, moisture and low temperature. • Avoid other cordless telephones or personal computers.
- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations
- Never touch non-insulated telephone wires or terminals, unless the
- telephone line has been disconnected at the network interface.

• Use caution when installing or modifying telephone lines.

Before You Begin

- 1. Repeat steps 1 through 6 in Storing a Name and Number in Memory. 2. Press the redial button.
- 3 Press the mem button and **REPLACE MEMO?** shows in the display
- 4. Press the mem button again to replace the old number with the new number. You will hear a confirmation tone.

Inserting a Pause in the Dialing Sequence of a Stored Number If a pause is needed to wait for a dial or access tone press the #PAUSE/

ringer button to insert a delay in dialing sequence of a stored number (for example, after you dial 9 for an outside line, or to wait for a computer access tone). Pause shows in the display as a P. and each pause counts as one digit in the dialing sequence.

Changing a Stored Number 1. Repeat steps 1 through 7 in Storing a Name and Number in Memory.

- 2. Press the mem button, and **REPLACE MEMO?** shows in the display.
- 3. Press the mem button to store the number. You will hear a confirmation

Reviewing and Deleting Stored Numbers 1. To review stored numbers, press the mem button, and use the CALLER

- ID-VOLUME (▲ or ▼) button to scroll to the memory location, or press the corresponding number key for a desired memory location (0-9).
- 2. When the number that you want to delete shows in the display, press the chan/delete button. The display shows **DELETE?**. 3. Press chan/delete again to delete the data. The display shows **DELETED**.
- Dialing a Stored Number

1. Make sure the phone is $\bf ON$ by pressing the TALK/CALL BACK button.

- 2. Press the mem button.
- 3. Press the memory location (0-9). The number dials automatically - OR -
- 1. Make sure the phone is OFF (not in TALK mode).
- 2. Press the mem button.
- 3. Use the touch-tone pad or the CALLER ID-VOLUME (▲ or ▼) button to scroll to the number you want to dial.
- 4. Press the TALK/CALL BACK or SPEAKER button. The number dials automatically

Chain Dialing from Memory Each handset can store up to ten 24-digit numbers with up to 15-character

Use this feature to make calls which require a sequence of numbers, such as calling card calls to a frequently called long distance number. Each part of the sequence is dialed from memory. The following example shows you how to use chain dialing to make a call through a long distance service:

The Number For	Memory Location
Long distance access number	7
Authorization code	8
Frequently called long distance number	9

- 1. Make sure the phone is **ON** (in TALK or SPEAKERPHONE mode). 2 Press the mem button and then press 7
- 3. When you hear the access tone, press the mem button and then press 8.
- 4. At the next access tone, press the mem button and then 9
- TIP: Wait for the access tones before pressing the next mem button, or your call may not go through.

Answering System Operation

This section discusses the buttons and features on the answering system.

Messages Indicator

The messages indicator shows you how many messages you have received, and blinks when there are new messages. The ans on/off button must be ON You should erase some messages so the answering system can record new in order for the messages indicator to work.

NOTE: The answering system displays "--" when it is turned off.

Screening Calls from the Base

- 1. Wait for the caller to begin leaving a message (to determine who is
- 2. To speak to the caller, pick up the handset, and press the TALK/CALL BACK

- The answering system automatically stops recording when you activate the handset or pick up an extension phone **Another Location**
- to hear your incoming calls

Message Playback

The messages indicator on the base lets you know when you have messages. To play messages, press PLAY/STOP. While a message is playing, you may do the following:

- Press PLAY/STOP to stop the message playback
- Press and release **∢** repeat to restart the current message; continue The remote feature lets you perform the following functions pressing and releasing ◀ repeat to review previous messages.
- Press and release >> skip to go to the next message. Review message

record new messages.

Memory Full

Erasing Messages You may erase messages three ways: one message at a time from the base; all messages from the base or one message at a time from the handset or a phone in another location

When the answering system memory is full the system answers after 10

rings. You should erase some messages so the answering system may

To erase one message at a time from the base:

- Press PLAY/STOP. The message plays. Press and release the erase button.
- To erase all reviewed messages from the base: Press and hold the erase button until the unit beeps.
- To erase a message from the handset: • Press flash/answerer/call waiting button to enter into the handset remote

NOTE: Erased messages cannot be restored.

- access operation • Press PLAY/STOP on the handset (the 2 button). The message plays.
- Press erase (the 0 button) to erase the message during message playback.

Leavina a Memo

- Use the memo feature to leave a message 1. Press and hold the memo button on the base. You must hold the button
- until you finish recording the memo.
- 2. Begin speaking after you hear the beep. 3. Release the memo button when finished.

Remote Access

You may access the answering system with the cordless handset or from any tone-dial compatible telephone.

Cordless Handset

1. Press the flash/answerer/call waiting button to access the answering 2. Use the corresponding handset keys just like you would use the base

buttons (see Answering System Setup). The button functions are located

- on the handset above each number key. For example, to play messages: • Press the flash/answerer/call waiting button. The display shows ANSWERER REMOTE
- Press 2 (PLAY/STOP).
- When you are finished listening to your messages, press the flash/answerer/call waiting button again

Screening Calls from the Handset

Use the handset to screen calls even when you can't hear the answering

- When the answering system picks up:
- 1. Press the flash/answerer/call waiting button to access the answering
- 2. Listen as the caller leaves a message.
- 3. Press the TALK/CALL BACK button to speak to the person or press the flash/answerer/call waiting button to stop screening the call.

