

## RADIAL DRILL PRESS MODEL G7945/46 INSTRUCTION MANUAL

COPYRIGHT © 2001 BY GRIZZLY INDUSTRIAL, INC.
WARNING: NO PORTION OF THIS MANUAL MAY BE REPRODUCED IN ANY SHAPE
OR FORM WITHOUT THE WRITTEN APPROVAL OF GRIZZLY INDUSTRIAL, INC.
JUNE, 2001 PRINTED IN CHINA.

# WARNING

Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- Lead from lead-based paints.
- Crystalline silica from bricks, cement, and other masonry products.
- Arsenic and chromium from chemically treated lumber.

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.

#### **SECTION 1: SAFETY**

#### **AWARNING**

#### For Your Own Safety Read Instruction **Manual Before Operating This Equipment**

The purpose of safety symbols is to attract your attention to possible hazardous conditions. This manual uses a series of symbols and signal words which are intended to convey the level of importance of the safety messages. The progression of symbols is described below. Remember that safety messages by themselves do not eliminate danger and are not a substitute for proper accident prevention measures.

Indicates an imminently hazardous situation which, if not avoided, POANGER Indicates an imminently hazardous sit WILL result in death or serious injury.

**A**WARNING

Indicates a potentially hazardous situation which, if not avoided, COULD result in death or serious injury.

**ACAUTION** 

Indicates a potentially hazardous situation which, if not avoided, MAY result in minor or moderate injury. It may also be used to alert against unsafe practices.

**NOTICE** 

This symbol is used to alert the user to useful information about proper operation of the equipment.

#### **AWARNING Safety Instructions For Power Tools**

- 1. KEEP GUARDS IN PLACE and in working order.
- 2. REMOVE ADJUSTING KEYS AND WRENCHES. Form habit of checking to see that keys and adjusting wrenches are removed from tool before turning on.
- 3. KEEP WORK AREA CLEAN. Cluttered areas and benches invite accidents.
- 4. DO NOT USE IN DANGEROUS ENVI-**RONMENT.** Don't use power tools in damp or wet locations, or where any flammable or noxious fumes may exist. Keep work area well lighted.

- 5. KEEP CHILDREN AND VISITORS AWAY. All children and visitors should be kept a safe distance from work area.
- 6. MAKE WORKSHOP CHILD PROOF with padlocks, master switches, or by removing starter keys.
- 7. DO NOT FORCE TOOL. It will do the job better and safer at the rate for which it was designed.
- 8. USE RIGHT TOOL. Do not force tool or attachment to do a job for which it was not designed.

## **AWARNING**Safety Instructions For Power Tools

9. USE PROPER EXTENSION CORD. Make sure your extension cord is in good condition. Conductor size should be in accordance with the chart below. The amperage rating should be listed on the motor or tool nameplate. An undersized cord will cause a drop in line voltage resulting in loss of power and overheating. Your extension cord must also contain a ground wire and plug pin. Always repair or replace extension cords if they become damaged.

Minimum Gauge for Extension Cords

	LENGTH			
AMP RATING	25ft	50ft	100ft	
0-6	18	16	16	
7-10	18	16	14	
11-12	16	16	14	
13-16	14	12	12	
17-20	12	12	10	
21-30	10	10	No	

- 10. WEAR PROPER APPAREL. Do not wear loose clothing, gloves, neckties, rings, bracelets, or other jewelry which may get caught in moving parts. Non-slip footwear is recommended. Wear protective hair covering to contain long hair.
- 11. ALWAYS USE SAFETY GLASSES. Also use face or dust mask if cutting operation is dusty. Everyday eyeglasses only have impact resistant lenses, they are NOT safety glasses.
- **12. SECURE WORK.** Use clamps or a vise to hold work when practical. It's safer than using your hand and frees both hands to operate tool.
- **13. DO NOT OVERREACH.** Keep proper footing and balance at all times.
- **14. MAINTAIN TOOLS WITH CARE.** Keep tools sharp and clean for best and safest performance. Follow instructions for lubricating and changing accessories.
- **15. USE RECOMMENDED ACCESSORIES.**Consult the owner's manual for recommended accessories. The use of improper accessories may cause risk of injury.

