| Item | Specification | | |
|---------------------------------|---|--|--|
| Platform | Microsoft Pocket PC 2003 phone edition - English, | | |
| | French, German, Italian, Spanish, Portuguese. | | |
| | Combined GSM/GPRS and PDA. | | |
| | 2 logical block (PDA and GSM/GPRS) solution, | | |
| | layout is integrated into one module | | |
| | GSM/GPRS can be turned off to let PDA to run | | |
| | alone | | |
| Outside Dimensions | • 69.9mm(W) x 130mm(H) x 19mm (T) | | |
| Weight | Less than 200g | | |
| Battery | Removable rechargeable Lithium Polymer battery | | |
| | • 1200 mAh(Typical) | | |
| | Data retention time: 72 hrs | | |
| | Separated Back up battery(25 mAh,rechargeable), | | |
| | data retention time above 0.5 hrs | | |
| | Battery Life : 15 hrs of PDA | | |
| | • Talk time: 2.5 ~ 4 hrs | | |
| | Standby : 180 hrs | | |
| 2.3 Specification of AC ADAPTER | | | |
| AC Adapter | • AC input 100 ~ 240 Vac, 50/60 HZ | | |
| - | AC input current : 0.2 A max | | |
| | Output voltage : 5V dc | | |
| | Output current : 2A (typical) | | |
| 2.4 GSM/GPRS F | | | |

| GPRS/GSM (Tri-band) | • GSM900: 880-915, 925-960MHz | |
|----------------------------------|---|--|
| module | • DCS1800 1710 ~ 1785,1805 ~ 1880 MHZ | |
| | PCS1900 1850 ~ 1910, 1930 ~ 1990MHZ | |
| Antenna | | |
| Generic GSM Service | Internal Antenna | |
| | Call forwarding | |
| | Explicit Call Transfer | |
| | Spool Icon | |
| | Wave ring tone download /compose | |
| | Long message (640 characters) | |
| | SIM LOCK | |
| | Network lock | |
| GPRS functionality | GPRS Class B, | |

3.SYSTEM BLOCK DIAGRAM

3. Servicing Tools

This chapter provides information for the servicing tools for MDA2.

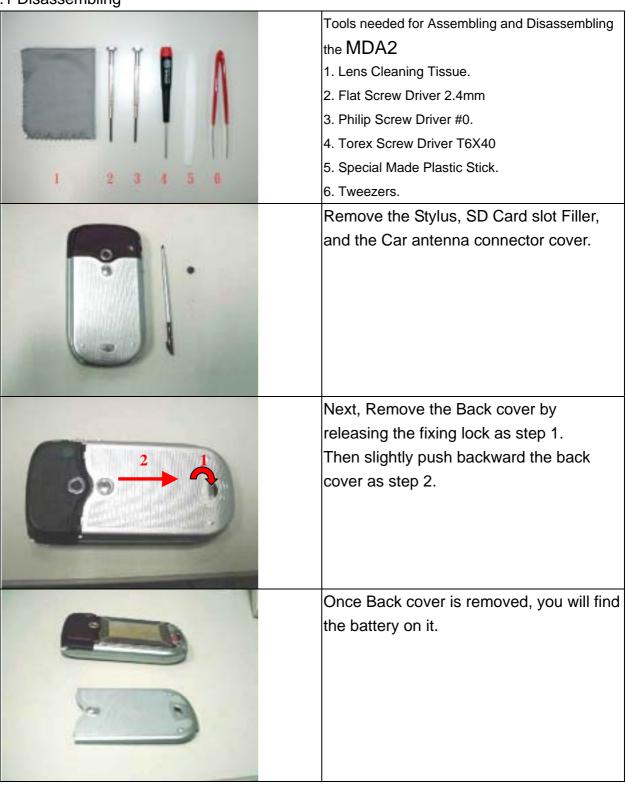

List of Servicing Tools

| No. | Item | Use | Remark |
|-----|----------------------------|------------------------------|--------|
| 1 | USB or Serial Cradle | Check for Cradle I/F (Serial | |
| | | communication only) | |
| 2 | USB DATA interface Cable | Check for Cradle I/F (USB | |
| | | communication only) | |
| 3 | Special Made Plastic Stick | Disassembling for | |
| | | | |
| 4 | SD Memory Card | For SD card test | |
| 5 | Earphone Headset | For Audio test. | |
| 6 | AC Adapter | Power supply to MDA2. | |

5. Assembling and Disassembling

5.1 Disassembling

HTC confidential © 2001, HTC Corporation. All rights reserved.

