- Add finishing options such as hole punch, offset, staple, saddle stitch and fold to improve productivity.
- Reduce job delays through improved diagnostics and reporting.

BOOST PERFORMANCE FOR WORKGROUPS OF ANY SIZE

With duplex, a 1.25 GHz processor, up to 512 MB of standard memory, an optional 40+ GB hard drive and powerful optional finishing capabilities, the InfoPrint® Color 1767 gives large workgroups the power to get more done.

With superb color quality and monochrome output in one versatile device, users can complete a wide range of projects quickly and conveniently. The USB direct interface allows forms management and direct printing of supported file formats at the printer. With standard enterprise security features and Color Care Technology from InfoPrint Solutions Company,

the InfoPrint Color 1767 helps you operate your business with a higher level of confidence and affordability.

MAKE IT EASIER FOR USERS TO COMPLETE THEIR WORK

The InfoPrint Color 1767 is designed with the user in mind. Features and functionality are optimized to be intuitive, convenient and user friendly. The image-capable graphical operator panel provides “show me” and “tell me more” screens to guide users through job setup. A context-sensitive help screen is designed to answer operator questions quickly. Icons make it easier for users to recognize functions, and scroll bars help simplify navigation.

The USB direct interface, which is located on the operator panel, enables users to print supported image files (PDF, GIF, JPEG and many more) directly to the printer using an approved USB flash memory device. For workers on the go, this feature can save time and increases mobility.

ACHIEVE ENTERPRISE-LEVEL SECURITY

Integrated security features provide peace of mind through most steps of your jobs—from access control to transmission to storage. Tighten access control with increased four-digit PIN values (0 – 9), the ability to lock out and delete incorrect PINs, and expiration time for confidentially held jobs. Protect jobs during transmission with multiple types of encryption.

MANAGE COLOR TO HELP ENSURE APPROPRIATE USE AND REDUCE COST

Color is an important business tool that can help you communicate effectively, and the InfoPrint Color 1767 provides superb color quality color controls. With Color Care technology, you can assign color print permissions and install mono-only drivers and black-and-white lock mode to restrict access. Further, you can save money by using toner saver settings, the color saver feature and proof-then-print capability to reduce waste.

UPGRADE YOUR INFOPRINT COLOR 1767 WITH OPTIONAL INPUT AND OUTPUT

It's easy to turn your single function InfoPrint Color 1767 into a high-performance departmental printer by adding optional finishing devices.

Standard Finisher

Offers stapling, hole punching, offset stacking and an additional output bin. Two models are available: 3-hole or 2/4-hole left-edge hole punching. The finisher supports multiple stapling positions. The finisher can support up to 3,500 sheets of unstapled, unpunched media—500 sheets in the standard bin and 3,000 sheets in bin 1. For stapled media, the output bin capacity is reduced. The stapler can staple a maximum of 50 sheets per set. Each InfoPrint Color 1767 can support one finisher.

Booklet Finisher

Offers stapling, hole punching, offset stacking and an additional output bin. Two models are available: 3-hole or 2/4-hole left-edge hole punching. The finisher supports multiple stapling positions. The finisher can support up to 2,000 sheets of unstapled, unpunched media—500 sheets in the standard bin and 1,500 sheets in bin 1. Saddle stapling is finished in bin 2 that can hold 18 sets of 15 sheets each.

For stapled media, the output bin capacity is reduced. The stapler can side staple or corner staple a maximum of 50 sheets per set and send to bin one. Each InfoPrint Color 1767 can support one finisher.

ENHANCE SERVICEABILITY

The InfoPrint Color 1767 is designed to improve reliability and the ease of serviceability. It is designed to display secondary error codes to improve reporting and diagnostics. As a result, you can spend less time diagnosing and resolving problems and improve printer availability. Now printer settings can be preserved during changes of controller cards, including serial number, new meters and counters. The improved event log page can log recent events such as paper jams, service errors and factory default resets to provide continuity for service personnel.

ENGAGE THE PRINTING EXPERTS

With InfoPrint Solutions Company, you can receive support when you need it from experts with comprehensive knowledge of printers, software and supplies. Same-day and next-day service offerings might be available for InfoPrint Solutions Company printers in your country.

- ^A Printer integrated bin is not selectable when finisher is installed. Bin 1 becomes standard.
- ^B Special media such as transparencies, labels and envelopes will exit out the integrated bin rather than the standard bin when the finisher is installed
- ^C Capacity is reduced when a stapling job is sent to this bin.
- ¹ Exact speed varies depending on document complexity, system configuration, software application, driver and printer state.
- ² InfoPrint Solutions Company does not recommend printing this monthly maximum on a consistent basis.
- ³ The Image Quality (IQ) enhancement, whether 1200 or 2400, is a special print mode designed to vary the intensity of each individual printed dot by manipulating its size to produce the appearance of greater print resolution within the limitation of a set number of dots per inch (dpi).
- ⁴ Not all versions are supported. Contact your sales representative for a detailed list of supported versions.
- ⁵ Assumes 5% coverage per page. Yields are provided for planning purposes and are not a guarantee of minimum life; actual yields may vary. Declared yield value in accordance with ISO/IEC 19798.