- 16. REDUCE THE RISK OF UNINTENTION-AL STARTING. On machines with magnetic contact starting switches there is a risk of starting if the machine is bumped or jarred. Always disconnect from power source before adjusting or servicing. Make sure switch is in OFF position before reconnecting.
- 17. MANY WOODWORKING TOOLS CAN "KICKBACK" THE WORKPIECE toward the operator if not handled properly. Know what conditions can create "kickback" and know how to avoid them. Read the manual accompanying the machine thoroughly.
- 18. CHECK DAMAGED PARTS. Before further use of the tool, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced.
- **19. NEVER LEAVE TOOL RUNNING UNAT- TENDED. TURN POWER OFF.** Do not leave tool until it comes to a complete stop.
- 20. NEVER OPERATE A MACHINE WHEN TIRED, OR UNDER THE INFLUENCE OF DRUGS OR ALCOHOL. Full mental alertness is required at all times when running a machine.
- 21. NEVER ALLOW UNSUPERVISED OR INEXPERIENCED PERSONNEL TO OPERATE THE MACHINE. Make sure any instructions you give in regards to machine operation are approved, correct, safe, and clearly understood.
- 22. IF AT ANY TIME YOU ARE EXPERIENC-ING DIFFICULTIES performing the intended operation, stop using the machine! Then contact our service department or ask a qualified expert how the operation should be performed.

### AWARNING Additional Safety Instructions For Drill Presses

- 1. ALWAYS OPERATE YOUR DRILL PRESS AT SPEEDS that are appropriate for the drill bit size and the material that you are drilling.
- 2. FEED THE DRILL BIT EVENLY INTO THE WORKPIECE. Back the bit out of deep holes and clear the chips with a brush after you have turned the machine off.
- 3. MAKE SURE THE DRILL BIT YOU ARE USING IS TIGHTENED PROPERLY. Use only round, hex or triangular shank drill bits.
- 4. NEVER DO MAINTENANCE OR CHANGE SPEEDS WITH THIS MACHINE PLUGGED IN.
- 5. **NEVER USE TOOLS THAT ARE IN POOR CONDITION.** Cutting tools that are dull or damaged are difficult to control and may cause serious injury.
- NEVER DRILL SHEET METAL UNLESS IT IS CLAMPED SECURELY TO THE TABLE.
- 7. WORK SHOULD BE POSITIONED IN SUCH A WAY AS TO AVOID DRILLING INTO THE TABLE.
- 8. A FACE SHIELD USED WITH SAFETY GLASSES IS RECOMMENDED.
- ALWAYS CLAMP WORKPIECE SECURELY TO TABLE BEFORE DRILLING. Never hold a workpiece by hand while drilling.
- **10. HABITS GOOD AND BAD ARE HARD TO BREAK.** Develop good habits in your shop and safety will become second-nature to you.
- 11. REMOVE ADJUSTING KEYS AND WRENCHES. Before turning the machine on, make it a habit to check that all adjusting keys and wrenches have been removed.

#### **A**CAUTION

No list of safety guidelines can be complete. Every shop environment is different. Always consider safety first, as it applies to your individual working conditions. Use this and other machinery with caution and respect. Failure to do so could result in serious personal injury, damage to equipment or poor work results.

#### **SECTION 2: CIRCUIT REQUIREMENTS**

#### 110V Operation

The Model G7945/46 is wired for 110V, single phase operation only. The ½ HP motor will safely draw 5 amps at 110V. If you operate this machine on any circuit that is already close to its capacity, it might blow a fuse or trip a circuit breaker. However, if an unusual load does not exist and a power failure still occurs, contact a qualified electrician or our service department.

A 10-amp fuse or circuit breaker should be used when fusing this drill press. Circuits breakers rated any higher may not be adequate to protect the circuit from power surges.

#### **Extension Cords**

If you find it necessary to use an extension cord with the Model G7945/7946, make sure the cord is rated Hard Service (grade S) or better. Refer to the chart in the standard safety instructions to determine the minimum gauge for the extension cord. The extension cord must also contain a ground wire and plug pin.

#### Grounding

In the event of an electrical short, grounding reduces the risk of electric shock by providing electric current a path of least resistance. This tool is equipped with a power cord having an equipment-grounding conductor. **See Figure 1.** The outlet must be properly installed and grounded in accordance with all local codes and ordinances.

#### **AWARNING**

This equipment must be grounded. Verify that any existing electrical outlet and circuit you intend to plug into is actually grounded. Under no circumstances should grounding pin from any three-pronged pluq be removed or serious injury may occur.

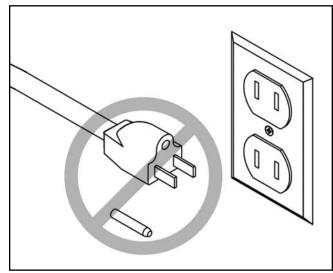

Figure 1A. Do not remove grounding pin.