Memory Full

When answering system memory is full, the system answers after 10 rings, beeps and waits for you to enter the 3-digit security code. If you don't enter the security code within 10 seconds, the phone hangs up.

NOTE: The unit also answers after the 10th ring if it is turned off. To access the answering system, enter your 3digit security code after you hear the beep.

Accessing the Answering System from

- 1. Dial the telephone number to which the answering system is connected
- 2. Enter the security code after you hear the tone
- 3. Follow the voice menu to use the answering system's remote functions.
- rechargeable battery (or batteries). Press this Button For more information go to the RBRC web site at www.rbrc.org or call 1-800-8-BATTERY or contact a local recycling center. Play back messages Display Messages
- Stop message playback Erase message 0 (during message playback) Skip message Turn off/on answerer Review voice menu options
- TIP: You can bypass the outgoing announcement by pressing any numbered key on the touch-tone pad while the announcement is playing. Then, you can enter your security code to access the answering system.

Changing the Security Code

- The default security code for accessing the answering system from another ocation is 1 2 3. You must use the handset to change the security code. With the phone OFF (not in TALK mode), follow these steps: 1. Press the flash/answerer/call waiting button to display **ANSWERER**
- 2. Press the *EXIT/tone button.
- 3. Enter the new 3-digit security code.
- 4. Press the *EXIT/tone button again. The unit announces the new code, pauses, beeps, and then announces the menu options again.

Headset and Belt Clip Operation Connecting an Optional Headset to the

- Handset For hands free operation:
- 1. Remove the rubber cap covering the headset jack 2. Connect the headset to the headset jack on the handset. The handset
- receiver is disabled when the headset is connected 3. Adjust the headset to rest comfortably on top of your head and over your ear. Move the microphone to approximately two to three inches from your
- 4. Press the TALK/CALL BACK button on the handset to answer a call or make
- Attaching the Belt Clip To attach the belt clip, insert the sides of the belt clip into the slots on each

5. To return to normal operation, unplug the headset from the jack.

side of the handset. Snap the ends of the belt clip into place. Changing the Battery

CAUTION: To reduce the risk of fire or personal injury, use only the Thomson Inc. approved Nickel-Cadmium (Ni-Cd) battery model 5-2729 or Nickel-Metal Hydride (Ni-MH) battery model 5-2522, which is compatible with

- 1. Make sure the telephone is **OFF** (not in TALK mode) before you replace
- 2. Remove the battery compartment doo 3. Disconnect the cord attached to the battery pack and remove the battery

5. Replace battery compartment door.

- pack from the handset 4. Insert the new battery pack and connect the cord to the jack inside the battery compartment.
- 6. Place handset in the base to charge. **Allow the handset battery to** properly charge (for 16 hours) prior to first use or when you install a new battery pack. If you do not properly charge the phone, battery performance will be compromised

Battery Safety Precautions

NOTE: The RBRC seal on the battery used in your Thomson Inc. product

Troubleshooting Tips **Caller ID Solutions**

No display • Fully charge (for 16 hours) or replace the battery.

- If you are using AC (electrical) power, make sure that the unit is connected to a non-switched electrical outlet. Unplug the AC power converter from the unit and plug it back in
- To see Caller ID information in your display, you must be subscribed to Caller ID service through your local telephone company

• The unit displays this message if it detects anything other than valid

Caller ID information during the silent period after the first ring. This

message indicates the presence of noise on the line

Telephone Solutions

• If any handsets become inoperable, place it on the main base cradle for 20 seconds to re-register.

No dial tone

- Check or repeat installation steps • Make sure the base power cord is connected to a working electrical
- Make sure the telephone line cord is connected to the base unit and the modular phone iack?
- Disconnect the base from the wall phone jack and connect another phone to the same jack. If there is no dial tone on the second phone.
- the problem might be your wiring or local service. • The handset might be out of range of the base. Move closer to the base.
- Make sure the battery is properly charged (for 16 hours). • Ensure the battery pack is installed correctly.

• Did the handset beep when you pressed the TALK/CALL BACK button? Did the in use indicator come on? The battery may need to be charged. Handset does not ring

- Make sure the ringer is set to ON, this can be done through the handset setup menu Ringer Volume
- You may have too many extension phones on your line. Try unplugging some phones.
- See solutions for "No dial tone. You experience static, noise, or fading in and out
- Change channels
- Relocate the base • Charge the battery.
- Make sure base is not plugged into an electrical outlet with another household appliance.

• The handset may be out of range. Move closer to the base

- Place handset in base cradle for 20 seconds to reset the security code. If that doesn't work, charge the battery for 16 hours.
- See solutions for "No dial tone."
- Replace the battery.

battery replacement

• Move closer to the base.

Out of range

- Make sure you correctly program the memory location keys.
 - contact customer service at 1-800-448-0329. If the equipment is causing harm to the telephone network, the telephone company may require that you disconnect the