TOTAL 43 CONT.ON. 13 PAGE NO. 12

There are three hooks which fix the antenna cover and bezel.

Insert to the gap and slightly pull upward from right to left to release the hooks.

Antenna cover is removed.

Remove two screws which fix the antenna to MB.

Screw P/N:72H00339-00

Remove 6 screws which fixed the housing and bezel.

There are two types of screw

Screw 1~4 P/N 72H00338-00

Screw 5,6 P/N 72H00339-00

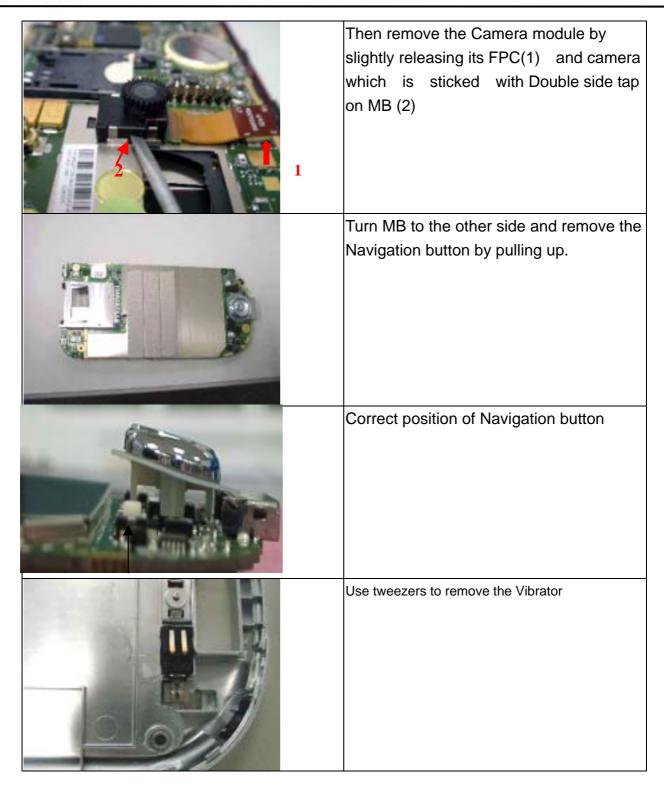

Now separating the housing.
Use plastic stick to slide along the gap

(Right side of unit, near stylus hole)

| Gently open the housing |
|---|
| Turn over the housing to the other side as shown on picture. |
| Once the housing is removed, next to remove 3 screws which fix the MB into bezel. P/N 72H00401-00 |
| Gently and carefully release the LCM FPC by litting the connector lock upward using your finger or soft plastic tweezers. |

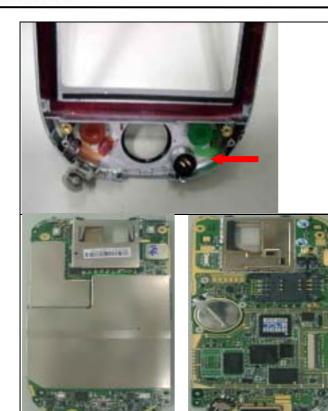

| | The LCM, Speaker , MIC is located on upper part (Bezel side). |
|---------|---|
| | To Disassembly LCM module Hold the entire assembly as seen on the picture, push aside the bezel and push the panel from front side simultaneously. Notice the starting location. Doing this to release the LCM from 4 hooks which located 2 at its right and left respectively. |
| | Then, gently pull out the LCM from its lower part hook . |
| | If the Speaker need to be replaced, remove two screw which fix the speaker . P/N: 72H00401-00 |
| Speaker | |