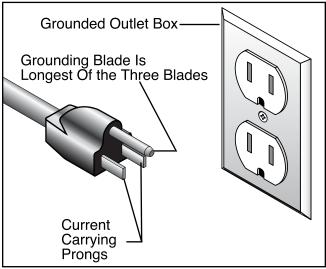

Figure 1. Typical 110V 3-prong plug and outlet.

#### **SECTION 3: INTRODUCTION**

#### Commentary

We are proud to offer the Grizzly Model G7945/46 Radial Drill Press. The Model G7945/46 is part of a growing Grizzly family of fine woodworking machinery. When used according to the guidelines set forth in this manual, you can expect years of trouble-free, enjoyable operation and proof of Grizzly's commitment to customer satisfaction.

The Model G7945/46 is a five speed radial drill press that features variable swing up to 34" and pivoting head for drilling at just about any angle. A ½ H.P. motor powers the drill press from 550 to 3470 R.P.M. to handle a wide variety of drilling needs. The table tilts 90° in both directions and swings 360°. The Model G7946 is exactly the same as the Model G7945, but adds the double pivot table support as well as being a floor model.

A number of bits, sanding drums, and other accessories are available for the Model G7945/46 through the Grizzly catalog.

We are also pleased to provide this manual with the Model G7945/46. It was written to guide you through assembly, review safety considerations, and cover general operating procedures. It represents our effort to produce the best documentation possible. If you have any comments regarding this manual, please write to us at the address below:

Grizzly Industrial, Inc.

c/o Technical Documentation
P.O. Box 2069

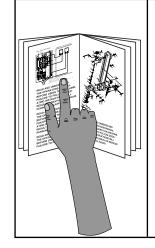

Bellingham, WA 98227-2069

Most importantly, we stand behind our machines. If you have any service questions or parts requests, please call or write us at the location listed below.

Grizzly Industrial, Inc.
2406 Reach Road
Williamsport, PA 17701
Phone: (570) 546-9663
Fax: (800) 438-5901
E-Mail: techsupport@grizzly.com
Web Site: http://www.grizzly.com

After fall 2001: Grizzly Industrial, Inc. 1203 Lycoming Circle Pennsdale, PA 17756

The specifications, drawings, and photographs illustrated in this manual represent the Model G7945/46 as supplied when the manual was prepared. However, owing to Grizzly's policy of continuous improvement, changes may be made at any time with no obligation on the part of Grizzly. Whenever possible, though, we send manual updates to all owners of a particular tool or machine. Should you receive one, we urge you to insert the new information with the old and keep it for reference.

#### **AWARNING**

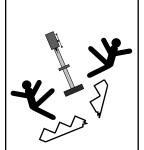

Read the manual before assembly and operation. Become familiar with the machine and it's operation before beginning any work. Serious personal injury may result if safety or operational information is not understood or followed.

#### Unpacking

The Model G7945/46 is shipped from the manufacturer in a carefully packed carton. If you discover the machine is damaged after you've signed for delivery, immediately call Customer Service for advice.

When you are completely satisfied with the condition of your shipment, you should inventory its parts.

#### **AWARNING**

If moving this machine up or down stairs, the machine must be dismantled and moved in smaller pieces. Make sure floor and stair structures are capable of supporting the combined weight of the machine parts and the people moving them.

#### CAUTION

The G7945/7946 represents a heavy load at 100/150 pounds. Seek assistance before beginning assembly.

#### **Piece Inventory**

After all the parts have been removed from the carton, you should have:

- Headstock
- Base
- Column
- Table
- Column Lock
- Drill Chuck and Key
- Spindle Handles (3)
- Allen® Wrenches (2)
- Handle

- Pinion Gear
- Lock Handles (4, 5 for G7946)
- Rack
- Column Ring
- Hardware Bag

In the event that any nonproprietary parts are missing (e.g. a nut or a washer), we would be glad to replace them, or, for the sake of expediency, replacements can be obtained at your local hardware store.

Figure 2. G7945 layout.

Figure 2A. G7946 layout.

#### **NOTICE**

A full parts list and breakdown can be found toward the end of this manual. For easier assembly, or to identify specific parts, please refer to the detailed illustrations at the end of the manual.

#### Clean Up

The unpainted surfaces are coated with a waxy oil to protect them from corrosion during shipment. Remove this protective coating with a solvent cleaner or citrus-based degreaser such as Grizzly's G7895 Degreaser. Avoid chlorine-based solvents as they may damage painted surfaces should they come in contact. Always follow the usage instructions on the product you choose for clean up.

#### **AWARNING**

Do not use gasoline or other petroleum-based solvents. They have low flash points which make them extremely flammable. A risk of explosion and burning exists if these products are used. Serious personal injury may occur if this warning is ignored.

#### **A**CAUTION

Many of the solvents commonly used to clean machinery can be toxic when inhaled or ingested. Always work in well-ventilated areas far from potential ignition sources when dealing with solvents. Use care when disposing of waste rags and towels to be sure they do not create fire or environmental hazards. Keep children and animals safely away when cleaning and assembling this machine.

#### **AWARNING**

Do not smoke while using solvents. A risk of explosion or fire exists and may result in serious personal injury.

#### **Site Considerations**

#### FLOOR LOAD

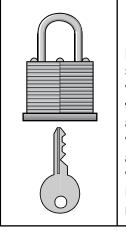

Your Model G7945/46 represents a moderate weight load in a small footprint. Most commercial or home shop floors should be sufficient to carry the weight of the Model G7945/46. If you question the strength of your floor, you can opt to reinforce it. Ensure that the stand or bench you use with the Model G7945 is capable of supporting the machine.

#### **WORKING CLEARANCES**

Working clearances can be thought of as the distances between machines and obstacles that allow safe operation of every machine without limitation. Consider existing and anticipated machine needs, size of material to be processed through each machine, and space for auxiliary stands and/or work tables. Be sure to allow yourself sufficient room to safely run your machines in any foreseeable operation.

#### LIGHTING AND OUTLETS

Lighting should be bright enough to eliminate shadow and prevent eye strain. Electrical circuits should be dedicated or large enough to handle combined motor amp loads. Outlets should be located near each machine so power or extension cords are not obstructing high-traffic areas. Be sure to observe local electrical codes for proper installation of new lighting, outlets, or circuits.

#### **A**CAUTION

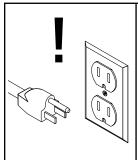

Make your shop "child safe." Ensure that your workplace is inaccessible to youngsters by closing and locking all entrances when you are away. Never allow visitors in your shop when assembling, adjusting or operating equipment.

G7945/7946 Radial Drill Press

#### **SECTION 4: ASSEMBLY**

#### **Beginning Assembly**

#### WARNING

Disconnect power to the machine when performing any maintenance, assembly or adjustments. Failure to do this may result in serious personal injury.

#### AWARNING

Keep loose clothing rolled up and out of the way of machinery and keep hair pulled back.

#### WARNING

Wear safety glasses during the entire assembly process. Failure to comply may result in serious personal injury.

Most of your Model G7945/46 Radial Drill Press has been assembled at the factory, but some parts must be assembled or installed after delivery. We have organized the assembly process into steps. Please follow along in the order presented here.

**TOOLS REQUIRED:** 11/16" open end wrench, rubber or wooden mallet and a 5mm Allen® wrench (supplied).

#### Column/Base

The Model G7946 is a floor model and must be secured to the floor using anchor bolts or the base should be secured to a piece of plywood. The G7945 must be secured to a bench.

G7945/46 Radial Drill Press

#### **AWARNING**

Do not use a mobile base. Drill presses are extremely top heavy. A stable base is required to prevent serious bodily injury.

**Figure 3.** Attaching plywood sub-base.

1. Unplug machine before assembly.

#### 2. Model G7946

Secure the base to the floor using the appropriate anchor bolts.

٥r

Secure base to a piece of 4' x 4' x 3/4" plywood. Using the holes in the base as a guide, drill and bolt the base to the back center of the plywood using carriage bolts. See **Figure 3.** 

#### 2. Model G7945

Secure base to a bench top capable of holding approximately 100 lbs plus the weight of the workpiece. Using the holes in the base as a guide, drill and bolt the base to the bench top using carriage bolts.

3. Place the column on the base and line up the mounting holes. Insert and tighten the M10-1.5 x 40mm hex head bolts with a wrench.

#### **Table Support**

The Model G7945 comes with a one piece square table and support as shown in **Figure 4**. The Model G7946 comes with a round table and two piece hinged table support.