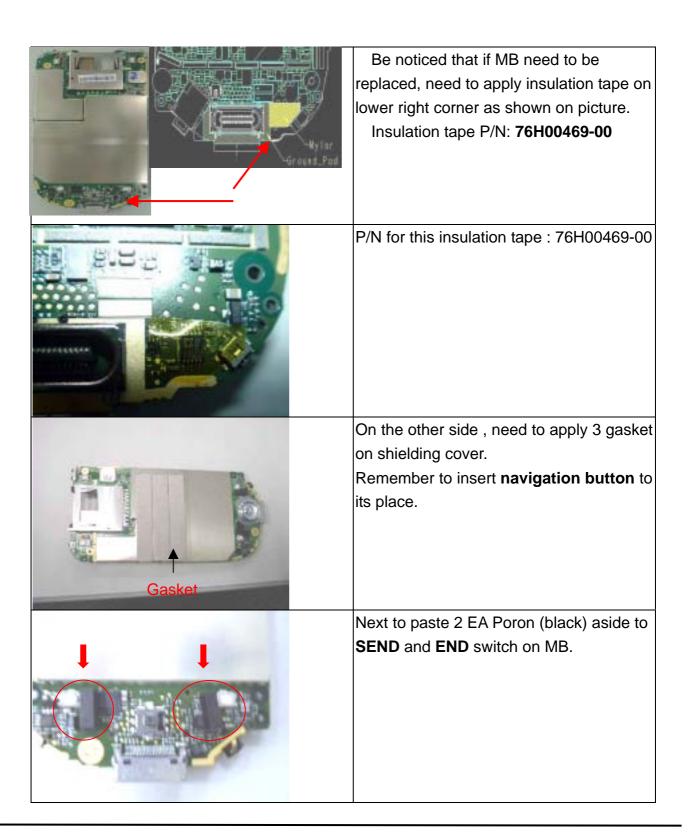

If MIC need to be replaced, just take it out from its place slightly by using tweezers.

Take out the MB and disassembly procedure is done.

The disassembly procedure is finished.

5.2 Assembling

HTC confidential © 2001, HTC Corporation. All rights reserved.