- Insert the pinion gear into the hole on the side of the bracket from the inside, starting with the shaft. See Figure 5. Align the setscrew in the crank with the flat portion of the pinion gear shaft. Secure with a 3mm Allen® wrench.
- 2. The rack has teeth that extend farther on one end than the other. This end must be positioned down. Insert the rack into the table support bracket and position in the pocket. Be sure that the gear teeth are positioned out. See Figure 6.
- 3. While holding the rack in place, slide the table support bracket over the column. Allow the bracket and rack to slide down the column until the bottom of the rack contacts the shoulder of the column support. Secure the table bracket by tightening the lock handle.
- 4. Slide the column ring onto the top end of the column with the inside bevel downward. See Figure 7. Move the ring around until the tip of the rack fits inside the bevel.

#### **NOTICE**

Do not over-tighten the setscrew in the column ring, as it may split the ring.

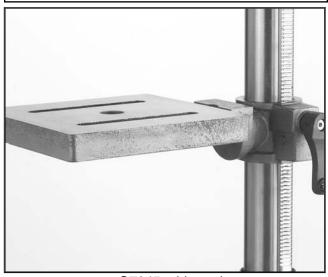

Figure 4. G7945 table and support.

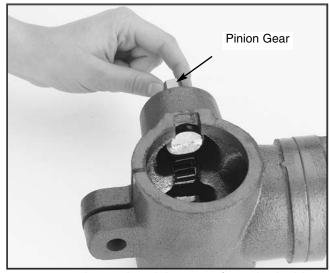

Figure 5. Insert the pinion gear from the inside.

Figure 6. Rack orientation (G7946 shown).

Figure 7. Inside bevel in the correct position.

#### **Headstock**

- Make sure the locking gib is in the recessed pocket on the inside edge of the headstock opening. See Figure 8.
- With the help of an assistant, lift the headstock over the top end of the column. When the underside of the headstock is lined up with the column, slide the headstock onto the column until it stops (approximately 2").
- Screw two lock handles into each side of the headstock bracket. See Figure 8.

#### **A**CAUTION

The headstock represents a heavy load. Seek assistance before beginning this step.

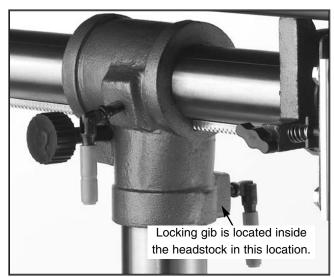

Figure 8. Lock Handles and gib location.

#### **Handles**

Three handles are supplied with the drill press. Thread them into the handle hub.

#### **Drill Chuck and Arbor**

The drill chuck is attached to the drill spindle by means of a machined taper between the chuck and spindle nose. An almost permanent assembly is created when properly joined. To assemble the drill chuck and mount it to the spindle, carefully follow the instructions below:

- The drill chuck and spindle must be thoroughly cleaned and dried before assembly. It is recommended that mineral spirits be used for this task. Refer to the safety warnings on the container of the mineral spirits. Failure to clean the mating surfaces may result in separation, and an unsafe condition. Separation is usually a result of oil or grease on the taper.
- Use the chuck key provided to adjust the jaws of the chuck until they are well inside the drill chuck body.
- 3. Slide the chuck onto the spindle end and tap the end of the drill chuck with a rubber or wooden mallet to seat it. See **Figure 9**.

#### **ACAUTION**

DO NOT use a steel hammer on the drill chuck to seat it onto the spindle. Damage will occur to the chuck and/or spindle which may make them unusable or unsafe.

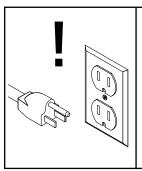

Figure 9. Seating chuck into spindle. (Note retracted jaws.)

#### **SECTION 5: ADJUSTMENTS**

#### **Speed Change**

#### **AWARNING**

Disconnect power to the machine when performing any maintenance, assembly or adjustments. Failure to do this may result in serious personal injury.

#### WARNING

Keep loose clothing rolled up and out of the way of machinery and keep hair pulled back.

#### WARNING

Wear safety glasses during the entire adjustment process. Failure to comply may result in serious personal injury.

**Unplug the drill press before changing speeds.** The drill press has 5 speeds ranging from 550 to 3470 R.P.M. There is a speed chart located under the belt guard. Refer to this chart when setting a speed.

- Loosen the belt tension lock knob on the side of the headstock. See Figure 10.
- 2. Pivot the motor to take tension off the V-belt.
- Determine the desired speed on the chart and move the V-belt to the desired Vgrooves on the motor and spindle pulleys.

- 4. Pivot the motor toward the back of the headstock, the motor support rod is spring loaded and will follow the motor. Tighten the lock knob once the desired V-belt tension is achieved.
- 5. Close the cover.

#### **▲**WARNING

Never operate drill press with belt cover in the open position. Your hand may become trapped in a belt and serious personal injury will occur.

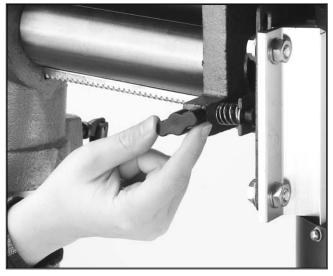

Figure 10. Loosening the lock knob.

#### **Depth Stop**

Your radial drill press comes with a depth stop for use when drilling. Follow the instructions below for use.

- 1. Loosen the depth collar lock knob. See Figure 11.
- 2. Secure the wood stock you will be drilling onto the drill press table.
- With the desired bit installed, lower the spindle until the tip of the bit just touches the wood stock you will be drilling. Hold the spindle in this position.
- **4.** Turn the depth collar to the desired depth indicated by the scale on the collar. Secure the collar by tightening the lock knob.
- Remove the wood stock and test the depth stop by measuring how far the spindle travels when the handles are rotated. See Figure 12.

Figure 11. Loosening collar lock knob.

You can also lock the spindle in the down position for operations such as spindle sanding.

- 1. Loosen the depth collar lock knob. See Figure 11.
- **2.** Rotate the spindle to the desired depth and hold it steady.
- 3. Rotate the the collar clockwise until it stops, and tighten the lock knob.
- **4.** Slowly release the drill press handle and the spindle should not move.

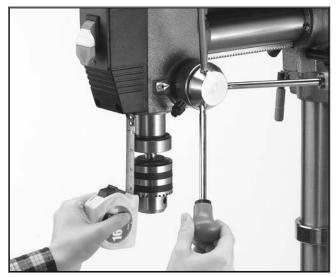

Figure 12. Actual stop depth being measured.

G7945/46 Radial Drill Press -13-

#### **Table Adjustments**

The Model G7945 table can be adjusted for height and angle. The G7946 adds the adjustments of table distance from column and rotation. Follow these instructions to adjust height:

- Loosen the table support bracket lock handle. Turn the table hand crank to lift or lower the table.
- Remember to lock the support bracket in place before operating the machine.

Adjust angle: (Model G7946 only).

- Turn the nut shown by the arrow in Figure
   13, in a clockwise direction. This will draw the location pin out of the casting. Once loose, pull out the pin and nut, and set them in a safe place until needed.
- Loosen the large bolt in the center of the support bracket. See Figure 13.
- Using the scale on the side of the bracket or a protractor to set the angle, rotate the bracket to the desired angle. Lock in place by tightening bolt.

Adjust rotation (Model G7946 Only):

- **1.** Loosen the lock handle located under the table. Rotate the table the desired amount.
- **2.** Always lock the support bracket in place before operating the machine.

Adjusting distance from column (G7946 Only):

- Loosen the lock handle located at the pivoting elbow of the table support. See Figure 15.
- 2. Swing the table support to the desired distance from the column. The support bracket may need to be rotated around the column to keep the table centered under the chuck. Secure all lock handles before operating the machine.

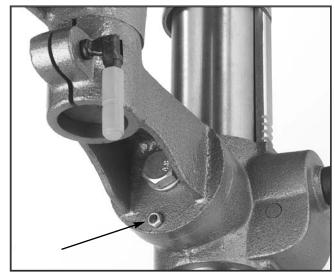

Figure 13. Locating pin and nut (G7946).

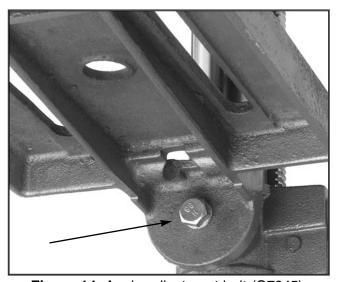

Figure 14. Angle adjustment bolt (G7945).

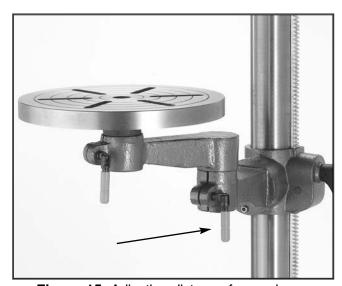

Figure 15. Adjusting distance from column.