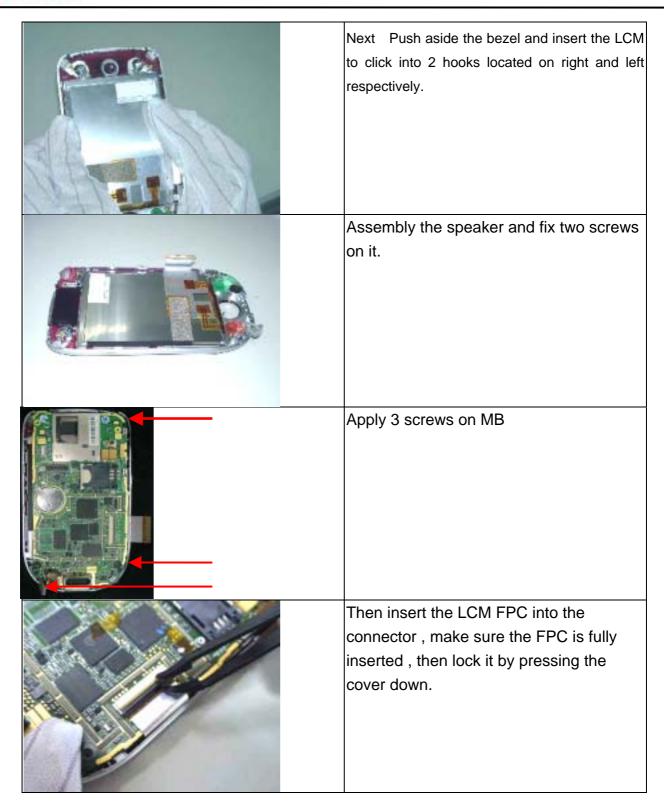

TOTAL 43 CONT.ON. 20 PAGE NO. 19

Poron

| Next Camera module assembly. 1. Make sure the Aluminium foil is clean and workable. 2. Put the Camera on it. |
|--|
| Place the Camera into correct position and fix it. |
| Important Notice: Before inserting the FPC into its connector, use your finger to flat the FPC first (as shown on picture) the lock it. (The FPC is fragile, to prevent break) |
| Make sure Camera is fixed correctly. |

| | Next Close the Rear Housing to upper part starting from left side (with Volume button) |
|---|---|
| | TIPS: Adjust the volume button to its center first before full closing the Housing. |
| | Antenna Assembly |
| | Put the antenna into its place, starting |
| | from upper part, then press and insert its two ribs correctly to the housing. |
| T | Then fasten two screws of the antenna. |
| | Continuing with 4 screws at the middle part of housing. P/N: Next two screws at the lower bottom P/N: |

| FIX Antenna Cover Put the antenna cover and fix it starting from unit left side (side with volume button) |
|--|
| Warranty Seal (Security Label) Be sure to apply new Warranty seal once the unit has been repaired before sending back to customer. |
| In case of MB replacement, since the IMEI has to follow new MB IMEI, repair site is required to re-print Regulatory label to change IMEI no, but Serial No. should remain unchanged. |
| Put the Battery into its place and lock it. |

| Put back the battery cover. |
|--|
| Put back the stylus, SD filler and Car antenna connector cover back into the unit. |
| Now The unit is ready for performing TEST. |

The Unit Assembly is done ready for further tests.

6. Problem Diagnostics

6.1. List of Test Jigs

| Item Name | Usage | Remark |
|----------------------------|--|--------|
| RS-232 Serial Cable/Cradle | For data port test | |
| USB Cable/Cradle | For data port test | |
| Special Plastic Tool | For unit disassembly | |
| AC Adapter | For battery recharge and power related tests | |
| Earphone with Microphone | For audio test | |
| SD Card or MMC Card | For write protect, read and write test | |
| SD card with diagnostic | For Function test diagnostic | |
| Personal Computer (PC) | Use for Communication/Synchronization test | |