G7945/46 Radial Drill Press

#### **Head Adjustments**

The headstock can be tilted from 45° clockwise to 90° counterclockwise.

- **1.** Loosen the lock handle on the right side of the headstock.
- 2. Pull out the guide pin located on the left side of the headstock and rotate the pin 90°. See Figure 16. Tilt the headstock to the desired angle specified on the scale and tighten the lock handle on the right side of the headstock.

#### Return to vertical position:

- **1.** Loosen the lock handle located on the right side of the headstock.
- **2.** Move the headstock to its original position and move the guide pin back into the guide slot. Tighten the lock handle.

The headstock can also be adjusted back and forth:

- 1. Loosen the lock handle located on the right side of the headstock.
- Turn the black ribbed handle to move the headstock back and forth to desired position. Tighten the lock handle before operating the machine.

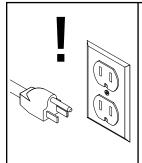

Figure 16. Guide pin location.

#### **SECTION 6: OPERATIONS**

#### **Test Run**

#### WARNING

Disconnect power to the machine when performing any maintenance, assembly or adjustments. Failure to do this may result in serious personal injury.

#### WARNING

Keep loose clothing rolled up and out of the way of machinery and keep hair pulled back.

#### WARNING

Wear safety glasses during the entire operation process. Failure to comply may result in serious personal injury.

Once assembly is complete and adjustments are done to your satisfaction, you are ready to test run the machine.

Turn on the power supply at the main panel. Press the START button. Make sure that your finger is poised on the paddle switch, just in case there's a problem. The drill press should run smoothly, with little or no vibration or rubbing noises. Strange or unnatural noises should be investigated and corrected before operating the machine further.

If you cannot easily locate the source of an unusual noise or vibration, contact our service department for help.

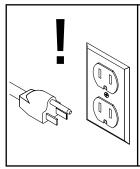

#### **Drill Bit Changes**

Care must be taken to secure the bit firmly in place. When changing bits, proceed as follows:

- **1.** Disconnect the machine from the power source.
- 2. Open the chuck wide enough to accept a new bit.
- 3. Install the bit so the chuck jaws will grab as much of the bit shank as possible. Do not allow the chuck to grab the fluted body of the drill bit. Make sure small drill bits do not get trapped between the edges of two jaws.
- **4.** Tighten the chuck with the chuck key using any of the three key end locations.
- **5.** Remove the chuck key and reconnect the power source.
- **6.** Reverse steps to remove the drill bit.

#### **SECTION 7: MAINTENANCE**

#### AWARNING

Disconnect power to the machine when performing any maintenance, assembly or adjustments. Failure to do this may result in serious personal injury.

#### **AWARNING**

Keep loose clothing rolled up and out of the way of machinery and keep hair pulled back.

#### WARNING

Wear safety glasses during the entire maintenance process. Failure to comply may result in serious personal injury.

#### **General**

Regular periodic maintenance on your Model G7945/46 will ensure its optimum performance. Make a habit of inspecting your machine each time you use it. Check for the following conditions and repair or replace when necessary:

- 1. Loose mounting bolts.
- 2. Worn switch.
- 3. Worn or damaged cords and plugs.
- 4. Damaged V-belt.
- **5.** Any other condition that could hamper the safe operation of this machine.

#### **Tables**

The nonpainted surfaces on the Model G7945/46 should be protected against rust and pitting. Wiping the machine clean after every use ensures that wood dust will not trap moisture against bare metal surfaces.

Some woodworkers recommend using automotive paste wax on exposed steel and cast iron surfaces. The wax provides a layer of protection, as well as reducing friction between lumber and the table, making cuts faster and smoother. Avoid waxes that contain silicone or other synthetic ingredients. These materials can find their way into lumber that is being worked, and can make staining and finishing difficult. If you use paste wax, make sure that it is 100% Carnauba wax.

#### Lubrication

Since all bearings are shielded and permanently lubricated, simply leave them alone until they need to be replaced. Do not lubricate them.

#### V-Belt

Inspect regularly for tension and wear. Check pulleys to ensure that they are properly aligned. See pulley/V-belt sections for proper tension and pulley alignment procedures.

#### **SECTION 8: CLOSURE**

The following pages contain general machine data, parts diagrams/lists, a troubleshooting guide and Warranty/Return information for your Model G7945/46 Radial Drill Press.

If you need parts or help in assembling your machine, or if you need operational information, we encourage you to call our Service Department. Our trained service technicians will be glad to help you.