<Hardware Requirement for PC>

O.S.: Windows 98/ME/2000

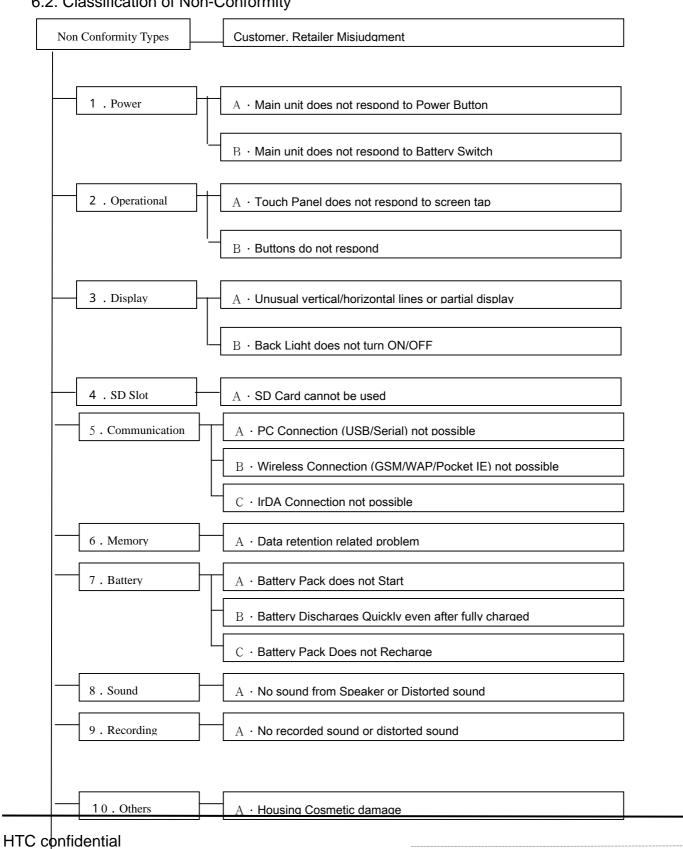

CPU: Pentium 166MHz or above

Memory: 64MB~128MBPC Link: ActiveSync 3.7

CONT.ON. 28 PAGE NO. 27

6.3 Troubleshooting & Repair

Before attempting to Diagnose the unit received for repair, perform a Full Reset (Cold Boot) in advance.

- 1 A . Main Unit Does Not Respond to Power Button
- 1 B . Main Unit Does Not Respond to Battery Switch
- (1) Make sure the Battery is installed properly to activate the battery pack.
- (2) Connect the AC Adapter, maybe the battery pack is exhaust.
- (3) Check the Battery lock is close properly.
- (4) Try with another battery pack.
- (5) Replace battery pack if necessary.
- (6) Check all connections including LCD FPC to Main Board. Try with another Main Board.
- (7) Replace Main Board if necessary.
- (8) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

2 - A . Touch Panel Does Not Respond to Screen Tap

- (1) Dismantle the unit, check the perimeter of Display between Front Bezel and Touch Panel surface for unusual foreign objects. Clean it, reassemble the unit and check the panel's function again.
- (2) Check the connection of LCM FPC whether is properly connected.
- (3) Try with another LCM.
- (4) Try with another Main Board.
- (5) Replace LCM if necessary
- (6) Replace Main Board if necessary.
- (7) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

HTC confidential

TOTAL 43 CONT.ON. 29 PAGE NO. 28

2 - B . Buttons Do Not Respond

- (1) Dismantle the unit, check the status of switches on the Main Board and the plastic parts of button of the Button not responding.
- (2) Try with another Main Board or Front Bezel.
- (3) Replace Main Board or Front Bezel if necessary.
- (4) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

3 - A . Unusual Vertical / Horizontal lines or partial display

- (1) Check the connection of LCM FPC whether is properly connected.
- (2) Try with another LCM.
- (3) Try with another Main Board.
- (4) Replace LCM if necessary
- (5) Replace Main Board if necessary.
- (6) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

3 - B . Back Light Does Not Turn ON/OFF

- (1) Check the connection of FPC whether is properly connected.
- (2) Try with another LCM.
- (3) Try with another Main Board.
- (4) Replace LCM if necessary
- (5) Replace Main Board if necessary.
- (6) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

4 - A . SD Card cannot be used

- (1) Check whether SD or MMC Card is fully inserted to the slot until you hear a click.
- (2) Try with another SD / MMC Card and Check whether it is Write Protected.

HTC confidential

© 2001, HTC Corporation. All rights reserved.

TOTAL 43 CONT.ON. 30 PAGE NO. 29

- (3) Try with another Main Board.
- (4) Replace Main Board if necessary.
- (5) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

5 - A . PC Connection (USB / Serial) not possible

- (1) Check whether "Connection Settings" in the MS ActiveSync is properly set.
- (2) Check whether it connects with other cables or cradle, customer's cable might be damaged.
- (3) Check the external appearance of the connector on the unit whether it is physically damaged.
- (4) Replace Main Board if necessary.
- (5) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

5 - B. Wireless Connection (GSM / WAP / GPRS) not possible

- (1) Make sure the user has been contacting the Carrier for SIM Card validation and activation.
- (2) Make sure the Wireless Connection Settings has been properly set.
- (3) Make sure the SIM Card is properly inserted to the SIM compartment. Make a life call or test it with the RF Test Station (Antenna Test).
- (4) Dismantle the Main Unit and check whether the Antenna is properly installed.
- (5) Try with another Antenna.
- (6) Try with another Main Board if necessary.
- (7) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

5 - C . IrDA Connection not possible

- (1) Make sure the IrDA port settings on the Notebook or PC are properly set.
- (2) Make sure the IrDA function is properly activated on the Pocket PC and on the other device.
- (3) Make sure there's no obstruction between the two devices in connection and within the distance.
- (4) Check the IrDA window whether it is broken or cracked. Replace Front Bezel if necessary.
- (5) Replace Main Board if necessary.
- (6) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

TOTAL 43 CONT.ON. 31 PAGE NO. 30

6 - A . Data Retention related problem

- (1) Back up battery is rechargeable, to retention purpose when main battery power is used up or when changing the main battery, Make sure to charge the unit if not use for a while.
- (2) Data introduced by User might be lost when Battery has drained completely.
- (3) Ask user to charge the Main Unit when latest warning message pops up.
- (4) Ask users to back up their data to the PC or SD card when expect stop using the unit for long period of time, for example, more than one week.
- (5) Charge the Main Unit and check if data looses even the Battery pack is charged or at least The unit still can be powered on without AC Adapter.
- (6) Check whether AC Adapter is functioning properly.
- (7) Check whether the condition of Battery Charging status is correct.
- (8) Check the appearance of Battery Pack.
- (9) Replace Battery Pack if necessary
- (10) Replace Main Board if necessary.
- (11)Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

7 - A . Battery Pack does not start

- (1) Make sure the Battery lock is closed properly. Data introduced by User might be lost when Battery has drained completely.
- (2) Connect to the AC Adapter and see if it takes charge. Also check AC Adapter condition.
- (3) Ask users to back up their data to the PC or SD card when expect stop using the unit for long period of time, for example, more than one week.
- (4) Charge the Main Unit and check if data looses even the Battery pack is charged or at least The unit still can be powered on without AC Adapter.
- (5) Check whether AC Adapter is functioning properly.
- (6) Check whether the condition of Battery Charging status is correct.
- (7) Dismantle the unit and check the appearance of Battery Pack.
- (8) Try with another Battery Pack or Replace Battery Pack if necessary
- (9) Try with another Main Board or Replace Main Board if necessary.
- (10)Once the defective part has been identified, verify it again with the defective part whether the

HTC confidential

TOTAL 43 CONT.ON. 32 PAGE NO. 31

symptom could be duplicated.

7 - B . Battery discharges quickly even after fully charged

- (1) Make sure the Battery Pack takes fully charge with AC Adapter.
- (2) Check whether the condition of Battery Charging status is correct.
- (3) Dismantle the unit and check the appearance of Battery Pack.
- (4) Try with another Battery Pack or Replace Battery Pack if necessary
- (5) Try with another Main Board or Replace Main Board if necessary.
- (6) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

7 - C . Battery Pack does not recharge

- (1) Make sure the Battery Pack takes fully charge with AC Adapter.
- (2) Check whether the condition of Battery Charging status is correct. Charge should be done in no more than 3 hours.
- (3) Dismantle the unit and check the appearance of Battery Pack.
- (4) Try with another Battery Pack or Replace Battery Pack if necessary
- (5) Try with another Main Board or Replace Main Board if necessary.
- (6) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

8 - A . No Sound from Speaker or Distorted sound

- (1) Check "Sound & Notifications" Settings in the unit for Sound Enabling.
- (2) Make sure it's not MUTED.
- (3) Dismantle and Check whether the Speaker is properly installed (Orientation)
- (4) Replace Speaker if necessary.
- (5) Replace Main Board if necessary.
- (6) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

9 - A . No Recorded Sound or Distorted sound

HTC confidential

© 2001, HTC Corporation. All rights reserved.

TOTAL 43 CONT.ON. 33 PAGE NO. 32

- (1) Check "Sound & Notifications" Settings in the unit for Sound Enabling.
- (2) Make sure it's not MUTED.
- (3) Dismantle and Check whether the Microphone is properly installed (check or missing rubber)
- (4) Replace Microphone if necessary.
- (5) Replace Main Board if necessary.
- (6) Once the defective part has been identified, verify it again with the defective part whether the symptom could be duplicated.