If you have comments dealing specifically with this manual, please write to our Bellingham, Washington location using the address in **Section 3 Introduction.** 

We have included some important safety measures that are essential to this machine's operation. While most safety measures are generally universal, Grizzly reminds you that each workshop is different and safety rules should be considered as they apply to your specific situation.

#### WARNING

Operating this equipment has the potential for flying debris to cause eye injury. Always wear safety glasses or goggles when operating equipment. Everyday glasses or reading glasses only have impact resistant lenses, they are not safety glasses. Be certain the safety glasses you wear meet the appropriate standards of the American National Standards Institute (ANSI).

We recommend you keep a copy of our current catalog for complete information regarding Grizzly's warranty and return policy. If you need additional technical information relating to this machine, or if you need general assistance or replacement parts, please contact the Service Department listed in **Section 3: General Information.** 

Additional information sources are necessary to realize the full potential of this machine. Trade journals, woodworking magazines, and your local library are good places to start.

#### WARNING

The Model G7945/46 was specifically designed for drilling operations. DO NOT MODIFY AND/OR USE THIS MACHINE FOR ANY OTHER PURPOSE. Modifications or improper use of this tool will void the warranty. If you are confused about any aspect of this machine, DO NOT use it until all your questions have been answered or serious personal injury may occur.

#### **AWARNING**

Like all power tools, there is danger associated with the Model G7945/46. Accidents are frequently caused by lack of familiarity or failure to pay attention. Use this tool with respect and caution to lessen the possibility of operator injury. If normal safety precautions are overlooked or ignored, serious personal injury may occur.

#### **GRIZZLY MODEL G7945 RADIAL DRILL PRESS**

Design Type	Bench Model
Overall Dimensions:	
Table	85%" x 9"
Overall Height	31½"
Overall Width	11½"
Overall Depth	33½"
Column Diameter	2.360"
Quill Diameter	0.575"
Shipping Weight	100 lbs.
Box Size	34½" L x 18" W x 12½" H
Footprint	13½" x 8½"
Construction:	
Table	Precision Ground Cast Iron
Column	
Base & Head	Cast Iron
Capacities:	
Spindle Travel	31/4"
Max. Distance, Spindle to Base	19"
Max. Distance, Spindle to Table	14½"
Spindle Nose	B-16
Swing	34"
Chuck Size	5%" (16mm), keyed
Speeds	,
Range of Speeds	
Head Radial Movement	
Head Radial Pivot45° Clockwise, 90	
Drilling Capacity	½" Diameter in Steel
Motor:	
Type	•
Horsepower	½ H.P.
Phase / Cycle	Single Phase / 60 Hz
Amps	5
Voltage	110V
R.P.M	1720
Power Transfer	
Bearings	•
Switch	Toggle ON/OFF w/ Safety Lock Tab
Features:	
Table360° Swivel Around Supp	
Vertical Table Movement	•
Slots	
Depth Gauge	On Feed Handle Hub, Inch Increments

Specifications, while deemed accurate, are not guaranteed.

#### **NOTES**

#### WARRANTY AND RETURNS

Grizzly Industrial, Inc. warrants every product it sells for a period of **1 year** to the original purchaser from the date of purchase. This warranty does not apply to defects due directly or indirectly to misuse, abuse, negligence, accidents, repairs or alterations or lack of maintenance. This is Grizzly's sole written warranty and any and all warranties that may be implied by law, including any merchantability or fitness, for any particular purpose, are hereby limited to the duration of this written warranty. We do not warrant or represent that the merchandise complies with the provisions of any law or acts unless the manufacturer so warrants. In no event shall Grizzly's liability under this warranty exceed the purchase price paid for the product and any legal actions brought against Grizzly shall be tried in the State of Washington, County of Whatcom.

We shall in no event be liable for death, injuries to persons or property or for incidental, contingent, special, or consequential damages arising from the use of our products.

To take advantage of this warranty, contact us by mail or phone and give us all the details. We will then issue you a "Return Number," which must be clearly posted on the outside as well as the inside of the carton. We will not accept any item back without this number. Proof of purchase must accompany the merchandise.

The manufacturers reserve the right to change specifications at any time because they constantly strive to achieve better quality equipment. We make every effort to ensure that our products meet high quality and durability standards and we hope you never need to use this warranty.

Please feel free to write or call us if you have any questions about the machine or the manual.

Thank you again for your business and continued support. We hope to serve you again soon.