10 - A . Housing Cosmetic damage

(1) Unless it is for Refurbishment, all housing replacement due to cosmetic damage shall be subject to be charged.

7. Diagnostic Program

7.1. List of Test Items

| No. | Item | Description | Remark |
|-----|-----------------|---|--------|
| 1 | RAM Test | RAM Check Size/Write/Read/Comparison test. | |
| 2 | Display Test | Test the LCD display quality. | |
| 3 | Touch Test | Touch screen alignment test. Suggest to test in WinCE | |
| 4 | Playback Test | Play sound with 8KHz simulation wave. | |
| 5 | Record Test | Record audio sound and playback it(INT/EXT) | |
| 6 | Button Test | Test every most of button. | |
| 7 | Checksum Test | To show checksum value after Code reflash | |
| 8 | B Light Test | Back light ON with in different brightness level. | |
| 9 | LED Test | Test the message LED. | |
| 10 | Battery Test | Check the status of battery and AC power. | |
| 11 | Vibrater Test | Test the function of the vibrater. | |
| 12 | SD Test | SD card Write/Read/Write Protect test. | |
| 13 | Clean Talk Time | Clean Talk time(Air time) & Format PIM storage | |
| | | CAUTION: This item is applied for refurbishment case | |
| | | only. For same unit repair back to customer is not | |
| | | necessary. | |
| 14 | USB Test | Suggest to test in Windows CE | |
| 15 | Sir Test | Suggest to test in Windows CE | |
| 16 | Serial Test | Suggest to test in Windows CE | |

7.2 Test Items Operation

Power on the unit. While press and hold the **Power** Button, **Action** button and **Reset** the unit with the Stylus, release RESET button first about 1 second the to enter the **Test Mode**. You will find the display as following:

Appendix

A. Customer, Retailer Misjudgment

Before attempt repairing the unit, make sure the type of reported failure could be clearly reproduced; otherwise, check with the customer or distributor once again to identify the problem correctly.

The following are failure symptoms that are typical by misjudgment

| No. | Item | Possibility |
|-----|-------------------------|---|
| 1 | No Power even the | Built-in Battery switch is switched OFF or exhausted. |
| | power button is pressed | While Back Light is turned OFF, the surrounding lighting will be |
| | | reflected on the panel and in a dim location, it looks like the unit is |
| | | turned OFF. |
| | | According to the Power Management settings, the units will be |
| | | switched OFF automatically. |
| 2 | Battery discharges | The battery life depends on the devices being used in SD Card |
| | quickly | Slot, and frequency of use of the Front light. These functions |
| | | consume a lot of energy. |
| | | Operating with front light ON, or using high energy consumption |
| | | devices such as SD Memory Card will drain out the battery pack |
| | | faster. |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

| 3 | Battery cannot be | Using AC adapter that is NOT supplied with the unit. |
|----|-------------------------|--|
| | charged | Charging the battery while operating the unit with heavy |
| | | loadings could cause the temperature inside the unit to build up |
| | | which could cause the unit stop charging. At this moment, the |
| | | LED indicator will flash Yellow to notify user that the charging has |
| | | been stopped. Or the temperature is extremely low will also stop |
| | | charging. |
| | | Since the extreme high or low temperature will cause the battery |
| | | to discharge quickly, it has been designed to cut battery charge |
| | | below 0 and above 35~40 to protect the battery pack. |
| 4 | Cannot make | If the unit could pass the test with Loop back Interface card, the |
| · | communications via | possibility of unit malfunction becomes low. Then the following |
| | mobile phones through | items could be the reason of problem such as location, timing, |
| | exclusive cable. | signal strength, service provider's mixed up, or problem with the |
| | | mobile itself. Or could be incompatibility issue. |
| 5 | Cannot use SD/CF | Cards which are not being pre-formatted. |
| | Memory Card | SD card has been switched to Write Protect mode. |
| | | Card not inserted completely, or bad contact between connector |
| | | contacts. |
| 6 | Black or White dot on | For LCD panel's normal behavior, it is hard to find a panel |
| | the screen. | without any bad pixel. Once the numbers of dots and the distance |
| | | between them are within the specifications, it is allowed. |
| 7 | Touch Screen or | Could be wrong operation. |
| | Program Buttons are | Screen not properly aligned with the stylus calibration. |
| | not reacting. | |
| 8 | Front Light dim, cannot | Check the Front Light settings in Power Management settings |
| | turn ON, or shuts OFF | |
| | automatically. | |
| 9 | Cannot playback music, | When Battery low, the music playback becomes difficult and the |
| | No sound or volume is | volume could become lower. |
| | low. | |
| 10 | Cannot execute | Could be an incompatible software |
| | installed application | |
| | programs | |
| 11 | Operation is slow in | Could be insufficient memory. Check amount of system memory. |
| | response | |

| 12 | Hang up | Software being used sometimes is not fully compatible with the |
|----|----------------------|--|
| | | system. |
| | | Execute many application programs simultaneously |
| | | Software that requires big amount of memory spaces or the |
| | | system memory is low or the files being used is fragmented. |
| 13 | System Memory is | Software that requires big amount of memory spaces or the |
| | enough, but is shows | system memory is low or the files being used is fragmented. |
| | insufficient. | |
| | | |

^{*}Note: Nevertheless, the above symptoms could be solved by a warm boot or cold boot, make sure the warm/cold boot has been executed and try to reproduce the symptom reported.

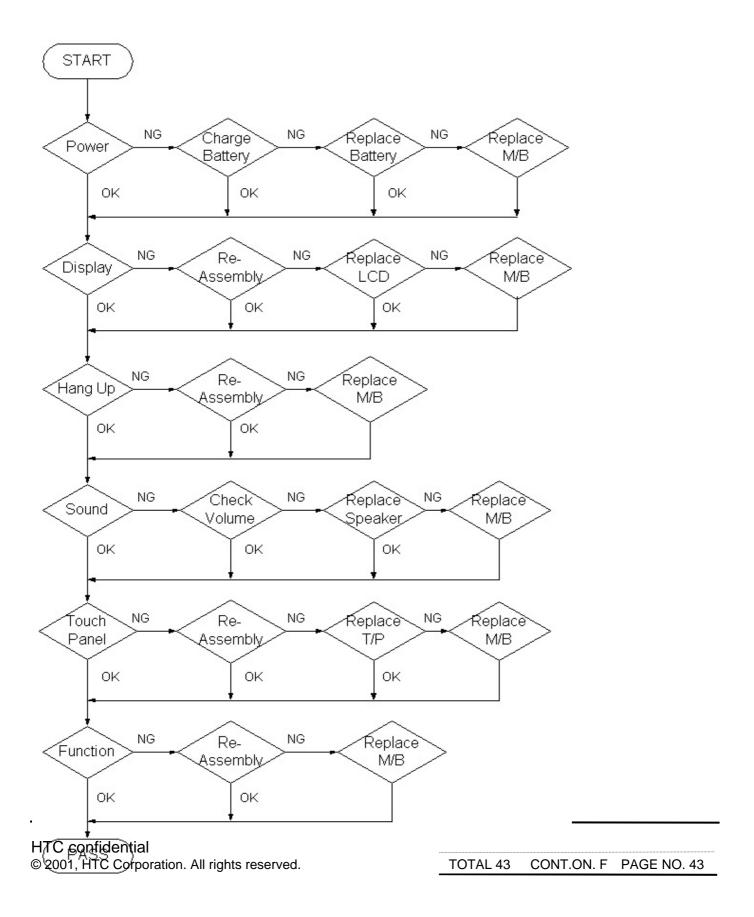

How to perform Warm Boot and Cold Boot:

Warm Boot: Reset the unit by pressing reset button.

Cold Boot: Press Power button and Reset the unit simultaneously.
